In a decision hailed by the union as a significant defeat for Mrs Margaret Thatcher, the judge said that the Government should have consulted the arrogance of a government unions and staff before with which sees unions as a threat drawing the right to belong to a rather than a constructive force.

Staff who agreed to renounce about their membership were given a GCHQ £1,000 payment and only 150 refused to accept what they saw as a government bribe. The judge said that those who accepted the money should be

allowed to keep it. Leaders of the Civil Service unions met today to decide how best to organize the recruitment campaign and to win back union recognition at Chelten-ham. Application forms for membership are already being distributed. Ministers were last night said

to be considering the grounds for a possible appeal against the court decision and to be drawing comfort from the judge's rejection of the unions' substantive arguments against the han.

Those were that the Govern-

ment had no power to vary civil servants' terms and conditions to exclude them from trade union membership; the

ban on unions at the sensitive listening stations was unlawful.

The 7,000 employees at the Cheltenham complex and 10 out-stations in Britain and abroad were ordered to give up their union membership in March after the Government argued that there was a conflict of interest with the maintenance was not valid under a 120
Civil Service Order in Council.

The judge's rejection of those arguments was causing concern to some union officials, who argued that there were powerful reasons for the unions to appeal against the rulings, even though they had won "a great moral victory".

Mr Peter Jones, secretary of the Council of Civil Service Unions representing the eight unions, said after the result was announced: "This historic judg-ment is a victory for the trade unions and a victory for civil rights. It is a sharp rebuke to the "We are ready for discussions

epresent about 150 union members remaining at GCHQ.

June 5: International Labour
Organization rules the bas was in early negotiations with the Government on the restoration

of union rights.

A decision by the Govern-ment to opt for a negotiated agreement rather than an appeal could cause the unions some embarrassment because the "no strike" agreement offered in secret talks in February and rejected by the Prime Minister has since been repudiated by conferences of two of the largest

Those unions, the Civil and Public Services Association and the Society of Civil and Public Servants, did not represent the majority of the GCHQ staff but are still influential voices. However, there is bound to be strong pressure from the other unions to honour the agreement's guarantee of no disrup-tion of intelligence-gathering

The judge's ruling that the government ban was "invalid and of no effect" led to disagreement last night between the unions and the Foreign Office, which had initially released a statement saying that the judge had granted a stay of his declaration pening any possible appeal.

That statement was subsequently withdrawn, but officials insisted that the judge had recognized that the present situation at Cheltenham should be maintained. The unions argued that the judge had made no such declaration and took the Foreign Office statement as a "dirty trick" to dissuade GCHQ employees from rejoining unions.

There was a recognition in union circles last night that one possible option for the Government was a period of consul-tation with the staff, after which exactly the same orders as before would be made by

Elated staff hail legal victory

Many GCHQ workers had been expecting the judgment to be made and took radios to work to listen to news broadcasts. When the news broke, many expressed surprise that

Civil Service unions at GCHQ, after the verdict.

Staff at Government Com- they had won not just the moral lation among the hard-core who had fought the Government's ban throughout.

Mr Adye, in his letter, referred to Mr Justice Glidewell's ruling that the union ban instruction was invalid, and went on to say that the judge certificates issued by Foreign Secretary under the Employment Protection Acts could remain in force, and that who refused to sign away their the £1,000 payments for loss of rights also remained valid.

Among those who refused to ship but have continued to work the view was growing that the judgment had dealt a stunning blow to Mr Peter Marychurch, the GCHQ direc-tor, who had tried to bring the ban into force. One union member said: "His position is

now untenable". Miss D. Greene, a former branch secretary of the Civil and Public Services Association at GCHO, who is one of the 100 or more still fighting the ban inside the establishment, said: "I feel ecstatic. I am very surprised. There was a feeling that we did not really stand a chance. We felt we had a good moral case, but that we would not win the legal case."

Mr Chris Dagleish, who also refused to yield on union membership, said he thought it likely that the Government would appeal on grounds of national security

He said he had joined a union only three days before the

there to report on foodstocks. Mr John Gunmer was present, so Downing street claimed, in his capacity as Minister of State at the Department of Employment, where he has responsibility for industrial relation in the ports, rather than as Chairman of the Conservative Party.

Call for calm at Port Talbot

As violence broke out again outside the Port Talbot steelworks, Mr Viv Brooke, assistant chief constable of South Wales, appealed to miners and drivers

to cool down before someone is crushed by a lorry. Two policemen and a miner were taken to hospital yesterday following ugly disturbances outside the entrance to the works as miners tried to prevent convoys of lorries taking supplies to Llanwern. More than 400 pickets clashed with 200 policemen as the lorries sped by, with their loads of coal and iron ore and

42 miners were arrested. Bottles and stones were thrown at the lorries, and 40 windscreens, estimated at £6,000, were smashed. Some drivers were safety belinets and visors to protect themselves from missiles and flying glass.

Nearly 5,000 people have been charged with offences relating to the miners' strike between March 14 and July 10.

In the same period 656 people were dealt with in court and 60 defendants were acquit-

Owen backs **Thatcher** over miners By Philip Webstor Political Reporter

Dr David Owen, leader of the Social Democratic Party, said yesterday that Mr Arthur Scargill, the miners' president, must not succeed in winning what had always been for him a political strike and that the Government deserved support in standing firm against a sell-

In a radio interview Dr Owen launched a savage personal attack on Mr Neil Kinnock, the Labour leader, for being "led by the nose" by Mr Scargill and said that if the miners' leader won it would have a devastating effect on the cause of moderation and realism in British trade unionism

Dr Owen said that when Mr Scargill spoke on Saurday of the political overtones and influences in the strike, and of effectively bringing down the Government, Mr Kinnock should have disowned Mr Scargill's views.

The fact that he did not and that he was prepared to line the Labour Party up increasingly with the miners' strike "reeks of opportunism". Dr Owen said, I appeared that Mr Kinnock thought the miners would win' and that the Labour Party should stand alongsde them, whereas hitherto he had sat on the fence.

Mr. Kinnock's failure to disown Mr Scargill was very dangerous and would come back on him. It would mean there were practically no mod-

Port Talbot, no more is coming

in because of a decision by tugmen to join the transport workers' strike. Without them the ore carriers cannot enter

Mr Douglas Hurd, Minister of State for the Home Office told Mr Anthony Marlow, Con-servative MP for Northampton North, in a written answer yesterday that 4,727 people have been charged. Most were arrested for obstruction or breach of the peace. But 84 people have been charged with the serious offence of riot.

Although there are sizable The following table of of-stocks of coal and iron ore at fences was supplied:

Europe air charters beat dock strike

The scramble by British importers and exporters to beat the docks strike has even seen light aircraft being chartered to fly goods to and from Europe, with charters on heavier planes being snapped up. Mr Christopher Foyle, grand-

son of the founder of Foyle's bookshop, who owns an aviation company based at Luton airport, said yesterday: "We have our own Aziecs, Navaho Chieftains capable of carrying between half and one tonne, and we have been asked to do everything from importing car parts to exporting live

being quoted between £5,000 carries later this week. The closure of Dover to freight cargoes yesterday blocked the for a seven-tonne load from Dusseldorf to Southend on a Viscount, to £15,000 to take 40 tonnes on a Boeing 707 from the Midlands to Brussels, much above sea-freight rates.

Most of the inquiries related places in near-northern Europe, with shippers trying to get goods that are trapped in ports across the Channel or North Sea.

 National newspapers could face a shortage of newsprint next week if the dock strike continues, and in common with other papers The Times will be.

Air Foyle's customers are reducing the number of pages it

last main avenue for the import of newsprint (a Staff Reporter The Army's Royal Corps of

Transport would be at the centre of attempts to keep the ports running if the Govern-ment brought in the troops because of the dock strike (the Press Association reports). The corps practices constantly at a military port at Marchwood, near Southampton. Run by 350 men of the 17th Royal Port Regiment, it is Britain's only military port.

suspect' Continued from page 1 learnt in the British Department of the KGB in Moscow. The Golitsin disclosure came at a time when suspicious of a mole had been rearoused, said Parliament, page 4 Mr Wright, "because all the

operations against the Russians, whether they were double agent or technical operations, failed fairly soon after they were started."

The defection of Philby to Moscow in 1963 led to suspicions that somebody in MI5 had tipped him off that, thanks to the Golitsia testi-

uncovered. An inquiry was commissioned under a senior MIS officer, Mr According to World in Action, which produced documentary evidence of the inquiry, the first Symonds report pointed to Sir Roger's deputy, Mr Graham Mitchell as the mole. But the second Symonds inquiry suggested Sir Roger was the more likely candidate. Mr Wright said that Sir Roger obstructed the Symonds inquiry: "He was anxious that Mitchell should not be found in the found in the symonds in

not be found innocent because he was the next suspect". An internal review of the Hollis case was undertaken by Mr John Day, a senior MI5 officer. Mr Wright recalled: "He (Mr Day) came to me one day and said that he had always regarded me as seeing reds under the bed. But he now wanted to tell me that he had

> Hollis was a spy". In 1974, Mr Wright continued, Sir Michael Hanley, then head of MI5, called a meeting in London of allied. intelligence services. He told them Sir Roger had been investigated, interrogated and had not been cleared: "He invited them to make any necessary damage assess

come to the conclusion that

In 1974, Lord Trend, the former Cabinet Secretary, was brought out of retirement, to try and settle the issue. He concluded, in the absence of conclusive evidence either way, ; that Sir Roger was innocent. It was on the basis of the Trend report that Mrs Thatcher cleared Sir Roger in a Com-mons statement in 1981.

One very senior former counterintelligence officer said of Mr Wright's action: "I am not a vindictive person. But this is a very serious crime. I think that serious crimes ought to be prosecuted".

It was suggested by a former colleague that Mr Wright harboured a grudge about the meagreness of his pension and had gone public for the sake of financial gain. A spokesman for World in Action said "We bave not paid him a single penny and he has not asked for

Dull chess contest takes fire

Danny King playing for England in the Robert Silk Young Chess Masters, Round 2 wanted to go to a concert yesterday evening and so had a yesteruny evening and so had a quick draw with Tony Kosten (England). Manny Rayner (Wales) versus Klaus Berg (Deamark) was also dull, but suddenly exploded into tactics which led to a draw by repetition.

Andrew Martin (England) stood well against Jeff Horne (England) but blundered and lost. Max Fuller (Australia) is a pawn down against Bill-Hartston (England) in a rook and pawn ending. Tim Upton (Scotland) drew with Peter Large (England).

In the Robert Silk Lady Masters, Nina Holberg (Den-mark) blundered disastrously against Rohini Khadilkar (India) in a drawish position. Dinah Norman (England)
played passively against
Mandy Hepworth (England)
and got her just desserts. Susan
Walker (England) scored her second successive win against Vashanti Khadilkar (India) and the third of the Indian Women Master sisters, Jashree Khadilkar is adjourned in a drawish position against Rani Hamid (Bangladesh).

Thatcher to attend CBI conference By Edward Townsend

Prime Minister has agreed, for the first time, to attend the annual conference of the Confederation of British Industry. She is to conduct an any questions" session with delegates in Eastbourne at the beginning of November.
While it is clear that Mrs Margaret Thatcher accepted the invitation some time ago, industry observers were speculating last night on the Prime Minister's need to rally the

faithful The carefully-orchestrated conference usually begins with a political forum at which businessmen have been able to throw selected questions at

political leaders. At a Sunday evening session chaired by Mr Pete Murray, the entertainer and disc jockey, Mrs Thatcher will take questions on the economy, industry and

trade. Sir Terence Beckett, the CBI director general, said yesterday: "This is a first for the CBI, although the Prime Minister has spoken on previous occasions at the CBI annual dinner."

The conference theme for 1984 is "Agenda for Enterprise" and the debates will focus on a medium-term strategy for busi-

Whitehall brief

Helping the decision-makers to look after the shop By Peter Hennessy

As the Whitehall machine rinds into the fifth year of

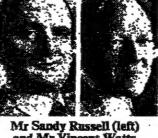

Mrs Thatcher's efficiency revolution, a debate has sprong to life about the role of ministers in achieving a more streamlined bureaucracy. Should they try to manage their depairments like the chief executive ments like the chief executive of a business, or should they get on with the policy and the servants mind the shop?

The Prime Minister wants

her Cabinet colleagues really to run their departments and, under her two efficiency advisers, Lord Rayner and his successor Sir Robia Ibbs, an ambitious scheme, the financial management initiative (FMI), has been constructed to give them the tools to do the job. Sir Peter Carey, who retired

last year as Permanent Sec-retary to the Department of Industry, has rejected this thesis flatly: "Ministers are amateurs of management. It is not their skill or, frequently, inclination."
"Extremely few have had experience in genuinely manag-

ing a large organization over a prolonged period. If one ac-

and Mr Vincent Watts cents that, in modern conditions, management is a highly professional skill which has to be painstakingly devel-oped, ministers are not the people to undertake it."

All this is in direct contradiction to the conviction of a senior figure at the heart of the Prime Minister's efficiency strategy who says: "We are now plugging the FMI into the departmental grid. The import-ant thing is that there is a clear signal from ministers that they want their departments well managed. They do have to put something into it or it will die." Members of the FMI unit. the body charged with spread-

ing the gospel of the new managerialism throughout

throughout

reconciling the two positions last week. They pointed to Sir Peter's observation that the fact that ministers felt the need to try to manage their ministries was "a reflection on the permanent management of the [Civil] Service which must recognize its responsibility to provide the more responsive and flexible machine ministers

Mr Sandy Russell, the unit's head, and Mr Vincent Watts, a consultant on secondment from Arthur Anderson and Co, said the pace of change in the transition phase of FMI meant that, as Mr Russell put it, "ministers had to give a strong pash to all this". Once the system was up and running it? might not be necessary for the politicians to devote so much time to it.

Mr Russell and Mr Watts reckon the FMI has already produced irreversible change in the way departments allocate money and manpower, and fix priorities. "Obviously one cannot demonstrate it is irreversible", Mr Russell said. Perhaps that will only be

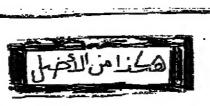

an after-life." One thing, however, cannot wait until the after-life. Nobody

has pet managed to produce a stirring slogan with which to emblazon the FMI banner. In publicity terms, it lacks punch and visibility

"Good management, like good housekeeping, is inhe-rently a boring concept to readers of newspapers", said Mr Watts. But he had a go and produced three themes for stitching on the banner "objectives should be clear. responsibility for achieving them should be assigned to individuals, information on their achievement should be

"The trouble is", said Mr Russell in his dry Scots fashion, "when you use words like 'objectives' people glaze

They have to find a ringing, convincing phrase to put in the mouths of ministers when they kaunch the forthcoming FMI White Paper or it will continue to fail to capture political and public attention. Back to the drawing-board boys.

The employers and the Government want to assess teacher performance to enable good teachers to get more money, and bad ones to be held back from promotion.

Detection of lightning to improve

By Kenneth Gosling New developments in the

and the pinpointing of lightning strikes have been given greater significance because of the fire which damaged the south transept of York Minster 10

days ago.

Within the next fortnight the Electricity Council is to open the second of four stations The park, expected to open by the spring of 1987, has been authorized by Penguin Books, who now own the Potter titles. which eventually will form a national lightning flash location scheme based on an It is expected to take the form of a Lakeland village with Beatrix advanced form of radio direc-

tion-finding.
The Meteorological Office is setting up an automatic detec-tion scheme to forecast more accurately the arrival of thun-

They could also reduce the numbers of those killed and injured by lightning strikes. In Britain lightning is the cause of a dozen deaths every year. Mr Philip Goldsmith, direc-

tor of research at the Meteorological Office, said that it already monitored the intensity of rainfall over Britain where there was a high probability of

Now it was looking ahead on Now it was looking anead on three fronts: the observation of lightning; the ability to recog-nize the position of clouds and something about their develop-ment; and the ability to understand more about cloud

£3.5m bets swindle alleged

Two pensioners and their son ran a large-scale swindle in which clients invested in a horserace betting firm, a court

was told yesterday.

More than 10,000 people
were persuaded to put £3.5m
into an enterprise called Tru To Form which operated on the basis of an infallible system of gambling, Mr Hugh Mayor, for the prosecution, said at Shrews-

bury Crown Court.
The business failed, but the clients' money continued to be used to fianance an extravagant lifestyle, with the son driving a Rolls-Royce, Mr Mayor said. Rolls-Royce, Mr Mayor said.
Leonard Bielby, aged 68, his
wife Grace, aged 66, and their
son James, aged 36, formerly, of
The White House, Sandford
Avenue, Church Stretton,
Shropshire, and now staying in

Weeks Hill, near Dartmouth, Devon, denied six charges of obtaining a total of £30,300 by deception - by falsely representing the sams as dividend-earning investments in Tru To Form, which was able to repay

the sum on request.

They also deny three charges of conspiring to obtain by deception a total of £171,000 by falsely saying the firm held credit of £3.5m.

Mr Mayor said that all three defendants had a hand in running the enterprise although James Bielby played the leading part. The case continues today.

The Rev John Frederick Vile, aged 36, of Robin's Lane, Barry, South Glamorgan, committed the offences while he was vicar of St Paul's, Landore, Swansea.

An Anglican vicar who He asked for eight similar offences to be taken into consideration.

Mr Anthony Evans QC, for the defence, said Vile, a bachelor, was a lonely, immature man who had displayed homosexual tendencies before ordination. The authorities had encouraged him to continue his career hoping he could keep himself under control.

Issue settled so why are dockers on strike?

The Government stands ready to take any action which eventually becomes necessary to make sure that the essential affairs of the country keep running. Mr Nicholas Ridley, Secretary of State for Transport, told the Commons after making a statement on the dock strike. He denied that during the weekend he had mentioned the

word "troops".
It has been said the dockers feared that the Government in-tended to abolish the dock labour scheme, he said. The Government had no plans to change or abolish the scheme and so there was no

Mr Ridley said: Registered dockers are on strike at all ports in the dock labour scheme. Dockers are also on strike at the non-scheme ports of Montrose and Shoreham and, as regards freight traffic, at Dover, Felixstowe and Portsmouth, Ferry services for passengers, cars and coaches are continuing to operate. As I told the House last week the

Transport and General Workers' Union called the strike because of an alleged breach of the scheme by the British Steel Corporation at Immingham. Last Thursday the National Dock Labour Board, under the procedures in the dock labour scheme itself, decided that the cheme had been breached. By the following day the British Steel Corporation had remedied the matter for the future to the satisfaction of the Immingham

Despite that, the union has not called off the strike. Discussions between the union and the National Association of Port Employers in the National Joint Council for the ports industry broke up on Friday evening without any agreement

being reached.
I understand that the union is insisting that NAPE should guaran-tee that there will be no breaches of the scheme in future. NAPE have reaffirmed their willingness to honour fully their obligations under the scheme and believe that alleged reches of the scheme should continue to be determined by the dock labour boards under the

statutory procedures. It has been said that dockers fear that the Government intends to abolish the dock labour scheme. Let Government has no plans to change

dispute. I wish them all success. This strike can only damage many jobs, in the ports, and in other inclustries too. It is not in the interests of dockers, their families, their fellow workers in other

industries, or of the country. Mr John Prescott, chief Opposition spokesman on transport said the House would welcome the intervention of Acas into the escalating docks dispute. In a World this Weekend radio interview Mr Ridley

about the use of troops. His speech at the yort worker's luncheon on April 12 and the Ridley plan specifically to dismantle the coal and dock industries, had contributed largely to the fears which had triggered off this dispute. It could only make the job of Acas much more difficult.

Will he say (he went on) that he is prepared not only not to change the scheme itself but to meet the dock workers to assure them of the future of the scheme and the docks in which they work?

Mr Ridley: The Dock Labour Board found that there was a breach at Immingham. Now that breach had been remedied by the employers, is be recommending the Transport and General Workers Union to send At no time over the weekend

At no time over the weekend have I mentioned the word "troops". The Government stands ready to take any action which eventually becomes necessary to make sure that the essential affairs of the country keep running. Since the Government both this week and last week have given undertakings that there are no plans for changing or abolishing the dock labour scheme, that removes any excuse for this strike.

Is Mr Prescott prepared to advise the dockers to go back to work on the grounds that they have been misled as to the cause of the strike? Mr Michael Brown (Brigg and Cleethorpes, Cl. The original cause of the dispute has been resolved. While wishing Acas well in its attempts to break the deadlock, what role can it play bearing in mind that this does not appear to be an industrial dispute any longer? Is it not political?

Mr Ridley said there was a difference of opinion between Mr Scargill, who said it was a political dispute in support of the miners, and the TGWU, who said it was entirely to do with the dock labour scheme. He hoped their discussion sorting out that essential difference.

Mr Ridley: I cannot answer for what

anyone says to Acas. We see the only people who can change the scheme. It would take legislation before the scheme could be changed. The Government has no plan to do

Sir Paul Bryan (Boothferry, C): The dockers had no choice before they were ordered out. That is a repetition of what happened in the coal dispute and that is another proof that these are purely political strikes and nothing to do with the welfare or grievances of workers. Mr Ridley: Workers should be consulted about whether they wish to go on strike or not, and in secret believe

In is plain that at no stage in the dock dispute have any workers had a secret ballot and the evidence from Dover this morning about the

Mr Gavin Strang (Edinburgh, East, Lab): When will the Government recognize that neither the TGWU not the NUM will be humiliated or be done to the economy and the social fabric before there are settlements which reflect their aspirations?

Mr Ridley: What are the aspirations of the T and G? All the requests they made have been shown to be settled or groundless, so can Mr Strang use his influence - since he says he has it - to get the dockers to accept that they have been taken out on strike on a false pretence and that it is high time they went back.

Mr Kevin McNamara (Hull, North, Lab): If Mr Ridley wanted to settle matters today he could say, not only that there are no plans for changes but that he and the Government have no intention of introducing changes in the lifetime of this changes in the lifetime of this

Mr Ridley: There were two breaches of the scheme, first at Immingham by the employers and second by not using the procedures to sort it out but to insist on calling out the national dock labour force before

it takes two to make a bargain and the union should stick to the terms of the scheme just as much as the employers. It is not possible to go further than saying that the Government has no plans. I cannot give a stronger assurance than that. Labour MPs: Yes, you can. Mr Mark Robinson (Newport, West, C): Can we have an assurance

Strang: Union will not be humiliated or defeated

steps are necessary to keep easential lies going to affected indus-

Mr Ridley: The jobs of some dockers will be at risk if the strike persists but the jobs of million of their follow workers in unious in industries up and down the country
will be at tisk, too.

If anybody is clearly identified as
job wreckers, it is those who go on

strike on such flimsy grounds as in Later he added: Who are the job vreckers now? Who are the guilty

Mr Ridley said later that there could be no greater blessing and boon to Britain's overseas competitors and no greater damage could be done to

the nation's economy than by these two strikes, particularly the dockers' strike which now bore no indication strike which now bore no indication to the nature of the dispute. Sir Kenneth Lewis (Stamford and Spalding, C) said if Acas did not get a settlement of the docks dispute the British people would say that the brades unions, the NUM and TGWU, were taking on not the Government but the country as a

Though Mr Ridley and the Prime Minister might be reinctant to do so, it would be necessary to call in the TUC and point out to it the danger to the whole trade union movement unless the TUC could get people

Mr Matthew Parris (Derbyshire West, C): What is to stop a return to work while the Acas report is Mr Ridley: the answer cludes me.

Mr Michael Brown unsuccessfully sought an emergency debate on the docks strike which, he said, was clearly designed to challenge the authority of the Government. the metropolitan county councils to April 1986, yet experience and present forecasts indicated that it

Changes to paving Bill endorsed by peers

It would be wrong and unreasonable if action taken by the outgoing authorities between now and their abolition were to prejudice successor authorities, Viscount Whitelaw, Lord President of the Council and Leader of the House, said in the House of Lords during the report stage of the Local Government (Interim Provisions) Bill, which paves the way for the abolition of the Greater London Council and the other six metropolitan authorities. other six metropolitan authorities.

He was outlining proposed Government amendments to the Bill and at the same time replying to an Opposition amendment moved by Lady Birk. She maintained that the Government's compromise councils until April 1986 was not a viable substitute for holding

value snosume for holding elections in May 1985.

The House could not be expected to buy such legislative pap, she said.

The order cancelling the May elections would have to be made by mid-March at the latest, before the House of Lords had even had a suiff second reading of the Bill to

She was moving an amendment which, she said, would sustain the decision takes by the House of Lords on June 28 by giving the Secretary of State power, after the passing of an enactment abolishing the GL and the six mercentitae. the GLC and the six metropolitan county councils and the transfer of their functions, to make an order to restrict to a term expiring not before April 1 1986, the period of office of councillors of the councils elected on May 2 1985. Viscount Whitelaw said the Govern-

Viscount Whitelaw said the Govern-ment had proposed amendments to the Bill in response to the decision by the House of Lords and the package completely met the criti-cism that the original proposals would have given the Government government and their electors.

Lady Birk, moving her amendment, said the Government amendments not only suspended the elections, but did so before the House of Lords had had an opportunity to make a decision on the main abolition Bill. The Government's proposal was to extend the lives of the GLC and

LOCAL GOVERNMENT abolition and handover of powers, if it was to be properly done, by that

The main abolition Bill was unlikely to be enacted before July 1985 at the earliest. While babies took nine months to produce, quangos would take considerably

The Government claimed the extension of the terms of office was in accordance with precedent, but there was no precedent for doing it in advance of the main legislation. There were no real precedents and even if there were, they would be bad precedents which ought to be strictly ignored.

The House would have to beware

the golden tongue of the Leader of the House that would caress the Government amendments; they would not do. The House of Lords would still be constitutionally by-passed since the elections would be ncelled before the House had seen Nothing being offered by the Government today (she said) alters

that one iota. Viscount Whitelesw said he had decided to set out the Gvernment's package including the safeguards against asset surpping by the outgoin authorities because the issues involved affected the re-lations between the House of Lords

It had been right that the Government had given careful consideration to the decision taken by the House of Lords and it had accepted the view expressed so far as the transitional authorities were concerned. Its amendments met the

It would be wrong and unrease able if action taken by the outgo authorities between now and their abolition were to prejudice suc-cessor authorities. While it was to be hoped such actin would not be taken, the Government had to

One of the Governments new clauses proposed that if it appeared to the High Court that the GLC or a metropolitan county council had contravened either the controls of disposal of land or the control of contracts, it could order those responsible to be disqualified as a member of that authority and disqualified for a specified period

The Government had rejected the argument that there should be elections to the councils during the passage of the abolition Bill through Parliament. Such elections would involve 14 million voters and the outcome, if the abolition Bill was passed, would be that the councillors would be in office less than a year. How could that be justified?

Furthermore, the election would be held when the main abolition Bill was before Parliament and might well have passed through the Commons and had its second reading in the House of Lords. No one supports the danger inherent in a sort of referendum taking place on an issue subject to parliamentary

During the second reading in the

During the second reading in the Commons. Mr Edward Heath had said the way to deal with the problem was by continuing the lives of the existing councils until the changeover. That was what the Government now proposed.

There were precedents for the Government's action, in 1963 and in 1972, although on those occasions it had been done in the main abolition Bills. In this case it was a question of the timing of the elections and there was no alternative but to introduce the necessary provisions in the present necessary provisions in the present

The Government's amendments would allow a further opportunity for the House of Lords to consider

the matter which would set at rest fears that proper regard was not being paid to the views of the

I believe that on behalf of the Government (he said) I have made

made a substantial concession to the when you remember that the Bill had a majority of 108 at the third reading in the House of Commons. Lord Evans of Claughton (L) said although the Government's concession dealt with the objection to nominated councils, other objec-tions, including the fact that electoral arrangements were to be changed before the main legislation had passed through both Rouses of

Partiament, still remained. They should stick to the principle of the original amendment on w Government was defeated. Lard Molson (C) said the House could vote for the Government's amendments without any inconsistency or abandonment of principle. Ency of admindment of principle.

Lord Diamond (SDP) said if the
Government had not made such a
cock-up of all these arrangements, if
it had introduced one Bill, that would not have been anticipating the will of Parliament and the situation would have been totally

different.
It would be wrong to deny people in these vast areas the right to determine their own self-govern-

Lord Harmer-Nicholls (C) onthing would have satisfied the Opposition because it did not intend to be satisfied. It would be unconstitutional and undernocration if the House supported the Opposition's wrecking amendment,

The Bishop of Liverpool (the Rt Rev David Sheppard) said they were talking about perhaps two years of budget restrictions, taking away the councils' capacity to act during that period. He did not believe that capacity to act should be taken own.

Lord Boyd-Carpenter (C) said there must come a point in time when it was not worth going through the whole electoral process because it would be a waste of money and effort. Did 11 months come within

The Opposition amendment was rejected by 248 to 155. Government majority, 93, and the Government new clause suspending the elections and extending the term of office of councillors, was agreed. Later the other Government related new clauses concerning controls of the disposal of land and control of contracts, and disqualification for

Mr Richard Wainwright (Colne Valley, L): Is it the fact that Acas in I understand that both the union Kinnock allied with demagogue

COAL STRIKE

Condemnation of Mr Neil Kinnock, Leader of the Opposition, for his remarks at a week-end miners' rally came from Mr Nicholas Edwards, Secretary of State for Wales.

During Welsh questions in the Commons, Mr Keith Best (Rays Mon, C) said: It is unforgiveable that a Welsh MP and Leader of the Opposition should show so little concern for the great achievements Talbox and Llanwern and should ally himself with a demagogue by losing his self control, ripping up his speech and showing greater concern or those job wreckers than for those who have achieved such things in

the steel industry. Mr Edwards: It is deplorable that the Leader of the Opposition should apparently associate himself with a political strike which must be gravely damaging to jobs in industry

generally. Earlier, Mr Edwards had said that while reports indicated that there was no widespread impact on Welsh industry generally and the British Steel Corporation were continuing to take steps to ensure that steel production was maintained, those n employment in Wales would recognize the threat to jobs that the continuation of this damaging strike

Mir Ian Grist (Cardiff Central, C) said the only people who would gain from this senseless strike would be oil tanker crews and nuclear power contractors, and the worst loosers would be in the coal and associated

Mr Edwards: The strike can do nothing but damage to jobs in other industries and people not directly affected by the strike. It is deplorable that a strike involving about 200,000 people in two industries should have such threatening consequences for so many more in a host of other industries.

Mr Raymond Powell (Ogmore, Lab) said he had been asking Mr Edwards for five months to meet the chairman of the coal board, Mr Ian invited to senior Cabinet meetings

to discuss the strike and its impact on Wales, what would he say? Some 120 or 130 lorries travelling from Port Talbot to Lianwern caused danger when in the middle of the road where motorists were trying to leave the motorway.

It was time that Mr Edwards went to Mr MacGregor and convinced him that the miners had won the

Mr Edwards: Clearly the miners have not won the strike. The Government is determined that violence and intimidation should

I was present at the cabinet meeting this (Monday) morning and we discussed the fact that the windows of 32 of the lorries carrying coal to Port Talbot this morning were smashed by strikers, I hope he will join me in condemning that disgraceful violence.

Mr Keith Raffan (Delyn, C): Those miners on strike must realize that it is their industrial action which has driven up interest rates and is damaging Welsh industry. They are destroying other Welsh people's

By kotowing to Scargill, Labour MPs are aiding and abetting this destruction of jobs. They, too, are job wreckers. Mr Edwards: I agree. I hope MPs will heed the warnings of the chairman of the British Steel Corporation who said the strike threatens the whole recovery to

which BSC workers have contributed so much. Mr Michael Foot (Blaenau Gwent, Lab): What the leader of the Opposition and every sensible person wants is to see this dispute brought to an end under the proper

procedures agreed under Plan for Coul. It is the Government's breach

of those procedures which has led to this serious situation.

Mr Edwards said Labour Governments had recognized that pits had to be closed if they could not produce economically and bene-ficially, and that was what this strike was about - the determination of the NCB to run a sensible, profitable have it destroyed for political

Mr Donald Coleman (Neath, Lab): If Tories are concerned about the health of the steel industry, why do they not put pressure on the Prime Minister to settle the coal dispute? Government would put any kind of pressure on the management of the NCB - (Labour interruptions) which would allow decisions about the future of that industry and the viability of the pits to be dictated by a political demagogue or anyone else. (Conservative cheers.)

Mr Ronald Davies (Caerphilly, Lab): If as a result of the damage being done to the Welsh economy by the mining dispute and now by the docks dispute, the Government declares a state of emergency, will Mr Edwards assure us that he will

ensure that troops are not used against miners in South Wales? Mr Edwards: No decisions have been taken of that kind but the Government will carry out its obligations to the country as a whole and take whatever steps might be

Mr Barry Jones, chief Opposition spokesman on Wales: Rather than adopting a sneering, hard line approach. Mr Edwards should encourage the Prime Minister to effect conciliation. Mr Edwards said Mr Scargil had refused to discuss the inclusion of the word "beneficial" when con-sidering if a pit had a future or not.

If we really cannot discuss whether a pit has a beneficial future

(he said) we are hardly in a position to talk seriously about conciliation.

market forces be paramount. He would prefer the safeguards to be provided through institution devised and largely

Providing freedom for

THE CITY

The British financial services sector should be both competitive and a clean place to do business. Mr Norman Tebbit, Secretary of State for Trade and Industry, said in the Commons. It did not take may recorded to sully the reportation of a scandals to sully the reputation of a multitude of decent traders. I want to achieve a regulatory

framework (he said) which is clear enough to shape but not yet so tight as to cramp the pattern of structural change in the City, but has the resilience not to be simply overrun Opening a debate on the Gower

report on investor protection, he said he wanted to see the maximum

freedom for market forces to age innovation. In matters such as openness to newcomers and price competition, the financial services A sharp increase in the probability of conviction of fraudsters would strengthen the hand of the

overwhelming majority of honest confidence of their customers, but that confidence could not be achieved without supplementary measures sized at make frand and near fraud less likely.

For example, it was right that people in the investment business should be what were known as "fit

and proper" persons. Similarly (he continued), we would similarly (ne continued), we would expect to see business being conducted in a way which safe-guarded the investor against malpractices. The ingredients might include separate client accounts, compensation disclosure of interest in transactions for clients, and the principle that in any conflict of interest the client's interest should

Opera tickets

adminstered by the financial services insustry itself. Such selfregulatory agencies (SPAs) should be equipped to act quickly and flexibly and to pay for themselves. This needed to be underpinned by stature while leaving a flexible operation which could rapidly adapt

to changing business circumstances. He had not yet reached final usions but inclined to the view that a number of self-regulatory authorities should be set up on a functional basis. They should be as few as possible in number and cover as much as possible of the field. Though voluntary bodies, they should have statutory backing.

I sense (he said) a degree of movement of informed opinion in recent weeks towards toning down the ideas of the enthusiasts for a Stock Exchange Commission and an acknowledgement of a possible role those formerly devoted to the system of first tier SRAs alone, but I am still prepared to listen to the arguments,

However we operate this system, SRAs will need to be seen to be responsive to the needs of investors and not just to become cosy clubs regulating their own affairs for the benefit of their own members. They would need to discipline members and there would have to

be an effective appeal mechanism against expulsion or exclusion from against expulsion or exclusion from the market and powerful incentives at least for would-be traders to operate within rather than outside the SRAs. He was firmly of the opinion that the deadline of December, 1986 entered into the agreement between his predecessor, Mr Cecil Parkinson, and the Stock Exchange must be met. It was the view of the Stock Exchange Council that the deadline could be met.

Parliament today

Commons (2.30): Debates on estimates relating to diplomatic representation in the Commonwealth Caribbean and aid to Grenada and relating to the Property Services Agency. Lords (2.30): Health and Social Security Bill, third reading. Northern Ireland (Emergency Provisions) Act 1978 (Continuance) Order. Each ticket to the opera was subsidized by £14.70 in 1980-81, £15 in 1981-82 and £19 in 1982-83 from the Arts Council, Mr William Waldegrave, Government spokesman for the Arts, said during questions in the Commons. Decisions about individual levels of subsidy (he went on) are of course for the Arts Council

New pension rights for workers

PENSIONS

The Government's intention to allow all employees the right to take a personal pension was announced in the Commons by Mr Norman Fowler, Secretary of State for Social Services. He explained that the essence of his proposals was freedom of choice and flexibility. Giving all employees the right to a pension which they could take with them would remove another obstacle to job mobility, he said.

The proposals I am andouncing today (be added) give people more choice in the way they save for their old age. They are aimed at giving everyone in work a new right - the right to choose a personal pension. Mr Fowler said: When I set up the inquiry into provision for retire-ment I said that one of its first tasks would be a study of personal pensions. This followed proposals to enable people to arrange their own alternative to joining an employer's scheme or the state earnings-related scheme. Under the proposals people would accumulate their own fund which they could take with them

when they changed jobs.

Evidence on these proposals was taken at four public sessions of the inquiry and I also received 1,700 submissions and letters. In addition I commissioned market research which demonstrated a substantial potential demand for personal pensions. I am today publishing a short consultative document outlining the Government's proposals and next month will be publishing a longer document which will sum-marize the evidence received.

The Government believes that the demand for personal pensions can and should be met. We propose can and should be met. We propose that all employees should be given a right to take a personal pension. They will be free to choose the pension arrangements that suit them best. This right will extend both to those who belong to employers' pension schemes and to those how in the state earnings-related scheme.

ated scheme. Nearly half the workforce now belong to occupational schemes which are contracted out of the state mployers' schemes.
The proposals would allow those

opting for a personal pension to contract out of the state earningsrelated scheme. A minimum contribution to their personal pension would be required to ensure that they provided themselves with an adequate income in retirement.
Different arrangements would operate for people who already belong to compulsory contracted-out schemes and those who do not.
But the common aim is to ensure that all those who choose a personal pension are treated alike while not adverseley affecting the financial viability of occupational pension schemes.

i hope that this approach will meet the worries of many of those pensions interests who gave evi-

ence to the inquiry.

The essence of the Government's proposals is freedom of choice and flexibility. By giving all employees the right to a pension which they can take with them, we shall remove another obstacle to job mobility. People must have as wide a choice as possible of bodies with whom they may place their personal pension investments. The consultative document suggests a range of these, but recognizes the need for an adequate framework of consumer protection. We shall aim to keep restrictions to a minimum but there must be safeguards for example against misleading promotion.

The House will recognize that the proposals are far-reaching and that all concerned with the provision of pensions will want to study and comment upon their detailed implications. That is why I have published them as a consultative document. I shall welcome all views document. I shall welcome all views which are expressed over the next few months. These are vital issues, and before proceeding with any legislative measures we shall want to be sure that the legitimate interests of all those concerned are recognized.

But I should make it clear that the general principles underlying the proposals for personal pensions are ones to which the Government is committed. We have already gone a long way towards improving the position of occupational pension

scheme members. I have announced our intention

therefore devised a system which will six alongside and not threaten employers schemes.

Tights of early leavers; and I have in published proposals to give them a statutory right to a transfer value. and to give members more information about their schemes. sition spokesman on health and damaging and retrogressive pro-posals. This is perhaps not

surprising when they come from such a politically loaded and unrepresentative committee. The committee of five included two government ministers, a right Life Offices Association, and Mr Mark Weinberg, the chairman of Hambro Life who has a vested interest in these proposals and is expected to become a millionain

Personal pensions is simply effect a breezy new title for old fashioned money purchase schemes which have been overwhelmingly disadvantages. They do not provide benefits related to earnings at or near retirement, which is what

people want.
The Opposition will not allow the partnership in Labour's state. earnings-related pension scheme of 1975, the best deal pensioners ever had, to be overthrown in this way, Mr Fowler: Even by Mr Meacher's standards that was a ridiculously hysterical response. No one is compelling anyone to take a personal pension. What we are doing is giving people choice.

There are at the moment something like 11 million people who are not covered by occupational pension schemes at all. Mr Michael Meadowcroft (Leeds

West, Lit He needs to give far more attention to safeguards. Mr Fowler: We will do everything we can in the consultation period to consider sensible measures of consumer protection. We do not want so many restrictions upon "personal pensions that it makes -- broking of them unviable.

Mr Peter Horders (Horsham, C): ... Would be indicate when he hopes to bring forward legislation to carry out this most ambitious scheme? Mr Fowler: We are proposing there should be a period of consultation on the proposals in the consultative document. That will end at the end of November and proposals legislation can follow that.

Police Bill ends drugs body search

By Peter Evans Home Affairs Correspon

The police will have to release heroin smugglers with the drug concealed in their bodies because of an act of 'legal lunacy", Mr Barry Price, Chief Constable of Cumbria and a leading expert on drugs. says in an interview with Police

The "lunacy" is the dropping from the Police and Criminal Evidence Bill of a provision allowing body searches for drugs. Mr Price discovered at an

Interpol conference that the British police would be the only officers in Europe without such a power. His criticism comes as the Bill has finished its committee stage in the House of Lords. Mr Price, who is police representative on the Advisory

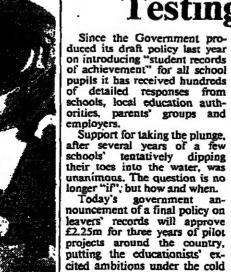

Council on the Misuse of Drugs, says: "Some foreign forces can even X-Ray people they suspect of carrying drugs internally. "It does happen. I think the record was a boy found to have swallowed 400 French letters

filled with cocaine."

ment of Education and Science official commented: "Though we are recognizing, by backing this, that there are more things in heaven and earth than exam results, I cannot see any government, even 20 years hence, deciding that records of

achievement are any substitute

for exams."

The problem with employers is that, as Sir Keith Joseph, often points out, they are transmitting a "scrambled message" about what they want from education. If they are all to be satisfied, from hoteliers who need details on personal character, to manufacturers seeking details of whether the pupils can work a lathe or fill in forms, then the leaver's record will be the size of a telephone directory.

Simplification, the teachers say, would be worse than nothing Pupils would be categorized into boxes, like judging whether someone's sity. honesty is "satisfactory". There Ch

value, such as punctuality, appearance, presentation, regular attendance, which most employers are keen to know. The Northern Examining

Association, which today launches detailed development work on records of achievement, last year consulted some 700 employers, parents' groups, schools, and teaching bodies, and found that four in five support the move. Opinion on what the records should contain was more confused, and misunderstanding about what records were for was widespread.

The Government's policy statement today can be expected to clear the waters, channel them, and check a few fountains of fancy. Most importantly, assessment will be tied to national criteria, to ensure consistency. Schools running experimental schemes will be set five or so models to choose from, to restrain diver-

Unita attack on Angola pipeline could mark new phase in civil war

ment, Unita, has struck for the first time at the northern enclave of Cabinca, centre of Angola's vital oil industry, in what could mark the opening of a new phase in the civil war which has raged since independence from Portugal in 1975. In a communique released on Sunday in Lisbon, Unita, the National Union for the Total Independence of Angola, said 22 people were killed and 55

injured when a time bomb blew up an oil pipeline on July 12.

The explosion had been reported a day earlier from Luanda, the Angolan capital, by Angop, the state-run news agency, which, however, differed on the number of casualties, saying a family of 10 had died when their house

caught fire. For some time after indepen-dence, Cabinca boasted its own separatist insurgency, but it has not been heard of in recent years, and there is no reason to doubt Unita's claim to have carried out the July 12 attack. As yet, there is no information available here on the extent of the material damage caused by the explosion. According to a report by the South African Broadcasting Corporation, the pipeline was part of an installation owned by Gulf

the next five years

whom Mr Mondale owes a large debt for rescuing his campaign in the South at a critical moment during the political operator in the South must have been an important consideration. The selection of an Italian-American Catholic woman from the North-east as the Vice-Presidential candidate cannot have strengthened the Democratic ticket in the South

> to place his own imprint on the party organization. Mr Lance has, however, a political history which is bound to be a disadvantage to the Mondale campaign. He is known as a close personal friend of former President Carter, and he was forced to leave the Carter Administration under a cloud after accusations of irregularities in

his banking career. Even though he was subse quently found to have committed no criminal offence, his record is a double embarrassment. The last thing that Mr Mondale should now want to do is to draw attention to his own links with what is widely believed to have been the disastrons Carter Adminis-tration. That he has been Vice-President is a political asset, but that he was Mr Carter's Vice-President is definitely not.

Immediate hostile reaction to the prospective Lance apointment forced Mr Mondale to back off to some extent. Mr Lance is to become simply chairman of the campaign, not of the Democratic National Committee. But worse was to follow for Mr Mondale. Having to swallow his pride and accept Mr Manatt's continuation as chairman of the committee has

Rather than asserting his authority, Mr Mondale has demonstrated his weakness. He has strengthened the im-pression that he bows to pressure, as well as having displayed strangely poor political judgment. He also made the political error of consulting only his inner circle of five or six close advisers before making his decision.

It is the possible implications of this episode for the Mondale style of leadership that gives this episode its broader political significance. Only party activists care much about who runs the Democratic National Committee, but the electorate at large cares about the capacity of a leader to control his party, to take decisions in the right way and to time their implementation

Anything that distracts attention, as this episode does, from Mr Mondale's central purpose is particularly damag-ing at this time. The test of this convention is whether by the end of this week we are talking about the distractions or about the Democratic assault upon

its government. San Franciscans are great They marched through the

Brazil deadlock stirs military unease

From Patrick Knight, São Paulo

Politicians are becoming increasingly concerned about the possibility of the military attempting to impose another general as Brazil's next Presi-dent, as a way out of the present deadlock. This is because the candidate that the clique of entrenched generals would like to see take over in March next year, retired Colonel Mário Andreazza, the Interior Minister, is unlikely to win.

Some of the military would be prepared to accept the former Governor of São Paulo, Senhor Paulo Mainf, as the next President, despite the risks attaching to his widespread unpopularity. But there is strong resistance by the military to seeing Senhor Tancredo Neves, the Governor of Minas Gerais and the opposition Brazilian Democratic Movement Party (PMDB) candidate, in the presidential seat. His

electoral victory now seems increasingly likely.

Governor Tancredo Neves has warned the voters of the danger of a "return of revolutionary process" in a reference to the past 20 years of military rule. He urges his countrymen to be "ready for the worst".

The ruling Social Democratic Party (PDS) is split into three distinct factions and at this stage none is in a position to secure victory alone, yet none will give way to another.

A weighty group of PDS rebels, led by vice-president Aureliano Chaves, now seems prepared to back Senhor Neves, expecting to be rewarded with the vice-presidency in his

Europe and a hungry world: 2

Question of quality rather than quantity

at a frightening rate. Develop-ing countries are the hardest hit and the problem is worst in

Africa. According to the Food and Agriculture Organization, there are 26 African countries seriously affected by food hardship. With the desert pushing back the green line of vegetation at speeds of up to a mile a week. There is less and less land to feed a population which will have at least doubled by the end of the century.

In India, where some 340 million out of 700 million people are below the poverty e, less than 15 per cent of children under five are esti-mated to be "in a normal state of nutrition". Nearly 45 per cent of all deaths in India are among children under four.

only about 2 per cent of its £16,000m budget goes on food Under present programmes, just one sack of wheat in every 40 grown is sent to feed the hungry. Only 150,000 tonnes of skimmed milk powder and 45,000 tonnes of butter oil are earmarked for aid. They make

Despite its huge surpluses,

the European Community is still not obviously generous and

In Murray, Brussels correspondent, concludes his two-part examination of why Europe's food surpluses are not helping to solve the problem of world hunger. scarcely any impression on the mountains of surplus produce. However, the sad fact is that more generous policy would do no more than feed the wrong

food to too few people to make

much difference in the short In the long term it would make the whole problem infinitely worse. It would also be expensive, difficult if not impossible to administer, and could, at the worst, start

damaging trade wars.

The EEC, which originally went into the food aid business because it wanted another market for its surpluses, has now swung round to the view that giving or selling cut-price nourishment to the hungry does more harm than good.

Although it is ready to send emergency aid anywhere, it would like to phase out regular food aid and replace it with cash to launch schemes to promote agriculture in the barren lands where hunger is

Interference in local agricul-

major disruptive factor in food supplies. The white planters in Kenya, for example, took over large tracts of the best land for growing such crops as tea and In West Africa, French rubber and cotton plantations destroyed the traditional food

crops of millet and sorghum and the local people were fed instead on rice from Indo-China. For all that they may be unsuitable, the EEC food mountains are, understandably, mouth-watering for negotiators from starving countries. In the present talks for a new Lome

Convention, the EEC has been under pressure to negotiste long-term contracts for fixed quantities of surplus products at preferential prices.

It is an idea which is certainly strongly favoured by France, which sees this as one way of ensuring the income of at least some of its farmers for

as long as the contracts can be

negotiated.

Some such deal is on offer to ture in colonial days has been a the Lomé countries, but it

will run foul of Gatt (General Agreement on Tariffs and Trade) rales if accepted. The EEC will argue that it falls outside Gatt rules because it is part of the campaign against world hunger-

The fact that such a scheme would last for many years is part of the proof that it does not really solve the problem of hanger in the world. All food-surplus aid can do is provide some kind of holding operation until such time as the developing countries can produce enough food themselves. Thus it is in this area that

the EEC believes it could ultimately be more helpful by providing money and technical help rather than food. But any scheme which improves production for the hungry, by the hungry, among the hungry, will, by definition, reduce the market for EEC

The only long-term effect of the food mountains is to push down world prices even farther, so increasing the cost of the common agricultural policy and making the Community finan-cially less able than ever to help to fight world hunger. Concluded

Pleasures of the flesh

Boucher Manchester City Art Gallery

Manchester's opulently redecorated City Art Gallery is an appropriately grand setting for this graceful exhibition, which this graceful exhibition, which runs until September 1. It consists of paintings, drawings and prints, principally drawn from the holdings of the Nationalmuseum, Stockholm, which has lent them in return for the loan of a collection of Turners from Manchester. The Turners from Manchester. The Boucher show also provides a fitting climax to Timothy Clifford's directorship, whose reverberations throughout the museum world have caused

light.
There is no horror in the There is no horror in the exhibition, although the early View of Tivoli with the Temple of Vesta is mildly "horrid" in the 18th-century sense of the word, but there is certainly much to delight. The voluptuous nudes may offend the puritans and enrage the militant feminists, but their freshness and what can only be described and what can only be described as innocence ultimately disarm criticism. Boucher paints naked female flesh with the same respectful care with which he

simultaneous horror and de-

François Boucher's

works displayed underlines the importance of one of art history's favourite values, that of provenance, since almost everything on the walls at Manchester was bought directly from the artist, mainly by Count Carl Gustav Tessin, who was Sweden's Ambassador Extraordinary to the French Court. When he was buying for himself, he indulged in his taste for the female nude, but when he was acting for the young Crown Princess the emphasis was rather different. Louisa Ulrica, sister of Frederick the Great and the formidable Wilhelmina, Margravine of Bayreuth, knew precisely what she wanted in most things, and her instructions to Tessin for a group of four pictures to be ordered from Boucher are uncompromising, making it clear that she preferred the figures to be clothed, and in

contemporary dress. Unfortunately only one of these "Four Times of Day" was completed, usually called La Marchande des Modes (The Milliner), whereas it is in fact Le Main (Morning). It is one of Boucher's most beautiful works and a rare depiction of a Parisian lady's boudoir in 1746,

so elegantly enhance the human forms or the ravishing arcadian landscapes that are so often their setting.

The superb quality of the comfort and refinement of the

Such small, intimate rooms were the perfect setting for framed drawings and prints although these were often kept in folders, partly to protect them from light and dirt, but also because looking at them was a civilized pastime to be indulged at leisure. Tessin collected Boucher's drawings with enthusiasm and discrimination: several studies for figures in the magnificent edition of Molière's works that he illustrated in 1734 are exhibited.

Such juxtapositions encourage the visitor to compare this

distinguished artist in the wide range of media that he essayed and helped to compensate for the somewhat unfortunate lay-out of the exhibition in two rooms separated by a gallery full of Manchester's tremendous Pre-Raphaelite pictures. It is a tribute to the quality of the exhibition that it survives the juxtaposition, although it is partly thanks to a display of decorative arts, principally porcelain, which cleverly lowers the eye-level and that links the two parts. Altogether a triumph

Losing sight of the world

suggesting that the infant is nothing like "us" or, rather, that

Last night's documentary oncerned the work of Tom Bower, a child psychologist who has opposed two dominant theories of infantile perception - one which suggests that babies are adults in miniature form, and the other which believes their knowledge to be composed of fragmented bundles. No living infant seems to fit those theories, according to Professor Bower, although his own de-cision to treat babies as "the subject of a scientific study" suggests that his own conclusions may be just as sweep-

Professor Bower's thesis, if I understand it (and a half-hour programme is not the ideal medium for its expression), is based on his belief that small infants are capable of a more

(BBC 2) abstract and formal kind of opened with images of a baby seeing the world for the first time and asked the leading ible, for example, that they can appear to the companion "Danada asked the leading ible, for example, that they can time and asked the leading puestion, "Does the baby see things as we see them?" - thus suggesting that the infant is suggesting that they can understand quite complex particular the infant is suggesting that they can understand quite complex particular the infant is suggesting that they can understand quite complex particular the infant is suggesting that the infant is suggesting the infa least because it dealt with what we have all lost contact with that self which we once problems as self-perception and gender identification.

It seems also that babies have problems with objects: when a a room, does the baby know that it is the same mother? This is a variant on an epistemological problem which has been discussed by philosophers for centuries and, although it would be rashly sentimental to sup-pose that the observation of children may help to resolve it, its appearance in the nursery does at least suggest that such questions are not simply hypothetical ones and may be stimulated by infantile anxieties which most of us have forgotten. As professor Bower said at one point. "The more we find out about this world, the more we find out what we have lost".

Los Angeles has found what it loves most: stars. Paul Griffiths reports on Royal Opera's fortnight season there

Evenings to remember right through the razzmatazz

For Covent Garden read Hope at First Street. After showing off their new Turandot, about which I wrote last week, the Royal Opera are continuing their fortnight's season in Los Angeles with a repertory that also includes The Magic Flute and the much travelled Peter Grimes. The choice is sound. What is strange is the venue.

Since the New York City Opera stopped coming here a couple of years ago. Los Angeles has been starved of opera-remaining buffs have had to make the trip up the coast to San Francisco or down to San Diego. So the arrival of the Royal Opera was like water in the desert: quaffed enthusiastically - except, of course, by the great number of Southern Californians who had no idea they were thirsty. Visitors from other American cities were genteelly appalled to find seats unsold for the opening night of Grimes, an opera not professionally staged in Los Angeles since 1949. However, that is likely to change. The local press, while oddly pleased to find some of the character performances "meek", has declared a triumph, and Los Angeles has found what it most delights in: stars.

Apart from Gwyneth Jones, generally billed as the com-pany's "leading lady" on account of her Turandot, it has been Jon Vickers and Thomas anxious to please Keene, Kim familiar performances from Allen who have scored the Begley's prim Rector, and of home, but there was a new

greatest personal success. Mr Vickers, though he may regret it, claimed attention in advance by speaking loudly and largely to the L.A. Times of his dissatisfactions with the Metropolitan Opera, but what matters is the robust, raging performance he gave as Grimes.

The interpretation is a familiar one, seen as recently as last March at home in Bow Street, but in the Dorothy Chandler Pavilion it was almost painfully intense, partly because the acoustic brings voices right up close, partly because Mr Vickers was more than ever a soul in tearing up out of him, or constrained to tragic whisper for the more poetic moments. At 57 he must be near the end of his days on Grimes's lonely sea, and there were not a few signs here that the strain is beginning to tell. But still it was good to hear him scotch rumours that Los Angeles would be seeing his farwell to the role.

The real farewells were to have been those of Sir Geraint Evans, but as he was too unwell Stewart's growling Balstrode, not unsuitably a Yankee captain in the Borough and thereby as isolated as Grimes. Others to make an impression included Matthew Best's grave-voice Hobson, Thomas Allen's course Heather Harper's Ellen Orford, never more warm or more affecting, expecially in her blues number.

Possibly it was the fact of being in the United States that sharpened the American features of the score: Sir Colin Davis approached the Bernstein manner in his brass-blown handling of the passacaglia, which nevertheless took its place aptly in an orchestral performance that ebbed and flowed with close dramatic awareness. As the programme book reminded us, Peter Grimes started out in Los Angeles, since was in a Santa Monica bookshop that Britten picked up his copy of Crabbe. That brought on his longing for home; his opera, though, has settled down quite satisfactorily by the Pacific.

It was nice to hear an audience surprised by Grimes. and good to hear them too the next night delighted by a Zauberflote that had been quite to the pantomime aspect of the to travel we heard Thomas opera but there was seriousness Stewart's growling Balstrode, too. Robert Lloyd was on hand for this peerless Sarastro; Stuart Burrows was in excellent voice for a charming Tamino; and Helen Donath provided a very beautiful and sympathetic Pamina. Again these were

Thomas Allen's Papageno: singing like an artist

Queen of the Night in Ulrike Steinsky, sounding inappro-priately girlish in her first aria, but offering more fullness in her clarity and precision by the second act. Mention of the supporting cast must include James King, in stalwart form as the definitive First Armed Man. This was festival casting indeed. The night belonged, though,

to Thomas Allen's Papageno, so disarmingly and indubitably naive in action that he can stay in character while singing like an artist. It belonged also to Sir Colin Davis. For him the schedule has been hugely demanding with all the business of preparing new pro-duction while also shaping two revivals for a total of 11 performances in two weeks. But he has given Los Angeles evenings that will surely be remembered right through the razzmatazz.

A fine legacy for St Louis

there are few more pleasant places in the United States then the gardens of the Loretto-Hilton Center, home of the St Louis Opera Theatre's summer festival. It is a setting that predisposes one to enjoy opera and, though this year has not touched the heights of the 1982 Cosi or the 1983 Beatrice and Benedict, there is still much to enjoy. Now in their ninth season, the company show every sign of maintaining their reputation for imaginative reputation for imaginative Zinman. However, there was a choice of repertory, interesting productions and a regular supply of really talented young other of the outstanding black

Two operas were both firsts for St Louis and in the case of the Vienna version of Gluck's Orfeo, Andrew Porter suggests, amazingly, a first for the USA. With typical imaginativeness, the 84-year-old sculptor Louise Nevelson was commissioned to design the sets and costumes, her first work for the theatre, her first work for the theatre. Predictably the set was hugely impressive, a great black and gold wall in panels of abstract chough constructed to win a shapes, a shiny floor, a spiky lasting place in the Britten throne and a skeletal gold tomb canon. But what is indisputable for Euridice. It looked best is how much it gains by being when the stage was sparsely performed by American singers, populated, for her costumes There were none of the were much less successful, embarrassingly phony accents ranging from black and white that marred the original BBC

On a hot summer night with the Le Rossignol, to red and green burgh in 1976. This big Greek draperies and a deal too company, especially the outmuch lurex and chiffon.

My enjoyment was also diminished by the director Lou Galterio's decision to use the Dance Company of Elisa Monte and to double each principal role by both dancer and singer. Though the opera was presented in one continuous act, with only the flute dance interpolated from the Paris_version, there was disappointing lack of dramatic tension, notably in the orchestral playing under David mezzos that America keeps producing. Despite this fine performance and Nevelson's setting, I kept on recalling the much greater power of Peter Hall's Glyndebourne production of two seasons back.

The undoubted hit of the festival was the first fully professional production in the enough constructed to win a ranging from black and white that marred the original BBC cloaks for the Furies, remi-broadcast or the English Music niscent of Matisse's designs for Theatre production at Alde-

standing chorus, went to work as if Bunyan were a cross between Oklahoma and The Wizard of Oz, in a production by Colin Graham that used every theatrical device and every shade in the colour-charts plus a few besides. John Wright Stevens designed a forest of technicolor drapery for the Chorus of Trees, each of which fell away to reveal a symbol of the growing America: Indian totem, telegraph pole, classical column or oil rig, it was both ingenious and entertaining. The conductor. Bruce Ferden, kept it moving at a cracking pace and the sense of enthusiasm spilled over to infect the audience.

The surprise news of the season is the eventual with-drawal of Opera Theatre's general director, Richard Gad-des, who is handing over to a new team, with his present associate Colin Graham, the newly appointed music director, John Nelson, and Charles Mackay from Spoleto as execu-

Popular Spanish Songs by de Falla. Both were ideal choices for the weight and colour of her voice. In the Schumann her fresh, deft, always charming turning of each word and phrase revealed this time also a ringing, powerful top register and a quality of still, rapt imagining in the smaller scale of songs like Auf einer Burg. The de Falla was a particularly bappy choice; these oblique miniatures with their distinctive vocal inflec-

child can receive now is for you to turn the page.

The damage has been done and what this child needs now is help. Like 43,000 children this year, she's relied on the NSPCC for that help. Now, in turn, we're looking to you.

As an independent organisation, the NSPCC relies mainly on public donations.

Even if you can afford just 10p, you'll be paying for one of the 7,000 or more phone calls we have to make every day of the year (weekends and Bank Holidays included).

If you send a larger donation you'll be helping us

to set up one of our first child protection teams to provide 24 hour assistance to abused children and

Whatever you send it'll be used immediately to help children. Helping to stem the flood of serious cases which we have to deal with every day. The NSPCC has been in existence for 100 years, during which time it's helped 9 million children.

To continue providing that help, we need you to send us a donation.

And thank you for not turning over.

-Breach of natural justice in GCHQ unions ban

Regina v Secretary of State for pur the Foreign and Commonwealth office and Another, Ex parte 22, con Council of Civil Service Unions and Others Before Mr Justice Glidewell

[Judgment delivered July 16] There was no reason in logic or principle why the exercise by a minister of a power conferred by an Order in Council should not be to the same scrutiny and control by the courts as would be appropriate to the exercise of the power if it had been granted by

The Crown did have power to vary at will the terms and conditions of service of civil servants by the exercise of the Royal Prerogative, as embodied in the Order in Council of July 22, 1920.
Since the Crown had the power to dismiss at will, unless statute provided otherwise, an invitation to a civil servant to agree to new terms and conditions of service excluding

trade union membership was not secured by duress and was supported by the consideration of the offer of continued employment. There was no basis in concluding that her Majesty's Government had adopted a wrong interpretation of conventions 87, 98 and 151 of the international Labour Conference, and thus the Minister for the Civil Service (the Prime Minister) did not act under a misdirection so as to

invalidate the decision reached. Instructions given orally on December 22, 1983 by the Minister for the Civil Service did provide for the conditions of service of staff at GCHQ and were properly given under article 4 of the Civil Service Order in Council 1982

Order in Council 1982.
When a minister was contemplating making a decision that involved the withdrawal of rights relating to membership of trade mions and the right not to be unfairly dismissed, the rules of natural involve required. the rules of natural justice required that the decision should not be reached until consultation had taken place with the staff or their representatives of the various

Mr Instice Glidewell so beld in a reserved judgment in the Queen's Bench Division on July 16 granting a declaration that the instruction purportenty issued by the Minister for the Civil Service on December 22, 1983 that the terms and conditions of service of civil servants serving at GCHQ should be revised so as to exclude membership of any trade union other than a decorption of the service of the civil service of t other than a departmental staff association approved by the director of GCHQ was invalid and of no

Mr Louis Blom-Cooper, QC, Mr Richard Drabble and Mr Patrick Elias for the applicants; Mr Simon D. Brown and Mr John Mummery for the Foreign Secretary and the Minister for the Civil Service.

MR JUSTICE GLIDEWELL said that the first acknowledgment of the existence of GCHQ (the Government Communications Headquarters) was in an answer by the Prime Minister on May 12, 1983 to

a parliamentary question.
The functions of GCHQ were to ensure the security of the UK military and official communications and to provide signals intelligence for Government; the main establishment was at Cheltenham where over 4,000 people were

employed.
On January 25, 1984, the Foreign Secretary announced in the House of Commons that the Government had decided to introduce with immediate effect measures to remove from persons employed at GCHQ the right to be members of a trade union and various rights under the Employment Protection

The formal steps taken were the publication of a general notice containing alterations in the conditions of service of GCHQ staff and two certificates signed by the Foreign Secretary exempting employment at GCHQ from section 121 of the Employment Protection Act 1975 and section 138 of the Employment Protection (Consoli-dation) Act 1978.

In theory, all civil servants were members of the Sovereign's personal staff, their terms and conditions of employment governed by the Royal Prerogative. Since 1969, those prerogative powers were vested in the Minister for the Civil Service.

trade union, could not be legally dismissed because of such membership and was entitled to make a complaint of unfair dismissal to an dismissed. The consolidated code on pay and conditions encouraged servants to be members of

Mr Blom-Cooper submitted: (1) Since 1927 her Majesty and her ministers had no power, whether prerogative or at common law, to vary the terms and conditions of service so as to exclude membership

(2) There was a contractual obligation not to vary the terms and conditions of service of GCHQ staff so as to exclude trade union

membership.

(3) In purporting to withdraw that right, the Government was in breach of convention 87 of the International Labour Conference,

(4) The Minister for the Civil Service's direction of December 22, 1983 was not valid or effective under article 4 of the Civil Service Order in Coupcil 1987 Order in Council 1982.

(5) The making of the direction and the issue of the two certificates were invalid because of lack of prior consultation with the unions dering the court's juris-

diction, his Lordship said that he was concerned with the jurisdiction

of the courts not in relation to the

whole field of the Royal Prerogative

but in its application to powers ranted to a minister by an Order in council. Council.

The exercise by the minister of her power under article 4 of the 1982 Order in Council was subject to scrutiny and courtol by the High Court on the principles normally applicable to the exercise of technique, power, and the making staintory powers, and the making under those powers of decisions which affected the rights of the

His Lordship said that from the uthorites when the prior existence

of a prerogative power was established, it could only be superceded by statute by a clear and nbiguous provision in the

particular statute.

A statute might by clear words abridge or restrict prerogative power, and to that extent the ogative power could not be used hile the statute remained in force.
If a statute so restrictive of the ative power was later reiled, the prerogative power would apparently recentrge as it existed before the statute. The statute did not necessarily suspend the prerogative unless there were words in the repealing statute which made it clear

that the prerogative power was not intended by Parliament to be Therefore, section 5 of the Trade Disputes and Trade Unions Act 1927 required the power under the Order in Council of July 1920, which embodied the Royal Prerogative relating to the engagement and control of the terms of service of civil servants, to make regulations to be exercised in a particular way but did not otherwise restrict or

supersede that power. 1927 Act by the Trade Disputes and Trade Unions Act 1946 and section 38(2) of the Interpretation Act 1889 was that the prerogative powers in the Order in Council of 1920 were from 1946 onwards as unrestricted as they were before the 1927 Act. His Lordship agreed that the established cases showed that the

engagement of a civil servant could be terminated by the Crown at will, unless statutory authority prevented it. The Government's intention was it. The Government's intention was that any person employed at GCHQ who was unwilling to accept a term that he no longer could belong to a trade union, and who was mwilling to move to work elsewhere, would be dismissed by giving him appropriate notice.

appropriate notice.

As to the question of the interaction of the conventions of the International Labour Conference,

tation of them could not be shown to be wrong.

The general instruction or december 22, 1983, given by the Prime Minister accorded with article 4 of the 1982 Order in Council which provided: (a) The Minister for the Civil Service may from time to time. give instruc-tions. (ii) for controlling the conduct of the Service and providing for ... the conditions of service of (all persons employed

On the question of prior consultation before the change in the rights of the staff at GCHQ were obviously of the greatest importance to them. The staff clearly had a legitimate expectation that they or their unions would be consulted before any decision was made to withdraw those rights.

As part of the code of the Civil Service pay and conditions, the Government promised to consult about any change of substance in the terms and conditions of service. Of course, ministers would be entirely within their powers in ruling that certain issues could not be the subject of discussion because of the national interest and security siderations. Nor would such consultation be so limited as to be ineffective and futile.

ineffective and futile.

Although it was submitted that the court should not exercise its discretion to grant relief since everything that could have been said had been said since January 1984, since the applicants did not seek any relief in respect of the two certificates which therefore received in fewer the court could not mained in force, the court ought not to refuse to make a declaration.

It might be that an instruction would be validly given under article 4 of the Order in Council of 1982 which was to the same effect as the direction of December 22, 1983. Solicitors: Lawford & Co; Treasury Solicitor.

Wife loses share of home

Hegerty and Another Before Lord Justice Steph Lord Justice O'Connor and Sir Denys Buckley

Caring for injured plaintiff at home

Rialas v Mitchell

Before Lord Justice Stephenson, Lord Justice O'Connor and Sir Denys Buckley [Judgment delivered July 6]

Provided that it was reasonable for a severely injured plaintiff to be cared for in his family home, a defendant responsible for the plaintiff's injuries was liable in damages for the reasonable cost of caring for him there, albeit that the laintiff could be cared for ibstantially cheaper in a private

In such cases the burden was on the plaintiff to prove that it was reasonable for him to be cared for at

home.

The Court of Appeal so held, dismissing an appeal by the defendant, Dennis Henry Charles Mitchell, against the order of Mr Justice Forbes dated November 11, 1982, awarding the infant plaintiff. Neoclis Rialas, £350,965 damages for personal injuries, of which £150,552 represented the cost of future nursing care and physiotherapy in the plaintiff's home.

Mr Nigel Fricker, QC and Mr Timothy Clayson for the defendant; Mr Graeme Hamilton, QC and Mr David Tucker for the plaintiff.

David Tucker for the plaintiff. LORD JUSTICE O'CONNOR said that on April 27, 1977, the plaintiff, then aged six and a half, was crossing the road when he was struck by a van driven by the defendant. Liability for the accident was admitted and the only issue was the quantum of damages.

The plaintiff sustained severe

brain damage resulting in spastic quadriplegia. He was totally depen-dent on others and had to be looked

after day and night.

Having found that the plaintiff was likely to live until the age of 45, the trial judge, in calculating the cost of the plaintiff's future nursing care, used a multiplier of 14.

The total damages awarded represented: (1) £50,000 general damages for pain, suffering and loss of amenity; (2) £27,588 for the parents loss of earnings to the date of trial; (3) £2.680 other expenses to date of trial; (4) £20,000 for the purchase of a suitable house to accommodate the plaintiff and his family; (5) £26,645 for alterations to the house; (6) £26,500 technical aids; (7) £42,000 for the plaintiff's aids; (7) £42,000 for the plaintiff's future loss of earnings; (8) £143,552 future nursing care and attention; (9) £7,000 future cost of physiotherapy; and (10) £5,000 fees for the management of the damages fund by the Court of Protection.

The main ground of appeal related to items 4, 5, 6, 8 and 9 but items 1 and 10 were also challenged.

items 1 and 10 were also challenged.

Mr Fricker pointed out that of the total damages, no less than £253,000 was referable to caring for the infant

There was evidence before the trial judge that two private institutions had homes which could accommodate and care for the plaintiff at maximum costs, using the multipliet of 14, of £148,500 and £127,400 respectively. The average costs were £100,400 and £92,900

respectively.

Relying on Cunningham v
Harrison ([1973]) QB 942), Mr
Fricker submitted that it was
unreasonable to compensate the
plaintiff to enable him to be cared
for at home. It was submitted that
the fact that damages in personal
injury cases would almost invariably be met by insurers had led
the conrect to socient as reasonable. the courts to accept as reasonable, expenditure on the care of severely injured plaintiffs which would

any proposed provisions, a require-ment that they ought not to exceed what a person of average wealth would provide for himself or his

But Cunningham v Harrison could not be regarded as authority for that proposition and his Lordship was quite upprepared to introduce such a consideration into the assessment of those heads of

His Lordship accepted Mr Fricker's submission that the plaintiff was entitled to what was reasonably necessary to alleviate his injury and diminish his disability, though not to the best possible facilities.

that while the infant plaintiff's particular needs and situation were the principal factors in determining what was reasonably necessary for him, the court ought also to consider the cost of alternative facilities for his care; that if one alternative was much less expensive than another and the plaintif could be cared for menerals in the less. be cared for properly in the less expensive alternative, then, unless special circumstances made it unreasonable, he ought to recover only the cost of the less expensive only the cost of the less expensive alternative; and that where the cost of future care was being assessed, the court ought to take an objective view of what was reasonable and consider all the factors, not only the plaintiff's preference.

His Lordship could not accept those propositions. The starting point was that a healthy uninjured child aged six years was living with his parents at home when he sustained the injury which reduced sustained the injury which reduced him to his present state; he was in hospital for a year and then returned home where he was cared for by his family for four and a half years. The court was then being asked to say that it was unreasonable for the plaintiff, aged 12, to go on living at home and that he had to live in an institution because it was unreasonable.

There might be cases where it would be right to conclude that it was unreasonable for a plaintiff to insist on being cared for at home, but the present case was not one. Once it had been concluded that it was reasonable for the plaintiff to remain at home, as the judge had found, his Lordship could find no acceptable ground for saying that the defendant should not pay the reasonable cost of caring for him

plaintiff at home was substantially greater than the cost of caring for him in an institution, the burden of proving that it was reasonable for him to be cared for at home was on

His Lordship did not consider that any overlap was established between the damages for loss of amenity and those for technical aids, and the defendant's appeal on that ground failed.

Finally, the defendant appealed against then £5,000 awarded for the fees of the Court of Protection in managing the damages fund. That was a loss which flowed directly from the plaintiff's injury and was recoverable from the defendant.

BUT ETHERECETERETTADEMAKOF INTERCATENAY KISETES MACINES

SPECTRUM

Forty years ago on Friday, a group of Adolf Hitler's general staff failed in their attempt to kill the Führer with a bomb. As West Germany prepares to honour the men whose actions helped give a nation selfrespect, new evidence suggests opposition to the Nazis was greater than realized

Honour for Germany's martyrs

in the presence of Count Claus von Stauffenberg's widow, paid solemn tribute at the Christian Democrats Congress in May to the conspirators he led against Hitler, he voiced a sentiment that has been heard increasingly as the fortieth anniversary of the July 20 bomb plot ap-

honour redeemed by their bravery and the roots of democracy planted, but German resistance to dictatorship was more widespread and resolute than history has since

The Chancellor's tribute came before the D-Day anniversary celebrations in Normandy. But West Germany's painful mixture of embarrassment and vexation at being excluded from this triumph of the victors has only added to the political and emotional significance of nationwide remembrance of this single real uprising against

Both Christian Democrats and Social Democrats have recalled the opposition of their parties to the Third Reich and the sufferings of those who dared stand up to the Nazis.

It was in the Wolfs Lair, a fortified community in the Mazurian Lake district of what used to be East Prussia and is now nothern Poland, that the wouldbe assassins hoped to end Hitler's reign with a time-bomb hidden in Count von Stauffenberg's attaché case.

Although the July 20 conspirators have traditionally been held to have come only from a narrow military-conservative clite, the anniversary

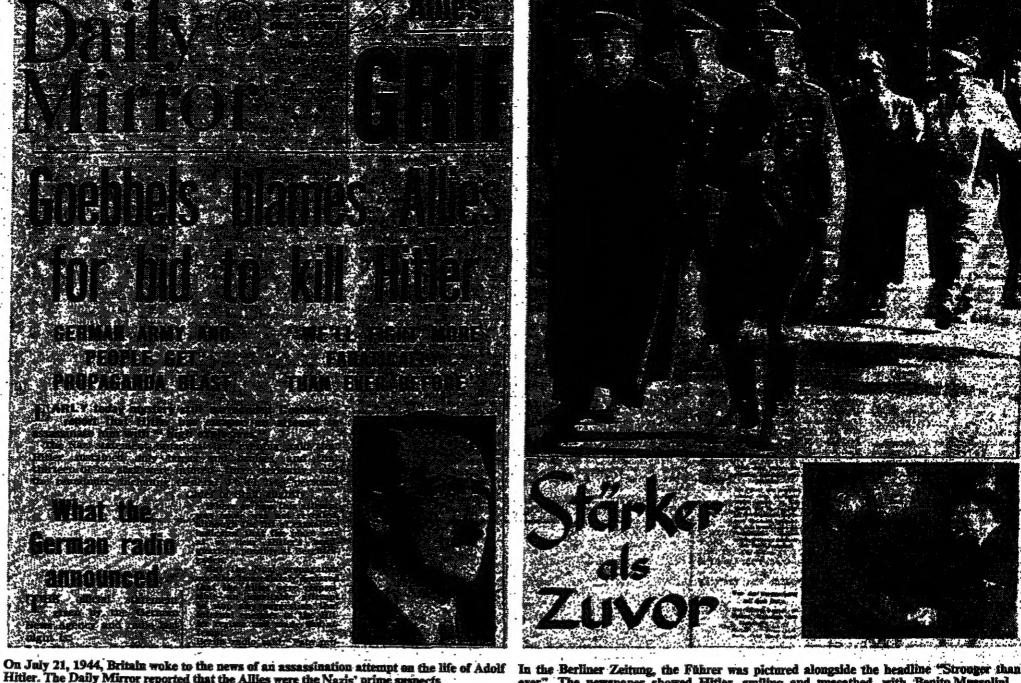

is being used to examine not only the real extent of oppo-sition to Nazism, but the attitudes of today's generation to dictatorship, the rule of law

and active resistance. Not unexpectedly, these attitudes have changed as younger generations have become more distant from the terror of of the values and beliefs of their

How many people really did oppose Hitler? The question has become increasingly important over the past five years as the outpouring, after a generation of traumatic silence, of memories. Discussing and teaching of the Nazi past has raised issues of guilt and responsibility that Germany has had to confront

On the one hand, the younger generation has exaggerated the support for Hitler of his elders as a facile argument for radical politics today or as justification for fighting established social values. On the other hand, films and books about the resistance and lavish politically appropriate homage to Nazi opponents have sometimes led to the impression that almost every decent German was active in resisting the Nazis one way or

Distinguished historian Professor Hans Mommsen with about 75 fellow historians, eyewitnesses and resistance workers from Germany, West-ern Europe and North America, recently attempted a balanced assessment, at a five-day conference in Berlin earlier this month. It yielded some startling and paradoxical results. Opposition to the Nazis was

Hitler. The Daily Mirror reported that the Allies were the Nazis' prime suspects

much more widespread in the churches, trade unions, working class areas, armed forces and among the conservatives than generally supposed and, at the same time, much less effective because of the hopelessness in the face of the Nazis' overwhelming monopoly of power.

It is the many modest attempts by ordinary people to stand up to the daily excesses of the Nazis that have been overlooked (they have been revealingly documented in a series of booklets put out by the Stauffenberg Memorial Centre in Berlin, set up in 1968 in the former Bendler Barracks where the count and several fellow conspirators were summarily shot after the failure of the plot). The conference highlighted some of the dilemmas. The Roman Catholic Church, for

political framework while finding itself drawn inevitably into a struggle for human rights.

The left was isolated and divided after making the early mistake of using only "legal" means to oppose the Nazis and only later set up an underground cell structure. As for the conservative

opposition, historians pointed out they were far from accepting a new and diminished role for Germany. Although appelled by the brutality and arbitrariless of dictatorship, they still pe-lieved in German hegemony in Eastern Europe and did not all reject the fruits of war.

They and many other op-ponents of Hitler were also wilfully blind to the persecution of the Jews.

What is today's assessment of

ure was probably inevitable, historians conclude, for there was no mass movement to build on, as Professor Richard Lowenthal has pointed out,

While only a minority of Germans were Nazis, an even smaller number were convinced anti-Nazis. But all agree the motivations of the German resistance were of the highest.

"The world should never forget what people risked and what they and their families Deutsch of Harvard University said. The major motive was emotional and moral; people found tyranny unacceptable. They used military argument

to convince others who were morally predisposed to accept them, and conversion was gradual. What counts is not how they showed their conversion example, strove to protect its the July 20 conspirators? Fail- but that they were converted.

> The Wolfs Lair, where the plot to kill Hitler came s close to success, is nowadays a sea of concrete. When the us moved into East etachments of Germans blew up most of the bunkers with dreds of thousands of tons of

Hitler's bunker, the tougher of all, still retains its essential structure. To enter it (strictly forbidden by the Polish guides) is to enter the ante-chamber of a pyramid: pungent encased air hits the visitor, the corridors

After the coup attempt, Hitler moved into a 130 sq yd chamber in the bunker: stone floors, a bed, a desk and two chairs. All that has now disappeared, the two floors of the bunker having lapsed on each other. Everybody who was anybody

THE TIMES DIARY

Budget-price master

After years of protracted negotiations with France, Lord Gowrie. the Arts Minister, has pulled off a personal coup in securing for Britain a work by David to hang in the National Gallery. The deal, struck after the personal intervention of President Mitterrand, was disclosed exclusively to PHS; an official announcement is expected from the National Gallery tomorrow. The portrait, of which I offer readers a glimpse, taken from Antoine Schnapper's biography, is of Monsieur Blauw, a Batavian minister, painted in 1795. When I broke the news to Professor Anita Brookner of the Courtauld Institute, she said: "I

never thought France would part with it. It is priceless - a pearl. So the Getty Museum can't get everything." The deal could lead to Britain issuing an export licence for a major work, possibly a Stubbs, to

go to France in return. Lord Gowrie's success is not unconnected, I suspect, with a key negotiator, Roland Dumas, France's Minister for Europe. Dumas was formerly the lawyer to the Picasso and Giacometti estates and, by coincidence, dealt in the 1970s with Lord Gowrie, then a Bond Street art dealer. Lord Gowrie tells me Dumas said: "You get Mrs Thatcher to settle the budget, and I'll give you the David." French bumour, you

False scent

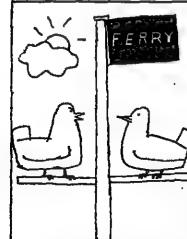

The hunt is on at Horse and Hound magazine to unearth the employee who sent a mailshot last week offering a "personal" 10 per cent discount to the hunstman's bête noire, the League Against Cruel Sports Delighted, the League swiftly submitted an ad inviting H & H readers to join. The expected telephone call came two days later, apologizing for an "embarrassing mistake" and saying the ad could, of course, never be used.

 Who needs the Queen and her Honours List when you have the Italians? An auction of autographs held at Christie's in Rome last the signatures of Lady Margaret Thatcher, Sir Anthony Wedgwood Benn and Sir Kenneth Livingstone. Sir Ken should not get ideas; his mark fetched about a pound.

Larkin's fillip

Philip Larkin is a short nose shead in the Poet Laureate stakes. His is the only name. I am told, proposed by the Arts Council, one of the three bodies known to have been can-vassed by No 10. Of the other two, the Poetry Society has submitted an "orthodox" list of three or four, while the Society of Authors has suggested none. "We are concerned to screw more money out of publishers", said its general sec-retary, Mark Le Fanu, "we don't put forward writers for honours".

BARRY FANTONI

"Summer holidays must have begun: we haven't moved for days'

Major minimus

A sigh of relief can be heard at the Honourable Company of Edinburgh Golfers where the "Martinet of Muirfield," Captain Paddy Hanmer. has been replaced as secretary by the Woosterish Major Gordon Vanreenan. Hanmer, who retired after 15 years last November, was hauled back in March after the new secretary. Major Colin Innes, was sacked by stalwarts for his "revolutionary" proposals - to instal central heating and a new telephone system. Though disarming members with his Wooster persona, I am told that Vanreenan is finding Hanmer a hard act to follow. Hanmer, who once told the frolicking Ben Crenshaw and Tom Watson "to get the hell off my course," was feared by even the oldest Muirfield guard for his positive vetting: "School?" "Gordonstoun." "College?" - "Trin-ity." "Regiment?" - "Coldstream 'Decorations?" - "VC. MC." "Handicap!" - "Scratch."
"Give him nine holes."

George Walden on the rehabilitation of Vyacheslav Molotov

Cocktail with a bitter aftertaste

Moseow, the political resuscitation of Molotov might easily be over-looked. "Mr Nyet", now 94, is sometimes seen almost affectionately as the West's old sparring atety as the West's old sparring partner. The reality is much nastier, and more worrying. Molotov was a major proponent of the Cold War a symbol of death's-head diplomacy. Even Khrushchev once accused him of being a "saboteur of peace". Worse still, his record in Stalin's purges makes him one of the most wretched remnants of an appalling

Until recently, the Russians were rehabilitating victims of the purges; now they are rehabilitating the executioners. Is Molotov's readmission to the party a minor, essentially internal manoeuvre, or a sinister portent for the Russians themselves, and for the West? Are there echoes of Molotov in Mr Gromyko's current diplomatic style? Improbably, Molotov – real name, Skryabin – was related to the

composer, though he seems to have been born with a dirge rather than with music in his soul. Since he joined the party in 1906, he was an efficient, painstaking bureaucrat, whose capacity for deskwork earned him the inelegant sobriquet "Stony-arse", and at 21 was the youngest candidate member of the Politburo. His involvement in the forced collectivism of the early 1930s, and especially in the Ukraine where millions died of starvation, was useful preparation for his role in the 1937-8 purges, when he helped Stalin, Yezhov and Beria to liquidate all but five of his 25 fellow members of the People's Council of Commissars. The title of one of his speeches at the time—The Lessons of the Sabotage, Wrecking and Espionage Activities of the Japanese-German-Trotskyist Agents" gives the tone. But it was not all talk: Molotov was actively involved in dealing out death to his comrades and colleagues. According to Roy Medvedev's All Stalin's Men, he had a particularly repellent habit of adding obscene abuse, as well as his signature, against the names on

Stalin's death lists, Here at least the abominable No-man became an

enthusiastic Yes-man. In fact Molotov's career can be raced in his signatures. He was enthusiastic, too, about a deal with Nazi Germany, and promoted as well as signed the pact with you Ribbentrop which bears his name. He negotiated the "agreements" which tied Eastern Europe to Moscow. The screen band that Moscow, The same hand that embroidered the death lists also signed the charter of the United Nations. Molotov's mark on history

was either malignant, or mocking. Quite logically, one of the first things that happened after he became foreign minister was that a

number of senior Soviet diplomats, at home and abroad, were put away. His own diplomatic style was predictably uncharming, and his cold goading infiniated Bevin. "I've had enough of this, I 'ave", the Foreign Secretary once exploded. Given the source, the cynicism of Molonov's remark "Eden is a Molotov's remark "Eden is a gentlemen, Bevin is not" is exquis-

Obviously he was Stalin's man. But Molotov was not just a functionary. He had his own views a vehement smalesm of nationalistic Slavophilism and bureaucratic communism - and his dealines with the West did much to dissipate postAfter an interlude during which Vyshinsky - whose record was as stained as Molotov's - took over. Soviet diplomacy, Molotov was back in 1953, though his heart was not noticeably in the "peace offensive" of the post-Stalin period. He believed that Russia had gone soft on the West, His disgrace under Khrushchev and appointment as ambassador to Mongolia effectively ended his career. ended his career.

All this, and presumably more, is known to the Soviet leadership. So why are they reinstating such a man? The traditionalist party apparatus
has never been happy with his
expulsion, and a biography of
Molotov, published in 1974, began
gently reprocessing him.
But what really matters for us is
the insensitivity of the Soviet move

the insensitivity of the Soviet move vis-à-vis, the West. Molotov's reemergence from well-earned obscur-ity is a baleful symbol of the state of the Kremlin's world view, but also of East-West relations more generally. Embattled by problems of their own devising, and bitter at President Reagan's attitudes, are the Russians returning to drink at the poisoned well of the party's past? Is the long shadow of the master of the definitive negative overtaking Mr Gromyko too?

None of this is a reason for renouncing the effort for a saner relationship with Moscow - in fact, rather the opposite. But it does remind us of what we are up against. The Soviet Union may be at a turning point between atavistic regression, and more rational atti-tudes at home and abroad, Our power to influence their choice is limited. Strictly speaking, neither Molotov nor Sakharov — whose uncivilized treatment Molotov would have heartily endorsed — are the West's affair. But whatever the proprieties, we should register our dismay at the behaviour of a country which honours an infamous relic of a calamitous past, while persecuting one of its noblest sons.

© Times Newspapers Limited, 1984 The author is Conservative MP for

Phillip Whitehead

Why Maxwell is more bad news

Somerfield's outburst from the editorial chair of the News of the World against the bid from "Mr Maxwell, formerly Jan Ludwig Hoch" for "a newspaper which I know is as British as roast beef and Yorkshire pudding". Maxwell, said the wags, would rename the seedy Sunday paper Nudie Pravo.

Sunday paper Nudie Pravo.

Both then and at the time of the 1971 Department of Industry enquiry, he was probably judged more harshly by both civil servants and the City than a more emollient figure from their own world would have been. It is ironic that he has now stormed Fleet Street thanks to the approval of the same institutions which once spurned him, and as the fuglemen of "this wonderful country and its people" (Sunday Mirror) and its "great qualities which we alone possess" (Daily Mirror). He is backing Britain, and its roast beef and Yorkshire pudding. He says he is also backing the "sensible left".

There is no point in taunting Maxwell. He has achieved an old ambition in the only way he knows how. He may be no worse than the handful of very rich men already in possession of 95 per cent of our national press. For those who believe that there are better ways to widen and diversify the ownership of the mass media, however, three things ought to be said. Perhaps they can be said more dispassionately since this is a proprietor who professes leftish sympathies, and seems to have been accepted on approval by the leader of the Labour

Party.

First, the circumstances of the deal were strameful. Second, all talk of "guarantees written on stone", to adapt a phrase of Mr Rupert Murdoch, as alleged by one of his ex-editors, are not worth the stone they are engraved on. Third, hope that Fleet Street might progress and move away from the domination of proprietors who treat their titles as a personal fieldom, in the way in which Clive Thornton wanted the Mirror Group to move, is clearly misplaced; reform will be external when it comes.

If I were Sir Alex Jarrett I would

not like to look in the Mirror. What is there to sey about a board which planned to float the Mirror Group today, with grandiose plans based on the attractions of the Reuters honeypot, but which simply panicked when that appeared to be less than full to the bring If Six Alexander. less than full to the brim. If Sir Alex Jarrett undertook not to sell to a single buyer, and was then confronted with pessimistic estimates of the flotation, in the City's present hysterical mood, why did he not go back to his employees and postpone the flotation?

The involvement of the workforce had been a special concern of Clive Thornton. It should have been drawn into ownership, and the bid from the employees to buy out the

It is over 15 years since Mr Stafford group revived. Sir Alex instead has Somerfield's outburst from the preferred to eat his own words, and wash them down with Maxwell's

If Reed International proved hopeless guarantors of the independence of the biggest newspaper publishing unit in Britain, what can we hope from Maxwell? He can hardly be blamed for grabbing it from their feeble grasp. He has told Reed - as if it cares - that he will maintain the existing political stance and editorial independence of the newspapers. He told the staff "there can only be one boss and that is

If his editors transgressed against if his editors transgressed against his Britain First policy they would soon find that the fion did not like it. The Daily Mirror had courageously fallen out of step with Fleet Street over the Falklands War, and was vilified by the jingo tabloids. Would it have that freedom of dissent under the Boss? No fancy phrases, or Office of Feir Trading inquiries can Office of Fair Trading inquiries, can guarantee that.

Four men of idiosyncratic views now control the totality of the tabloid press in Britain. That is how far concentration of ownership has far concentration of ownership has gone. The Mirror Group could have been something different, widening ownership in Fleet Street in the one area where the idea of diversity could have been sold to the hidebound and ultra-cautious institutional investors. Thanks to the supine and shiftless behaviour of Reed International, the opportunity has been lost. It may not recur in this generation. The City plainly does not see any kind of a problem.
There could be further concentrations yet, with the cavalier interpretation of the monopolies legislation which we have seen from this Government, and the City would not blink. Other counterbalances will be needed.

There will come a point when the drift towards restricted oligopoly compels a radical government to act, with legislation limiting the press holdings of any one proprietor to no more than five per cent of the national total, with rights for employees to buy in to what are now private empires, and with editorial guarantees which have force in law.

The problem of the over-mighty press baron is not unique to Britain, as the examples of M Hersault and Herr Springer testify, but it is in this country that we have a truly dominant national press. The Labour leadership should be embarrassed that it is now caught in the fraternal bear-hug of Robert Maxwell. He still illustrates the problem of excessive concentration of personal power over the mass media. Perhaps the best moment for animadversion is when you can invoke fairness without baving to cry foul.

The author was Labour MP for Derby North, 1970-83.

York Minster's human firebug

Supposing that it may not have been a direct intervention by God that burned the south transent of York Minster last week, there is another supernatural suspect against whom the evidence looks almost as black the ghost of Jonathan Martin. The minster was burnt last week, as if in retribution, immediately after the consecration of a Bishop of Durham with equivocal views about the authority of scripture. In 1829 Jonathan Martin set the chancel of the minster on fire as a religious protest (with far more destructive effect); on another occasion he had disrupted the confirmation of an earlier Bishop of Durham by threatening the assembled prelates with a pistol, accusing them of blasphemy and loose living. After the York fire he was tried, found to be insane, and ended his days in

Reditam. Martin was one of four brothers who were all eccentrics to the very edge of madness, subject to an irresistible sense of prophetic mission and gifted with imaginations of lurid and visionary brilliance. Like many poor, ambitious and selftaught boys in the nineteenth century, they strayed into a perplexing borderland between genius and madness. Even the Dictionary of National Biography, that incomparable compendium of English eccentricity, which has entries for three of the four, can hardly supply another set of brothers so majestically dotty. (There was also a sister, Anne, but she alone seems to have kept her

They were the sons of an itinerant tanner, publican, coachbuilder and fencing-master in Northumberland. The most humdrum of the four was Richard, who saw service at Waterloo as a quartermaster-sergeant in the Grenadier Guards, wrote scholarly verses and published a book with the quintessentially Martinian title of The Last Days of the Antediluvian World.

William, the eldest, was a ropeworker and self-styled "natural philosopher and poet". He was an inventor of real practical skill (the Society of Arts once awarded him its silver medal) and invented a bicycle, an automatic level-crossing, income tax, and a pneumatic perpetual motion machine which was revealed to him in a dream and, after he had sold it for a song remained profitably on exhibition in the Haymarket for 29 years.

He claimed to have confined Newton's theory of gravity, and in old age he took to wearing a tortoise shell mounted in brass as a hat, saet mounted in brass as a har, called himself "the Philosophical Conqueror of All Nations", and hawked in the street pamphiets exhibiting a wonderful inconsequence of mind, with titles like "Light and Truth, M's Invention for Dertweiting all Earl Air and Light. Destroying all Foul Air and Fire Damps in Coal Pits (proving also) e Scriptures to be right which learned men are mystifying, and proving the Orang Outang or Monkey the most unlikely thing under the Sun to be the Serpent that

Beguiled our First Parents".

The most successful brother in wordly terms was the apocalyptic painter John Martin, who was described by Lord Lytton at "More original, more self-dependent than Raphael or Michelangelo". His compositions, such as "Belshazzar's Feast" and "The Eve of the Deluge" are products of a dramatic and idiosyncratic imagination, though they are all rather much alike, with their colossal recessions of mysterious columns, vast gold candelabra, tiny human figures gesticulating as cosmic disaster is unleashed on them - torrents, earthquakes, flashes of lightning, even the End of the World. His work was so popular that he was able to engage no less a figure than Brougham to defend his brother at his trial, though the expense is said to have ruined him.

In Jonathan oddity toppled over into madness. He was the unluckiest of the brothers from the start. While they enterprisingly grasped such opportunities as the age held out for

Jonathan Martin: pamphleteer terned pyromaniac

poor but able young men, he fell into the hands of the pressgang and spent siz years in the brutal slayery of the lower deck in Nelson's navy. He was at the battle of Copenhagen, already inclined to argue about religion and afflicted with religious dreams.

After the incident with the pistor he was put in an asylum, but he escaped and eventually arrived in York, handing out terrifying and apocalyptically misspelt pamphlets threatening the clergy with hell-fire. You whitent Sea pulkirs... you Blind Gieds and Deceavers of the

Escaped from the sea, he became

a Methodist, abandoning the Church of England only after an anguished struggle with his conscience and his wife, who was also guided in marital disagreements by religious dreams. Eventually the Methodists found his fervour too much for them, and rejected him. Working in a tanyard like his father, he used to call on his workmates to repent, and they would slap his face with wet skins and tip buckets of bullock's blood over his head. He took to riding round the country on an ass "in imitation of the Saviour", and interrupting church services creeping into the pulpit beforehand and then popping up like a jack-in-abox to harangue the congregation about the sins of the ciervy.

Peopeal . . . I warn you to repent and cry for marcy for the Sorde of Justes is at Hand and your Gret Charchis and Minstairs will come rattling down upon your Gity Heads . . . " Tolerant, forbearing or inert, the civic and ecclesastical authorities

took no notice of these menaces, and in February 1829 he attended evensong in the Minster, saying to himself, as he listened to the organ, Til have thee down tonight thou shalt buzz no more." He hid behind a tomb till the cathedral was empty and then piled hangings against the woodwork of the choir. Dressing up for the part, he draped himself in velvet hangings "in a Robe like David the King", and perched the ornamentation from a pulpit cushion on his head. As he tailed away he bellowed prayers and praises to Almighty God, finally setting the pyre alight with a candle from the lectern.

As the clock struck three in the morning, he escaped through a transept window, falling on his knees to thank God that "his job" had been accomplished. The fire burned for most of the following day, and destroyed the pulpit, the galleries, the carved stalls, the medieval roof and the buzzing medieval roof and the buzzing organ. Providentially the great east window was saved, though the collapsing roof fell only a few feet from it. But four superb fourteenth-century windows were almost completely between and the gap in the Mineter's ranks of medieval the Minster's ranks of medieval monument to the strangest member of one of the strangest bands of siblings ever recorded.

Roger Scruton

Grand theories for little minds

The Listener has recently carried a series entitled The Return of Grand Theory, introducing the reader-to such thinkers as Gadamer, Foucault,

Habermas and Althusser.
Interestingly, half the articles either begin or end by protesting that the thinker in question is not an exponent of grand theory, or indeed of any theory at all, while judging him, all the same, to be of supreme intellectual importance.

Reading these arricles came as a depressing reminder of the ease with which intellectual achievements may be discarded. Anglo-American philosophers are constantly reproached for not considering the works of Gadamer, et al, when the truth is that we have considered them, and judged them to be largely worthless. It sounds arrogant to say. it, and would that Russell were alive, that it might be said more radely. But, so that it shall be on the public record, I shall say it now.

Most of the thinkers urged upon

us as "correctives" to our Anglo-

Saxon parochialism are, in my view, charlatans of the first order, who prefer paradox and posturing to the hard-won insights of philosophical argument. Their reputation is derived from two extraneous cir-cumstances: first, their gobblede-gook, which offers to the second-rate academic an impenetrable cloak of false expertise; secondly, their conclusions are almost invariably subversive of the established order", in a way that dignifies the gestures of armchair rebellion whereby the academic remainds himself that he was once alive. In short, they provide to the intellectu-ally balding, a dashing wig of long

Consider Althusser the mon influential and the most difficult-seeming of the grand theorists. A philosopher in a British university would probably fail an examinee who wrote like this: "This is not just its situation in principle (the one it occupies in the hierarchy of instances in relation to the determinant instance: in society, the economy) nor just its situation in fact (whether, in the phase under consideration, it is dominant or subordinate) but the relation of this situation in fact to this situation in principle, that is, the very relation which makes of this situation in fact a variation of the - 'invariant' structure, in dominance, of the totality A British academic would try to

teach his students to see that such a passage not only says nothing, but is also designed to say nothing. From blocks of abstractions it erects an impassable barrier, behind which its nothingness may be concealed.

Althusser's For Marx is composed entirely of such boxes of fortified emptiness, and it is not surprising that his disciples can agree only about the meaning of the title: Review.

Althusser is very definitely for Marx, not against him. The depressing thing is that, had he been against Marx, he would have been greeted with the derision that he deserves. Only the assurance of his impeccable political credentials enabled him to succeed: but that alone was

The style of the charlatan is a style without hesitation. Seldom in Althusser's text will you find words like "perhaps" or "possibly", no-where will you find any serious engagement with points of view other than those approved by the author. Althusser defers to only one other human being, but his defer-ence is total and idolatrous. That human being is Marx, and Althusser impresses on his reader that Capital has the status of a secred text, which can be understood only by those who already believe it. "It is not possible to read Capital properly," he writes, "without the help of Marxist philosophy, which must itself be read, and simultaneously, in Capital itself". In other words, those who are against me, do not understand me, and those who understand me, know that I am right. The sentiment, like the language, is one that a British philosopher would regard himself duty-bound to subvert.

I do not say that Althusser's text is entirely without theory. But, as he says, "this theory is the materialist dialectic, which is none other than dialectical materialism". The neophyte, contemplating such utteran-ces, is likely to be overcome by a certain awe. They have the same vertiginous effect as Stalin's pleonasm: "the theories of Marx are true because they are correct". Indeed, the more tautological an utterance, the more does it induce the state of readiness which is the prelude to unquestioning faith.

Althusser shows how gobblededook may be regarded as wisdom, so long as it has a left-wing tone of voice, indeed, gobblededook like Althusser's, which shrouds left-wing dogma in an impenetrable darkness. will at once be given a place of supreme academic authority. Enclosed by Althusser's dark, the dogmatist is protected from every opposition, consoled in the belief that he cannot be threatened by that which he has learnt not to see. If we use Althusser's language, then the possibility that Marxism might be mistaken, cannot even be stated! Thank God that some British academics still regard it as their duty to frame their arguments in a language of which their opponents might equally avail themselves, and try also to open their students' eyes to the reality of disagreement. But for how long will their efforts be successful if the "grand theories" dominate the syllabus? I wonder. The author is editor of the Salisbury

Ulster: figures that speak louder than bombs

Eleven years ago the first Northern Ireland Secretary, William White-law, said that 99 per cent of Northern Ireland's population sup-ported the security forces against the IRA. "The alleged freedom fighters seek to impose their will regardless of the fact that they are answerable to no one except themselves. After all, who elected them?", he said. In 1981, 30,000 people voted for Bobby Sands, the imprisoned IRA leader who was on hunger strike in the Maze and died four weeks later as MP for Fermanagh and South Tyrone. A year later. 64,000 people voted for Sinn Fein in the Northern Ireland Assembly election. At last year's general election, the Sinn Fein

vote rose to 103,000, threatening to overtake the non-violent SDLP. James Prior, the present Northern Ireland Secretary, is reported to have told a private meeting of Conserva-tive MPs that if Sinn Fein became the major nationalist party, the province would become ungovernable, a Cuba off Britain's western

A MORI poll to be reported in tonight's Brass Tacks Reports on BBC2 shows disapproval of successive governments' policies among Northern Ireland Catholics, but also significant numbers of voters still prepared to switch from the SDLP

John Hume, leader of the SDLP. has maintained for some years that his party's vote would hold up against Sinn Fein because the bulk of his supporters would never contemplate voting for a the PHS political wing of the IRA.

How far he is right will be tested at the elections for Northern Ireland's district councils in May next year, which are likely to prove a truer measure of Sinn Fein's support than last month's Euro poll.

Sinn Fein is far from out of the running; as Gerry Adams, its president, was quick to point out, its share of the vote did not collapse in the Euro elections. It was exactly the same, 13.3 per cent, m in last year's

general election.

The MORI poll, conducted between June 20-23 among 1,639 respondents in Northern Ireland, shows one SDLP supporter in seven currently considering switching to Sinn Fein. Fewer than half of all SDLP supporters rule out the possibility of voting Sinn Fein, and only a minority believe Sinn Fein should be excluded from any political settlement in the province. The most important cause of the problem is identified by SDLP supporters as whether the people of the North are to be British or Irish a strong point for Sinn Fein, who have placed the "national question" at the top of their agenda.

When pressed to reveal their resistance to Sinn Fein, by answering how likely they would be to support the party if the SDLP were not standing, only 46 per cent said "not at all likely", while atmost a quarter. 23 per cent, thought it

A majority of SDLP supporters believe that any attempt to solve the problems of Northern Ireland must have the cooperation of Sinn Fein. Fifty-two per cent agreed while only 29 per cent disagreed, suggesting little support for the SDLP policy of excluding Sinn Fein from political initiatives such as the New Ireland

As for the IRA itself, the obstacle it presents to the SDLP voters who are thinking of switching to its political wing is considerably smaller than many have thought. Very few SDLP supporters justify violence for political ends – only 7 per cent against the 81 per cent who disagree – but hostility to the IRA is less than complete. Forty per cent view the IRA as basically patriots and idealists, compared with 32 per cent who do not shall be of the cent where the cent who do not shall be of the cent where the cent cent who do not. And while 40 per cent see no resolution of Northern Ireland's problems unless the IRA is beaten, 28 per cent disagree, with a further 32 per cent undecided. Perhaps the most important of

our findings are those which cast light on why SDLP voters might switch to Sinn Fein. They reveal a serious discontent with government policy and a high degree of support for the IRA. Among those who could desert the SDLP and vote for Sinn Fein, disapproval of successive governments' handling of the situation over the past 15 years is even higher than among Catholics as: a whole - 82 per cent are dissatisfied, and only 7 per cent satisfied. They are strongly of the view that the "national question" is the real cause of the problem, and put terrorism as the least important cause.

They see Sinn Fein as tough and active in the local community. And they particularly say that Sinn Fein makes the British take notice of the does not.

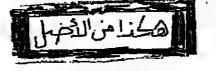

There is little in the survey to suggest widespread enthusiasm for violence among Catholic voters. On the contrary there is a marked readiness to move to the political centre: 35 per cent of Sinn Fein supporters are considering a vote for the SDLP. And while 14 per cent of SDLP voters are thinking of switching to Sinn Fein, almost twice as many, 26 per cent, could switch to the Alliance Party in the centre.

If the conclusion is that the Government has so alienated the nationalist community that many are prepared to support Sinn Fein and either support or accept the IRA, then the Government's policy of "isolating the terrorists" could be heading for defeat.

John Hume certainly thinks a change of direction is urgently needed: Since Sumningdale, govern-ment policy has promoted the cause of violence in Northern Ireland, and the security policy has increased support for the terrorists at a political level. During the hunger strike, Mrs Thatcher said the IRA had dealt their last card, but it is evident that she dealt them a full hand and they've been using it ever since." The findings of the poll give added weight to this view.

IF THE KEPI FITS

"It's not my constitution but it fits me ..., M François Mitterand remarked, not long after assuming the presidency of a republic which he had frequently and trenchantly criticized for excess of presidential power. For the foreign observer the last three years of France's constitutional history have been full of enjoyable irony. The staunch "republican" (we should say "parliamentarian"), and bitter foe of General de Gaulle in his lifetime, has become a superbly Gaullian figure in his manage ment of the state, while the Gaullists", who claim to be the General's political heirs have discovered, belatedly, the importance of a strong parliamentaty opposition and even of a strong second chamber.

Never has that reversal of roles been more marked than in the last few days. M Mitterrand, disavowed by the electorate in the European elections, defied by a million people in the street demonstrating against his government's private education bill, faced with a complete blockage-by-filibuster of his legislative programme, has broken through the ranks of the besiegers with a quintessentially Gaullian master-stroke; the announcement of a referendum to amend the constitution.

And to amend it how? To reduce the excessive presidential powers, or the length of the seven-year mandate to make it synchronize with the five-year parliament as M Mitterand formerly proposed? No indeed: to increase the president's powers and to extend the use of the referendum itself, thereby further diminishing the relative importance of parliament in the

in the L

Can the Gaullists oppose that? Hardly. All they can do is go one

better, demanding that the President should not merely be empowered to call a referendum on questions affecting civil liberties but should be obliged to do so if he wants a change in the law on those questions and cannot obtain the consent of both houses. The effect of that provision, of course, would be to increase the powers of the second chamber, the Senate - an indirectly elected body for which

General de Gaulle never con-

cealed his contempt. As in this country, the second chamber has been emboldened by the feeling that, at least on some issues, the majority in the lower house does not reflect a genuine majority in the country. But the situation is graver for M Mitterrand than for Mrs. Thatcher for two reasons. He faces a Senate controlled by the opposition, not merely one where he can lose specific votes on specific issues thanks to a majority of circumstance; and his government, by all available indicators, no longer enjoys anything like the degree of popluar support that it would need to be returned to power in a general election.

On the other hand, he is the president, elected by universal suffrage for seven years of which he has more than half still to serve. The constitution affords him many opportunities to seize the initiative and, with a tactical skill which even his opponents respect, he has availed himself of

The Senate had suggested a referendum on the private schools issue. The National Assembly (Socialist-controlled) had pointed out that the constitution does not provide for referenda on such an issue. M Mitterrand was thus enabled to found in 1969, the referendum is cover his retreat on the private a double-edged political weapon.

school bill (he promised a new one, ergo the one that was ploughing its way through parliament is scrapped) by proposing a constitutional amendment to make referenda on such issues possible in the future. The heat generated by the

private school issue is not very easy for us on this side of the Channel to understand. The government has not proposed to abolish private schools, only to make state aid for them conditional on certain dispositions, the most controversial of which would give teachers in them the right to acquire civil-servant status after six months' service, if they were already qualified within the state system, or after six years if they were not. This was proposed in the framework of a decentralization of responsibility within the state, giving more power to local authorities as against the national ministry of education. The long-term aim was to make it possible for church schools to exist within the state system, as both Protestant and Catholic ones do quite happily in this country.

But the tradition of centralization within the state system on the one side, and of church schools fiercely independent but expecting state aid as of right on the other is so strong in France that compromise is virtually impossible to attain; and, assuming that M Mitterrand does get his constitutional referendum in September, it is still not clear how he can resolve the private school issue. Whatever solution he proposes, he can hardly not then submit it to another referendum in which, however reasonable in itself, it could well be rejected simply because it comes from the Socialist government. As de Ganlle himself

MERE WITNESSES

Mr Harrington is a second year student at the Polytechnic of North London Objectionable though his political beliefs may be, he has a contractual right to be educated there. Earlier this year, a group of his fellow students, disagreeing with his political views and affiliations, decided to deny him that right. They organised a picket. They physically prevented him from coming into the Polytechnic. By so doing, they committed a number of civil wrongs against him, including inducement of breach of contract and conspiracy, and probably also the aptly named tort of intimidation.

Mr Harrington issued a writ against the Polytechnic and against the picketing students. He could not identify all the students concerned, but he believed he could identify one, and he sued that one both in his personal capacity and as representing the others. He got an injunction restraining the students from interfering with his right to attend the Polytechnic. The injunction was disobeyed. On the 1st May there was a violent gathering which it is believed included about 20 students of the Polytechnic. These students exposed themselves to the risk both of civil liability to Mr Harrington and of judicial sanctions for comtempt of court.

In order to bring them before the court, Mr Harrington had to find out who they were. He did not know them himself. But there were photographs of some of the individuals concerned. The Polytechnic was ordered to identify them. It tried to get its staff to assist it to comply with the order, but without much success. So, on May 21, Mr Justice Mars-Jones made an order requiring fourteen named senior members of staff to swear affidavits stating whether or not they could identify the persons

concerned and to attend courtfor cross-examination.

Ever since then, the fourteen firstly, that the judge had no secondly, that if he did, he ought not to have exercised it. Last Thursday the Court of Appeal rejected the lecturers' arguments on the first point. The second point was remitted to a judge for further consideration.

Under the "mere witnesses" rule, a potential witness who is not a party to proceedings cannot normally be obliged to disclose information or documents in his possession unless and until he is called as a witness to give evidence in the proceedings. He is under no legal obligation to help the police with their inquiries or parties to a civil dispute with theirs. The purpose of the rule is to relieve such a witness of the burden of being involved in other people's legal disputes more than absolutely necessary.

The mere witness rule can work: considerable injustice. Suppose, for example, that a passer-by notes down the number of a car driven by a hit-and-run driver. Or that he happens to recognize someone in a mob who has just ssaulted someone else. Or, to take an extreme example, suppose he recognizes a murderer leaving the scene of the crime. In none of these cases can he be made to disclose his knowledge unless and until he is called as a witness in proceedings against the wrongdoer. But without the information it may be impossible to find the wrongdoer in the first place. Where the wrongdoer has committed a crime, the rule may enable him to go unpunished; where he has committed a civil wrong, it may leave his victim uncompensated.

Recently, the courts have rightly tried to limit the scope of the mere witness rule. Nowadays lecturers have been contending anyone who is mixed up in that the order should not have , wrongdoing, even without fault, been made. They have argued can be compelled by a civil firstly, that the judge had no action to disclose information to power to make the order because ' the victim which may identify they were "mere witnesses", and, . the wrongdoer, on pain of being liable for contempt if he disobeys the order. Mr Justice Mars-Jones could, for instance, have ordered those few students at the Polytechnic who were actually identified as having been involved to disclose the identity of such of their fellow wrongdoers as were known to them. It was because the Polytechnic itself had become mixed up in the incident that he ordered it to make the identification. The lecturers, however, were not officers of the Polytechnic: they were only employees, and they had not themselves been involved in the events of May 1. The court of Appeal disposed of this point by holding that employees of a party are not mere witnesses within the meaning of the rule, but can be made to give information as agents of that party. The decision is a further welcome inroad into the mere

witness tule. The time has come for the courts fundamentally to reconsider the mere witness rule. When abused, it provides legal condonation of what is morally unjustifiable. "I don't want to get involved" is a cry which is heard all too often. Why should the courts not have the power, in an appropriate case, to require a person with highly relevant information to provide it in the interests of justice? The power would, of course, be discretionary, to be exercised only after balancing all the considerations involved. It is a reproach to our legal system that the law at present seems totally powerless to convert a mere witness's moral responsibility into a legal

THE ARTIST IN EXILE

The second second is V. ide If a British film director decides to work in Hollywood his defection is not normally frontpage news. Yet when Mr Andrei Tarkovsky, who has contributed more original ideas to world cinematography than any other Soviet film maker since Eisenstein, announced his decision to remain in the West, his Milan press conference gained international publicity. What is regarded here as merely an extended business trip, can mean a lifetime in exile for a Soviet citizen.

With him were Mstislav Rostropovich, the cellist and conductor, Yuri Lyubimov, the stage director, and Vladimir Maksimov, the writer once on the editorial board of the partyline Soviet literary monthly Oktyabr who, now in exile, edits Kontinent, a journal of East-West dialogue appearing in The books of the late Mikhail artists are no better placed than Russian and West European Sholokhov made him a million- the performing seris of Russian editions. It publishes some of the aire and a member of the Central noblemen under the tsars.

written in Russian and includes interviews with a remarkable range of outstanding cultural figures from countries beyond the Iron Curtain who have opted to leave their homelands.

The USSR is suffering a greater cultural haemorrhage than any other state has ever. endured. Once he has "defected" an artist's works are banned. Books are removed from library shelves, and even back numbers of the major literary journals containing the departed writer's stories or poems are no longer available. Films, musical recordings and insignificant ballet programmes carrying the names of artists absent without leave, all disappear from the public

domain. Those who give the state what it requires earn high privileges.

best poetry and prose now being. Committee. Talented young people receive an excellent training in special schools free of charge, and are guaranteed a lifetime's employment bringing culture to the masses, inspiring them to ever greater achievements in communist construction. Seats in cinemas, theatres and concert halls are heavily subsidized to allow even the poorest-paid workers the possibility of enjoying the indisputable genins of superb Soviet performers, who, if they defect, deprive their compatriots of their rich talents nurtured at State expense.

Yet a state which seeks to dictate precisely how these talents may be applied, and tries to quarantine art from foreign influences, risks producing an arid culture hateful to all who appreciate original genius; its artists are no better placed than

our unemployment?

Yours faithfully,

Highfield Oast, Sedlescombe,

W. FARR,

Sir, It's all very well Mr Congdon why these fairly obvious consecomplaining (Economic Commen-tary, July 11) that the recent behaviour of the dollar makes a quences were not forescen and why it should still be widely regarded as an appropriate basis for policy? mockery of economic theory and affronts common sense, but has be They may answer that an adjustment is bound to occur in the considered which theory is mocked long run, as no country can add

and which is doing the mocking?

Established and reputable theory expects in a regime of floating exchange rates that the currency of a country with a huge current account deficit will weaken so that its exports become more competitive and imports are discouraged. In this way

market forces lead to an adjustment. On to this model has been superimposed a theory that the rate of inflation is wholly determined by the money supply. As a result shortterm increases in money supply figures are taken by the financial world as a signal to increase interest rates, regardless of other economic factors such as the fiscal belance, the state of the external account and even the actual rate of inflation.

When this process produces real rates of interest beyond the dreams of avarice foreign funds are naturally attracted and the currency with the huge deficit grows ever stronger. When it is the dollar, the rest of the world is doubly penalised by the high rates and the increased cost of the currency in which many debt obligations are denominated.

Thus under this narrowly conceived version of monetary theory, market forces produce a progressive maladjustment of the system. Are we not owed some explanation by

pays its farmers not to produce, If Summer of discontent we withdraw subsidies from union ized industries, will this not decrease From Mr W. Fart our competitiveness and increase

Sir, In your leader of July 9 you maintain that trade unions raise wages too high, causing a continu-ously high rate of unemployment which is particularly detrimental to young people.

If unions were the only group to affect the price of their product this might be worrying. They are not. Many others - car manufacturers, airlines, farmers, lawyers, banks, the Electricity Board - do the same. You do not mention their effect on the consumer and on employment.

Other countries, richer than ours, with lower rates of unemployment, have powerful unions - Switzerland, Germany, Sweden, the US, Canada, Australia. Should their union power also be curbed? Would this help our competitive position?

You do not like subsidies. Many countries subsidize their industries -Germany, France, Japan. The US

The miners' strike From Sir Charles Fletcher-Cooke,

Sir, Recently an official of the Kentish miners' union denied that there had been any intimidation by miners' pickets throughout this long strike since there was no record of a single conviction, anywhere in Great Britain, of a nicket by a court of law.

There have, of course, been many charges, remands, undertakings, remands in custody. But, it seems, no concluded mals.

I think this official may have got his facts right. If there had been trials with acquittals or convictions the media would have given great prominence to the sentences. Every-one wants to know the tariff for (a) resisting the police; (b) assaulting the police; (c) breaking a policeman's jaw; (d) firing or damaging police property. These figures have not yet been vouchsafed, even to the strikers.

Why this damaging delay? Is it because courts do not wish to appear to accelerate these charges in priority over their normal lists? Or is it due to an understandable but misplaced desire not to "escalate" the dispute? Or is it just judicial

I am, your obedient servant. CHARLES FLETCHER-COOKE, 2 Paper Buildings, Temple, EC4. July 10.

From Mr.A. Lewis

Sir, We are constantly hearing Arthur Scargill, his fellow leaders of the NUM, Tony Benn, Ken Livingstone and other left-wing Labour leaders talk of a police/fas-

cist state in this country.

After witnessing televised scenes on Monday, July 9, where miners (?) pickets cut down trees, overturned and burnt motor vehicles and blockaded roads to prevent other people working, where miners'(7) pickets went into buildings and destroyed records, one is reminded of Nazi Germany in the early days.

Surely fascism is not a prerogative of one party or the other, but a standard of behaviour designed to intimidate, to hinder democracy and sadly, these standards are now being accepted as the norm, without any real action, whether court action or otherwise being taken. What exactly is Mrs Thatcher

waiting for? A revolution? Yours sincerely, ALAN LEWIS, Lewis & Co.

Never-never land From Mr Roger Washbourn

Sir, Few modern exegetes would accept your correspondent's (June 30) identification of Twing as Tring. Hertfordshire. According to the folio in my

essession (third printing) the parish of Twing is beyond peradventure in Gloucestershire. This is attested in two independent sources; a letter from Eustace to his cousin Bertram Wooster inviting his participation in the Great Sermon Handicap and one from the incumbent of Twing, the Reverend F. Heppenstall, scratching his entry and transferring the stable's first colours to his nephew, the Reverend James Bates, of Gandle law the Hill Both are headed Gandle-by-the-Hill. Both are headed

The Vicarage, Twing, Glos." While it is possible that someone whom Jeeves has described as "very high-spirited" may have been uncertain whether he was in Gloucestershire or Hertfordshire, the same could scarcely be urged of a senior clergyman, who could not unreasonably be assumed to have known in which county his benefice

Sed it is to reflect that a revival of that splendid event is now unlikely since all those historic parishes, Little Clickton-in-the-Wold, the Bousteads Parva and Magna, Faleby-the-Water et al, must now have been united under a team ministry, presumably based on Twing. Yours faithfully,

ROGER WASHBOURN 21 Conesford Drive, Norwich.

Crown of laurels From Mr Richard Heller

Sir, I would like to suggest that the new Poet Laureste (and his or her successors) be chosen by way of an competition 2000E previously unpublished poets.

This would be a simple and

economical means of encouraging interest in new poets. Those selected would face the chore of producing verses to celebrate nations triumphs such as the birth of a royal baby, a fall in the money supply, or dismissal of a West Indian batsman, but this would be a small price to pay for recognition and publication. Moreover, the new-style Poets Laurente could hardly do worse than sport of their predecessors. Yours faithfully. RICHARD HELLER, 65 Mexfield Road, SW15.

From Mr Michael Haag Sir, On June 21 you printed in your back page Times Information Service columns an announcement that tourists will be able to sail free this sammer from Rhodes to Kastellorizo, now officially called Megisti, the smallest and most distant island of the Dodecanese.

LETTERS TO THE EDITOR

The harbour there is the finest between the Aegean and Beirut and early in this century its trade supported a population of 14,000, mostly living, as old photographs show, in the large and elegant vaterfront town.

Today, Kasteliorizo has a population of barely 200 and the Greek povernment fears that if these leave there will be little case for prevent-ing Turkey taking control. For this reason the islanders are heavily subsidised from Athens and such encouragements to tourism as you announced are provided.

British tourists, however, may not be warmly welcomed. Ninety per cent of that once lovely town has disappeared and much of the rest is rainous. The islanders say that the British, after taking the island from the Italians during the Second World War, removed the population for its safety to Cyprus, Egypt and Palestine, but then looted their homes and deliberately burnt their

They will tell you of seeing their possessions for sale in the markets of Limassol and Alexandria, And they tell of being brought home in a British ship after the fighting, of the ship being deliberately scuttled there out from Port Said, the captain and crew taking to the life boats and leaving the Kastellorizians to their fate.

They were saved, they say, only when the sinking was spotted by a French aircraft which signalled to an American warship which made the

emoluments of others, who are exempt to some extent from market I was so astonished when I first heard these accusations that I made a point of collecting statements from a number of islanders (there were some contradictions in dates and differences in emphasis, but essentors, senior civil servants, judges, the Army and the police? Why cannot young people obtain tially one story was being told),

MICHAEL HAAG, The Jesus of the New Testament is clearly an "agent of divinity". It was left to the philosophical speculations of the Middle Plato-

Conflict of creeds

From Mr R. J. S. Allen

Sir, In your editorial of July 5 Professor Jenkins is represented as one who believes that a latter-day

Arian heretic, proclaiming Jesus as "a great teacher and agent of divinity" as against the orthodox belief in "God made flesh", can remain a Christian. Theological history is written by

the winners: the losers are branded heretics. The philosophical brainteaser "God made flesh" is a product of the fourth century controversies, not their received doctrine.

Recent scholarship has made a strong case for the Arian "heresy" being deeply rooted in both scripture and the Apologetic tradition.

Mrs C. M. Richmond's letter, in the same edition, points to the lack of scriptural support for the arguments of Professor Jenkins's opponents.

joys of the New Testament message. Yours faithfully,

R. J. S. ALLEN The East Wing, Kirtlington Park, Oxfordshire.

Fire at York Minster

From Miss S. Manley and Miss M. J. T. Eylon

Sir, The Prime Minister has indicated that there may be Government money available to assist with the rebuilding of the south transept of York Minster. We hope that the Minster authorities will have the decency to refuse such money.

A Government which can plead poverty in the face of the very proper needs of the social services. the health service and the whole spectrum of education cannot expect in the twentieth century, to salve its conscience by giving money to the Church.

Are "Victorian values" not enough? Is it to be a return to medieval values next?

Yours faithfully, S. MANLEY. M. J. T. EYTON. 28 Cobbold Road.

Visit to Sri Lanka

From Mr Michael Morris, MP for Northampton South (Conservative) Sir, Your editorial, "Tamils and terrorism" (June 28), showed a good perception of the problem. How-ever, in criticising the Sri Lanka Government for temporarily refus-ing entry to two British MPs, you ought to know that Mr Dave Nellist, MP (Labour), the one of the two whose political complexion might have caused a problem, was actually invited by the Sri Lanka Foreign Secretary to join an all party visit of MPs in early June which I led.

I do not know why Mr Nellist refused then; however, the ten of us who did go had a very worthwhile visit. We were totally free to see who we liked, go where we wished without hindrance from anyone.

Yours faithfully. MICHAEL MORRIS (Chairman, British Sri Lanka Parliamentary Group House of Commons.

This side Paradise

July 5.

From Mr Nicholas Marston Sir, Philip Howard may well be correct when he states (July 6) that

"Carlord in the best place in God's green world, this side of the University of Paradise". But surely he is not completely unaware that these two seats of learning are only a short coach or car journey apart? Yours faithfully, NICHOLAS MARSTON. Corpus Christi College, Cambridge

nists to transform this into "God made flesh". The Arian bishops lost their sees through political intrigue rather than theological inadequacy. That their twentieth-century "successor" can

secure his diocese should be applauded as a triumph not just for Anglican libertarian woolliness, but for a clearer and a more scriptural Christianity.
It is high time we stopped calling

this "heresy" and brought to account the post-Nicaean priest-hood, which for 1,600 years has been

Dog licence fee From Mrs Audrey Winkler

Sir. A number of thoughtless dog

owners do not control their pets sufficiently, and cause problems throughout the country. In towns and cities the dogs foul pavements; in housing estates they form packs and terrorise the inhabitants; in the country they chase, and sometimes kill, sheep and other livestock, It is unlikely that these dog

owners ever think of buying a licence, even at today's rate. Increasing the licence fee will do nothing to alter the situation. The caring, and careful, owners are those who will be penalised by the higher

It is suggested that the local authority should decide the level of licence fee (with a maximum of £10) and use the money raised to deal with the above problems. How long before the dog licence is just another source of revenue, to be increased at will, and not connected in any way with the problems it was supposed

The simplest solution to the current dog licence anomaly is to abolish it, but if the licence is to be retained it must surely be at a nationally decided rate.

A dog gives companionship and a

feeling of security to its owner, and plays an important and valuable role in our society. Education in the responsibilities of dog ownership is what is needed - yet it is increasingly difficult for dog training clubs to find balls where they can carry out this important work.

The dog licence fee and the problem of dogs in our society are two completely separate issues. Raising the first will in no way diminish the second. Yours faithfully. AUDREY WINKLER

Windward, Summer Lane, Wirksworth,

Out of the mouths . . .

From Mr P. B. Soul

Sir. The news (July 11) that the DHSS is effectively raiding children's savings, by taking account of them in refusing to make urgent payments of benefit to parents, is only the thin end of a wedge.

If I interpret the last Budget statement correctly, from next April the interest paid on a child's savings account at a bank will be taxed at source, with no reclaiming allowed. Whatever happened to "No taxation without representation"? Yours faithfully, P. B. SOUL,

51 Lakeside. Earley, Reading, Berkshire.

In 1935 he transferred to
H. M. Tennent, then just coming to be regarded as the foremost. West-End management in those days stage lighting was entirely in the hands of the diretor and was rudimentary by present stan-dards, Only with the develop-ment of new lighting technology after the war did the status and importance of the lighting designer, as he came to be known, become recognised. Ioe rose magnificently to the chal-lenge, and turned out to be an artist as well as a technician. He was responsible for over 600 productions in London and worked with all the great actors of the past 50 years - from Marie Tempest on to Olivier, Gielgud, Richardson, Edith Evans, Dietrich would not

appear on stage in person unless lit by him. The first London productions of A Streetcar Named Desire, Death of A Salesman and My Fair Lady, and the National's Man and Superman all were lit by him.
Only this spring his work was seen at its best at the Haymarket in The Aspern papers, and when he collapsed and died outside the stage-door of Drury Lane Theatre he had spent the morning preparing for Forty Second Street. In Moscow he lit Peter Brook's Hamlet and in

MR V. C. **CHIDAMBARAM**

New York the first production

of Irma La Douce.

H. G. writes:
V. C. Chidambaram (Chid to all who knew him), the Indian demographer, who died suddenly in London on July 3 at the age of 49, made an important contribution to the improvement of knowledge and understanding of fertility in developing countries through his 11 years with the World Fertility Survey project, of which he was at the time of his death Deputy Project Director. Chid obtained an MSc in Statistics from the University of

Kerala and a Diploma in Demography from the International Institute for Population Studies, Bombay, Thereafter, he worked with the Government of Kerala, the International Institute Population Studies, the University of Southampton, UK, and the UN Economic Commission

for Europe.

This wide work experience, with its international contacts and its involvement in fertility and family planning through fieldwork and also analysis and reporting fitted him well for participation in the World Fertility Survey (WFS) programme, the largest social survey research project ever undertaken which had the prime aim of assisting countries, especially developing countries, to know more about the fertility trends and patterns of their populations.

With his enthusiasm and drive Chid played a leading role in achieving this end, through assisting developing countries in the actual conduct of their surveys, through directing the planning and execution of data analysis programmes.

Kaufman

gloomy

Aerospace abandons talks with GEC

Two months after Thorn EMI announced its wish to take over British Aerospace, and six weeks after GEC threw its hat in the ring, British Aerospace vesterday called the whole thing off. Thorn, pulled out 10 days ago. Yesterday British Aerospace shut the door on GFC Sir Austin Pearce, the chairman, said: "The board has now decided not to continue these discussions in the absece of a specific proposal from GEC,".

 $_{\mathrm{out}}(r_{k}^{\ast}r_{k}^{4})/\overline{q_{k}^{2}}$

Sir Austin went on to claim that the company has an excellent and prosperous future", orders at the end of last month were £5.2 billion compared with £4.5 billion a year ago and profits should be not less than £55m, against £36.5m before. The interim dividend for the current year is to be increased by 50 per cent to 5,25p a share.

Asked if GEC had merely succeeded in spoiling the earlier bid from Thorn EML, Mr Bernard Friend, BAe's finance director, said: "I wouldn't like to say that, I think from the interest they were taking that they were serious. But the fact is there was no hard cash. Six weeks is a long time. We believe they had ample time to come up with an offer".

Mr Friend denied that yesterday's announcement was to placate share-holders opinion. BAe's formal notice of halting the talks includes a bullish statement about current trading. It says that first-half profits will not be less than £55m against £36.5m last time. The order book to the end of June is worth £5,000m against £4,500m a year ago, and £4,900m at the end of 1983. BAe has promised to increase the dividends substantially and has promised a 50 per cent increase in the interim to 5.25p.

Mr John Sibley, a director of Thorn, said BAe's announcement made no difference to its position and it would not be returning to the discussion table, at least for the immediate future. "Nothing is for ever, of course. But matters will have to be allowed to settle." Thorn has its hands full with Inmos and its plans for other acquisitions.

GEC retreated into its standard position of not wanting to do its shareholders down by overpaying for a takeover. There are suggestions that it could not get all the information it wanted, and of course market conditions went against the deal. It has to be borne in mind that the Government wants cash for its 48 per cent stake in British Aerospace, at a time when the stock market has turned savagely downwards and interest rates have risen

Another worry was last week's news that Acrospatiale had had to write off FFr 1.9 billion (£173m) against its wide-bodied iet programme. Altogether, there were just 100 many unknowns for GEC - and these days one unknown is one too many.

The idea of trading links between GEC and British Acrospace was discussed and dismissed at an early stage, on the basis that a half-way house, was not enough. It had to be full marriage or nothing at all.

Dilemma for Crocker minority

The board of Crocker National Corporation, Midland Bank's 57 per cent-owned subsidiary, will gather today to consider Midland's proposals to buy out the minority shareholders. The non-aligned directors will not be reaching any hasty conclusions on the offer and it may be some time before they and their advisers come out with their recommendation to minority shareholders.

The reaction so far from the United States investment community has been mixed. Crocker's 20,000 minority shareholders are being offered, in return for their common shares, which now pay only 40 cents a year in dividends, perpetual adjustable rate preferred stock with a face value of \$25. Dividends on the preferred stock will be related in the first three years to Crocker's earnings but will be not less than 46.9 cents a quarter. So the minority has to decide whether to sacrifice the uncertainty of capital gain on Crocker stock as the bank's earnings recover in return for the certainty of a much-improved income stream.

Many minority shareholders are probably sitting on a hefty book loss on their holding and may consider Midland's offer opportunistic at a time when Crocker may be just turning the corner. Second quarter results out today are expected to show a return to profit.

The new preferred stock is expected to trade initially at a discount so it is not clear what sort of premium there will be over the Crocker share price (nearly \$22 after the offer was announced). The offer is also well below the net asset value a share of nearly \$53.

The unknown factor is how long it will take for Crocker to return to a reasonable level of profitability. Minority shareholders may simply decide that they would rather have a bird in the hand and Mr Keith Brown, banking analyst at W Greenwell says: "In my opinion the Crocker minority are getting a pretty handsome deal."

As Crocker is such a major part of Midland's future, it would make Midland happier to have its destiny entirely in its

Uncertainty over BA takeoff

Has the Civil Authority succeeded in sinking the British Airways flotation or not? At first sight there is surprisingly little in its long-awaited report produced yesterday to suggest that privatization of BA needs to disappear into the land of make believe.

The CAA has made a panegyric to competition that is a ringing vindication of the arguments which British Caledonian's chairman, Sir Adam Thomson, has been so successfully pressing in Whitehall. The immediate practical impact of the Authority's proposals will be much less

The loss of 7 per cent of its revenues is a blow to BA's profit and loss account, but not on the face of it too damaging. BA is being allowed to keep its stranglehold on Heathrow, which as the CAA notes provides the airline with over 90 per cent of its revenue needs and is its biggest asset. The CAA calculates that another 4.5 per cent of BA's revenues could be lost over a period of time as some of its other proposals come into force, such as the loss of some of its European scheduled

The CACA admits that if its recommendations are accepted – a big "if" – privatization may have to be delayed, primarily because of the need to fit in the necessary legislation. It argues that the loss of proceeds to the Treasury resulting from its whittling away of some of BA's routes

should be encertally borne in the greater cause of more competition. The CAA clearly believes however that the effect will not be large enough to imperil privatization itself.

Lord King and his colleagues were much less optimistic about the prospects for the floatation. Clearly privatization is their strongest card politically, and it is something that they can be expected to play frequently and loudly in the crucial coming weeks. The view at BA is that the loss of routes envisaged would knock a hole in their profits which could be more than the 7 per cent loss of revenue estimated by the CAA. BA believes the revenue effect could be more like 10 per

It is more worried still by the openended nature of other changes propsed by the CAA. The point forcefully made by the BA camp is that it is this uncertainty which - more than anything else - will jeopardize the flotation.

As we said in this column last week, the real political battle has yet to begin. Some of the most crucial weapons - BA's profits on the routes it is being allowed to keep remain for the time being carefully locked in BA's financial locker.

As for Sir Adam Thomson, he must be disappointed at not winning more routes, having won so much of the argument. He is still pressing ahead with his plans to raise new money on the Stock Exhange.

Tebbit may reject commission in favour of self-regulation

Mr Norman Tebbit, Secretary of State for Trade and Industry yesterday gave a brief glimpse of the type of regulation he wants to see control the City of

Giving a strong hint that opinion was moving towards self-regulation and away from the recent surge of support for a legally-backed Securities Commission, he said he wanted to see three things. Self-regulat-ory groups by function rather than business, these would be few in number; statutory backing for these agencies to ensure they could enforce adequate control over their members.

Mr Tebbit said he intended to place heavy reliance for regulation on market forces which he regarded as the most potent weapon available. He said: "I want to achieve a

regulatory framework which is clear enough to shape, but not cramp, the pattern of structural change in the City but has the resilience not to be simply But Mr Peter Shore, leading the debate for the Labour Party

opposition, said he was sur-prised that Mr Tebbit had "uncharacteristically" under-played his own thinking on

Spectre of a sustained bear market haunts state's sell-off programme

from British Aerospace to Cable natchy.

Whether stagged or undersubscribed, however, one factor has been constant throughout. All the state-owned businesses which the Government has sold on the stock market have been launched against the favourable background of a gently-roaring bull market.
In Mrs Thatcher's first five

years, the stock market -measured by the FT All Share index - virtually doubled, rising by 96 per cent. Since reaching its peak on May 3, the market has fallen by around 14 per cent enough to wreck the Enterprise Oil flotation and raise the spectre - though it is only a spectre at this stage - of a sustained bear market.

If this is the start of a period of enduring weakness in the stock market, it could have serious consequences for the ambitious programme of priva-tization planned by the Government for the next four years. Take the next three big issues, pencilled in provisionally for the next 12 months - Jaguar, British Telecom and British

CWS gains retailing foothold in England

Agreement has been reached for South Surban Co-operative share is one of its lowest Society of Croydon – one of the South Suburban, which has

financial powerhouse in the Cooperative movement, into retailing in England for the first time and signals the strongest bid yet by the Co-op to reverse its fortunes in the South East, now the toughest battleground for the big grocery chains.

Many in the Co-operative movement believe it also presages the eventual formation of a "super Co-op" covering population centres in the South

top 25 retail Co-ops - to merge with the Co-operative Wholesale Society (CWS).

It brings the powerful CWS. CWS to step in, subject to agreement by its members. This was given at a series of meetings Another merger just agreed subject to members' approval is between the troubled York Co-operative Society and the successful Harrogate Co-operative Society. If the merger goes through it will create a North Yorkshire Co-operative Society with a turnover of more than

Thomas Jourdan takes over Squires (Copper)

Thomas Jourdan has announced the 100 per cent acquisition of Squires (Copper) for £501,418 through an issue of shares and a cash payment. The move is in line with the

company's policy of expanding into the consumer goods mar-ket, and securing supplies of a product crucial to one of Jourdan's main businesses.

Squires, a privately-owned company with a turnover of £750,000 a year, supplies copper canopies and hearths for 225 and electric fires to Suncrest Surrounds, a wholly-owned subsidiary of Jourdan's.

In brief

 SHERATON SECURI-TIES has completed the acquisition of Gravel Investment and Property Company, Net assets before taking account of capital gains tax estimated at £400,000 amount to about £2.6m. The consideration of £2.15m is satisfied by £120,291 cash and by the issue to the vendors at 13p per share of Sheraton's New to have major impacts on the ordinary shares.

CHEMICALS INTERNATIONAL has signed a letter of intent with Macdermid Inc of Waterbury, Connecticut, for the sale, subject to contract, of the metal finishing activities of its US subsidiary Brent Chemicals Corporation. The business will be transferred Macdermid for about clared a final dividend of 5p for \$1.725m (£1.33m).

 VINTEN GROUP has declared a final dividend of 1.89p

March 31 last. Figs in £000 reveal turnover of 22.951 (17,740p), Trading profit 4,026 (3,293), and pretax profit 4,155 (3.355). Earnings per share were 13.9p (Ilp).

 PARK FOOD GROUP has agreed terms for the acquisition for Chrisco hamper packaging company. Merseyside-based Chrisco has annual British sales of £1,7m. The consideration is the issue of 230,114 Park Food ordinary shares and £122,500 in

• APPLIED BOTANICS is passing dividend (same) for 1983, Figures in £000: mean turnover of 1,086 (69), with pretax profit at 5 (loss 38).

PETBOW intends to diversify and expand its operations, making use of its facilities at its Sandwich site. The directors state in the annual report that the continuing conflict in the Middle East and company's export sales in the short term. Negotiations are already in hand to acquire a number of smaller but profitable activities outside those in which the company has tra-ditionally been engaged and which can be developed and expanded at Sandwich.

the year to March 31. Figures (in £000); turnover. 16,138 (17,132), and pretax profit 274

TEMPUS

US success prompts Ellis expansion

The decision by Ellis & Everard, the chemicals merchant, to expand its US operations by acquiring the Virginia-based Prillaman Group makes sense in view of the fact that the company already has national coverage in Britain and the success of its first US acquisition, American Industrial Chemical Corp. where sales were up 26 per cent in 1983-84, profits by more and the new Chattanooga, Tennes-see, branch went into profit after only nine months' trad-

Ellis is paying \$6.5m (£4.92m) for Prillaman, onethird over net issue value, to be et \$1.75m (£1.33m) by the issue of new shares and the balance in dollar borrowings. The acquisition is a big one for a company the size of Ellis, but should not prove too stretching given the flm net cash the company had at the year-end after January's £4.4m rights

Prillaman is mainly a chemicals distributor, but also specializes in solvent mixes and recovery. The geographical and partial product overlap with AICC is expected to give Ellis more muscle in the south east US.

After taxable profits were 37.5 per cent ahead to £2.56m in the year to April 1984, a similar leap is expected this year. Profits of £3.4m look possible, of which £200,000 would be Prillsman net of financing costs (assuming shareholders approve the deal). ICI, the largest shareholder, has given the company a vote of confidence by taking advan-tage of the rights issue to increase its stake to 27.8 per cent from 26.1 per cent.

The shares, unchanged at 180p despite another 1 for 10 scrip issue, yield 5.2 per cent and look good value.

Hillards

Hillards, the Yorkshire-based supermarket chain, is confident that profits will be up again in 1984-85, the miners' strike notwithstanding. The management is putting a brave face on the dispute and says it is now much less pessimistic about the effects than it was 17 weeks ago. It has seven or eight stores in pit towns and perhaps the same number in nearby locations affected by the dispute.

The company adds that 90 per cent of sales and profits come from the 28 largest stores, and all those affected by

Dispute or no dispute, people still have to cat and Hillards' cut-price lines may have helped to take some custom from opposition like Asda and William Morrison. Nor has Hillards had to trim prices to remain competitive in the pit town stores. Nevertheless. volume sales in those shops are

to be seen. That dispute aside, Hillards has come a long way since it incurred the wrath of manufacturers by cutting prices in the days of resale price mainten-

down. How material the effect

will be at the year-end remains

Like its bigger brethren, Hillards has concentrated on relatively high-margin ownlabel products and fresh foods. A substantial expansion programme should increase number of stores from 41 to 46 during the year.

This will entail a rise in borrowings from last year's £4.3m. Gearing could be pushed up from the current low levels to 40 per cent without undne discomfort.

Hillards has established a strong following on the back of its record since going public 10 years ago. The shares look undervalued at yesterday's 206p (down 4p) but the strike has inevitably hit sentiment, and will continue to do so.

Blundell-

Permoglaze

Robert White, chairman of Blundell-Permoglaze, one of the country's leading paintmakers, felt sufficiently confident in March about the impending British industrial recovery to forecast lift-off from the recent £2m profits Sadly, however, the chair-

man now concedes that the signs pointing towards British output gains were false pro-phets. In his view, Britain's traditional industries, main users of Blundell paints - and that just before their products leave the factory - are not really recovering. Many Midlands manufacturers are still working a three-day week, and the recent hike in base rates can only aggravate demand levels. Demand for industrial finishes is now a quarter below the 1979 peak.

Add in, too, a £100,000 loss on the Blundell operation in Ireland, where political uncer-

tainty has bred procrastination in economic management, and it is hardly surprising that March's optimism has been replaced by more modest

Bright spots in the trading equation include a solid per-formance from the Building Paints and Products division, where the slight improvement in profits reflects hugyant consumer demand for houses. and an attractive exports performance. Middle East sales are in line with budgeted demand, Hongkong is moving well, and overseas sales by value are ahead by a fifth. The German acquisition has proved a satisfactory buy, and further mid-European investment is scheduled.

At 163p, the target p/e is around 11, reflecting hopes that the dividend policy will continue to be generous. Since 1980, the payout has risen three times faster than profits.

Gilts had a good day yesterday. The recent fall in prices means net funds are no longer forced to nurse tax sensitive profits. Thus freed, they can switch, and salesmen report booming volume. This is hardly reflected in yesterday's small price movements

Long-dated stocks, relieved of tapping pressure after the exhaustion of the Treasury 11 1/2 per cent 2001-04 tranchette, moved ahead by over 's point before shading back, as US bonds weakened. Shorts were unchanged on the day, but saw heavy switching out of the maturity stock. Treasury 12 per cent 1984, and into Treasury 15 per cent 1985, which went ex-dividend.

The dollar weakened on the belief that Fed policy will not lead to tighter credit, and hence higher prime rates. The consequent firmness in sterling to \$1.3265 also boosted sentiment. The contrast between buoyant June retail sales and slumping May output passed unregarded.

Some claim that today's June PSBR figures will take the cumulative total for 1984-85 up to around £5 billion. (1984-85 PSBR forecast: £7,25 billion). But gilt bulls see speedy correction following any fiscal laxity, leaving the economy possibly in the double bind of high real rates and a tightening fiscal policy. Rumoured Japanese buying interest also helps

considerations - and sterling - total stake up to 10.85 million brewing group, held at 152p. were the major influences. (or 6.1 per cent). Barratt The Abbot Ale Brewer now has were the major influences. FOREIGN EXCHANGES

For once, it was not a particularly good day for the dollar. The pound down around half a cent in the early stages on worries about a worsening of the situation at the docks, recovered to close with a net gain of 40 points at 1.3265

on its early levels against most major continentals. So the effective exchange rate index. was finally restored to Friday's level of 78.2, having been 78.0 at midday and 77.8 at the opening.

Profit-taking in the dollar to the dollar.

stemmed from recent pointers to a more sedate pace of economic growth, and from a growing belief that this week's Base meeting of the Fed Open Lending result in even tighter credit policy. BP plans to trade in cheap plastic

British Petroleum said yesterday that it was negotiating with Saudi Arabia to buy linear low density polyethylene (LLDP), which it will then sell to European manufacturers of plastic bags.

But it categorically denied that a purchase would herald the start of a marketing agreement between itself and the Saudi Arabians to flood the European market with cheap European market with cheap is petrochemicals – from planst at the new industrial cities of Jubail and Yanbu, which are due to start production next vear.

lt described a report earlier this year, that it was about to clinch such a deal under the noses of American oil rivals, thereby nutting 100 000 jobs in 186 thereby putting 100,000 jobs in alone at risk, as "total

The European chemical companies, which have suffered serious over-capacity problems in the recession, are concerned that the Saudi Arabians will use virtually free gas to produce petrochemicals that will dramatically undercut them. The Saudis have stressed that having bought in Western Technology - they should not be faced with false trade barriers when they bring their product to market

A BP Chemicals spokesman said the company was talking about buying LLDP "which will be used to complement in terms of grade and quantity" the same product it is making in small quantities at Lavera, near Marscilles. The French plant is having its capacity doubled, at a cost of £30m, but will still only be able to produce about 35,000 tonnes of LLDP a year from the end of 1985. By then, Saudi Arabia will have brought three plants of its own on-stream with a total annual capacity of

The plastic film produced has, up to now, used conven-tional low density polyethylene. The new type - made at much lower pressure, with all the molecules in line, hence the name "linear" – gives a much stronger product.

PB scientists developed its linear product at Lavera -which, when up-graded, will also make twice as much of the conventional material - to give it an advantage in Europe-European sales of a million tonnes a year by 1990 are

Putting the push into the PC market

The personal computer market Britain has changed dramatically in the last year. That transformation is evident from the way the home computer market, once the province of the gadget enthusiast and latterly the video game player, has become

postal?

In the last few weeks, prominent High Street retailers of computers." quickly becoming the preferred purchasing location for small businesses, have been assessing this new sophistication. W. H. Smith, one of the top microcomputer retailers - the sakes contributed £28m to the company turnover last year - has invested more than £50,000 in equipping two trailers with microcomputers and related software. They will tour the country training the Smith staff to a level which would never have been deemed necessary a year or two ago,

About six weeks ago the retail group began selling its Advance business machine supplied to the company by the British computer manufacturer, Ferranti, These machines, more expensive than most of the others stocked by the group, are liable to require more selling. The buyer will require more advice on the capabilities of a business machine, However, the Smith's investment, which is expected to be emulated by the other principal retailers in the High Street, reflects the need to give even the most modest buyer advice on his or her machine. What one can

computer games is a question being considered in the High Street.

Ken Newman, retail staff manager of Smith's, who has masterminded the project, believes that the 30st trailers may have a continual role to play in training staff in new products because of the dynamic nature of the computer market. About 800 staff can be trained by the novel vehicles each year but they are also expected to be used to increase the public awareness of microcomputers and as a travelling exhibition.

Newman says: "I was thinking of a way to involve more staff and decided to take the training to the branches. As far as I am aware it is a first for the company and I wouldn't be at all surprised if other retailers copied us. We want to reach as many staff as possible so they are confident and knowledgeable in the products they are selling. The mobile training units underline our commitment to train-

market dictates. Last month a report predicted that by next spring a fifth of Britain's small businesses - now estimated to be one million - will have purchased a microcomputer. There is little doubt that these new purchasers will be drawn to the miliar High Street outlets with

adequately trained personnel.

The report, Outlook for Micros in Small Businesses, published by the Liverpool-based Gowling Marketing

more than 2,000 small businesses. Education, medicine, law and ac-countracy were identified as the primary areas in which microcom-

puter usage is expanding significantly. Computers at the lower end of the price scale are still selling well but with the phasing-our of the Sinclair ZX81, it is obvious to most in the industry that buyers are prepared to spend more, although they expect more for their money. Sinclair's new microcomputer, the QL, designed to attract the small businessman and the

THE WEEK

typical sample of the new product range which must be supplied by any manufacturer if it wishes to compete. According to figures from AGB there were 215,000 home computer sales at the end of the first quarter of this year, up on the 129,000 figure of a year ago. By the end of the spring there were a total of 2.35 million machines in British homes - 10 per cent of the home population - and a substantial proportion of these sales are being generated by the High Street

computer owner find a use for his machine. The launch of 'Knowledge Index' last week was an example. The index has 20 different databases containing assorted references and summaries for the microcomputer user. The service available from Dialog Information Services, a subsidiary of Lockheed Corporation, is offered at 30p a minute including

transatiantic telephone charges.

A £25 connection fee is all that is required for membership. Microcomputers equipped with the appropriate modem can dial into the Californian (Palo Alto) database which contains more than 14 million articles, books, programs, conference

papers and technical reports.

Dr Roger Summit, President of Dialog, is in little doubt about the market his company was aiming towards.

The high concentration of home

computers and the availability of cheap modems, brought about by the liberalisation of the British telecommunications market has attracted the Americans to the dialog service which has 5,000 clients using its micro database and claims to be recruiting the microcomputer users at the rate of

Says Dr Summit: "Knowledge Index is aimed at the microcomputer user's personal and professional information peeds; It is easy to use and provides instant low-cost access

to how to stop unusual cases of post-

Doctors , businessmen and engin-cers feature prominently among the clients who access the microcomputer datafile. It is only available after 6 o'clock in the evening until five in the morning, although it is made available after two o'clock on Saturday afternoons. Clearly all of these users are working from home,

The British have not been idle in offering sophisticated services. British Telecom's electronic mailing service Telecom Gold is being used extenrelection Cold is being their extra-sively by microcomputer owners. The Prestel Microcomputing Service of-fiers thousands of pages of information and programs. The two information providers — Micronet 800 and Viewfax 258 offer the service.

The service claims to offer 'a unique expansion of the capabilities of your micro, allowing you to experience the exciting benefits of Information Technology, and electronic communications from your home. Your humble micro will give you access to a service that uses the latest techniques to bring to you information, "communication and

It is all part of a trend toward creating computer work-stations in our homes and ensuring that the expanding home-computer market in Britain is given the proper stimulus.

Nexandrea Palace, London, July

General Motors brings seven rivals together

showplace for computer manu- protocol, factures, was this year used by a major computer user to launch a drive for standards in computer to computer com- and Boeing do adopt MAP for

normally dominate these events standards will become irresistwith their showbusiness product inunches.

In an effective demonstration of what might be termed "user power". General Motors rerealed the progress it has made in persuading seven of its computer suppliers to collabo-rate on the development of a Manufacturing Automation Protocol (MAP), which will flow computers supplied by IBM, Digital Equipment, Hew lett-Packard, Alan Bradley, Gould and Motorola to commjunicate with each other, and exchange data straightforwardly without the need to develop special communications softvare for each computer to

It takes a lot to get such head-on competitors as IBM, DIG, and H-P to collaborate on a customer-led standardization effort especially when the result will be to loosen the control manufacturers seek to acheive over users by imposing their own protocol.

General Motors, however, has the advantage of having what it takes, a SUS40-billion reequipment programme over the next four years. This was major suppliers to start collabo-

At the show, General Motors six computer suppliers was hooked up through a MAP network built by the supplier involved in the development, Concord Data Systems. Ter-minals on any of the host sing files held on all the others.

America's major computer equipment available General show, the National computer Motors is urging other manutraditionally a facturers to adopt the MAP

If companies like McDonnel Douglas Dupont Eastman Kodak, Proctor and Gamble The computer user, General cations, then the pressure on Motors, virtually stole the show computer manufacturers to develop equipment to MAP

> GM believes that they will, because they share the problem of having "islands of auto-mation" with incompatible equipment supplied by a host of vendors working independently when great gains in efficiency and effectiveness could be achieved by integrating them,

This integration will be an essential part of the "factory of the future" which General Motors is currently building at Saginaw, Michigan, for its steering gear division.

The MAP development is also good news for the national-and international standard-set-ting organization. It is built around the seven layered model developed by the International Standards Organization (Iso), and incorporates some specific standards within this overall concept developed and agreed by the US National Bureau of -Standards (NBS) and the IEEE (Institute of Electronic and Electrical Engineers).

These are the IEEE 802.2 and 802.4 specifications for the "physical" and "data link" levels of the ISO model.

More good news of international cooperation on stanration on this project two years dards at the NCC was to be found at the NBS booth adjacent to the General Motors set up a demonstration of MAP display. This showed file transin action. Equipment from the fer across a local area network with equipment attached from nine different computer manufacturers. The participating companies included Digital. Equipment and Hewlett Packard, Honeywell, Intel, NCR and Britain's ICL

This was accomplished using The development of MAP is a different physical network, a not yet finished. The target date carrier sense multiple access, for completion is 1988, but local area network developed to General Motors is pushing the the IEEE 802.3 standard which new standards hard. In future, is more suitable for office new standards participations are suitable for office and the standards are suitable for office and the standard area and the MAP compatibility will be a automation applications. The requirement for all factory same ISO level four transport automation computer equip- protocols were use as with ment. To widen the choice of General Motors MAP.

Acorn grows in the business field

Torch - a company which gained a place in the business

By Geoff Wheelwright

The micro industry's first TV star has turned corporate magnate. Acorn, the Cambridge computer company which first gained prominence as manufac-turer of the BBC Micro, has developed a strong appetite for corporate diversification and

takeover bids.

In the past year Acorn has gained a major stake in Torch-Computers, Torus Systems (which produces local-area networks systems for the IBM PC) and Redwood Publishing It has also entered into major joint ventures with ICL, Racal and ESR.

The whole business came full circle for Acorn last week when it announced a four-year renewal of its contract to produce micros for the BBC. The announcement ended months of speculation that suggested Acorn's now-aging, eight-bit design for the BBC Micro might cause Acorn to lose the BBC

by Acorn's active participation in non-home-computer marcontract to a company production non-home-computer marting gained a place in the business ing something newer and kets. The company's joint market by grafting a business

operating system on to Acorn's has been suggested that the BBC Micro design - suggests company may take advantage of that Acorn sees a strong future its position with Torch and use for itself in the business micro the Torch name (and perhaps a sector. Further proof of this repackaged Torch design) as the yearning for a business identity "brand" for Acorn's line of is the company's investment in business computer products.

IBM PC-compatible products.

From further away from

Not only has Acorn put money into Torus' Icon for managing networked IBM PCs, but its Torch subsidiary has bought the rights to market a device called the Graduate, which hooks up to the BBC Micro and allows the BBC to run all software programs written for the IBM PC.

Though Acorn has in the past few months honoured longstanding commitments to produce certain peripherals for its BBC and Electron home com-Rashier – something, perhaps, ventures and major investments in fact, the next machine the like Sinciair Research's 32-bit have all pointed to an Acorn move into the business market.

The second research is a second research in the long-awaited Acorn Business Machine (ABM). Acorn has not yet confirmed terminal will largely be used for delivery dates or specifications navigation, but could also have for this business machine, but it other applications.

Business decisions aren't always as simple as Black and White

Making a business decision is never easy. All the options

must be considered and time is always too short.

Now Peachtree Software have introduced a completely new integrated program to help all managers make more effective decisions. Decision Manager caters for all the applications that a busy executive needs on his personal microcomputer and everything is totally integrated.

Data calculated on the Decision Manager spreadsheet can be displayed in a graphic format, included in a report on the executive word processor and electronically transmitted to Head Office - all at the touch of a few keys. Importantly, data can be accessed from the company mainframe, for use on the micro.

All applications are integrated into a single program and information from each area can be shown simultaneously on the screen in easy to use "windows." So for instance, financial data can be referred to on screen whilst the user is in the middle of preparing a letter. Up to 10 windows can be shown at any time, and the colour of text and backgrounds can be defined by the user. Decision Manager includes six major modules:

The Spreadsheet

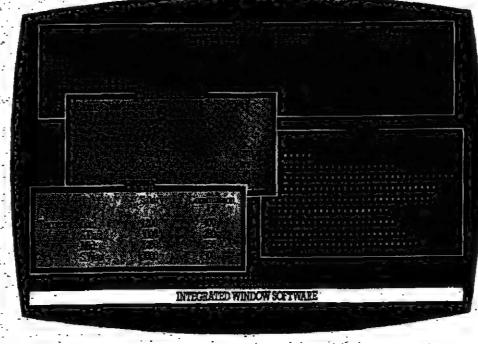

The prime tool for analysis of numerical and financial data, the Decision Manager spreadsheet takes the guesswork out of business planning. You can produce models for pricing strategies, profit and loss statements, or forecasting and can quickly explore alternative options and outcomes to help make the best decision.

Word Processing

Peachtree's word processing software is simple to learn and easy to use, so it is ideal for managers with no previous knowledge of computing. The system produces a wide variety of documents, allowing flexible drafting, editing and manipulation of text in report writing.

The Graphics System

Visuals can communicate much more quickly than columns of figures, so Decision Manager provides thirteen different graphic formats for presenting data from other areas of the program. Bar charts, pie charts, scattercharts and line graphs are just some of the alternatives.

The Database

An electronic filing system gives immediate access to personal, confidential records of all areas of your business. You can define the record format to suit your own requirements. Decision Manager offers one of the largest databases available in integrated software.

Telecommunications

The link from micro to micro makes it possible to transfer information within the building, or to other locations, to secretaries, colleagues, customers and suppliers, or to access public databases.

Micro/Mainframe Link

Using Decision Manager's unique mainframe link, you can draw data from a company's maintrame computer which supports the IBM 3270 series of terminals and utilise it within any area of Decision Manager.

Decision Manager is a new concept in integrated business software from Peachtree, available immediately for the IBM PC XT or IBM PC with hard disk for around £625. What's more, in addition to the normal support from your local dealer, you get 90 days free

telephone support direct from Peachtree to help you make even more of your new decision making powers.

Please return to Peachtree Software Limited, 99 King Street, Maldenhead, Berkshire SL6 IYF. Please send me more information about Decision Manager. Please ask my local supplier to contact me.

DP managers move

to the growing demand for user

involvement in systems devel-opment than their counterparts

This is one of the conclusions of

a survey of more than 300

organizations in five countries

carried out by the DP Research

One way of being more responsive to user demands is to combine the roles of systems

analyst and computer program-

mer. This means that the coding of programmes is done by the

same group of people who work

closely with the users to define

the actual requirements. While 30 per cent of US DP managers

and 65 per cent of Scandina-

vians surveyed reported that

they had teams of programmer

analysts, the figure for Britain

was only 19 per cent.
This trend away from specia-

lization is in many cases being

Even so, more than half the

taken much further. Many American DP managers are

Project at Bristol University.

Beware the spy hiding behind the screen

By Ben Knox Earlier this year an unsigned, photocopied letter was sent to a number of carefully selected people in Britain considered accomplished at breaking into

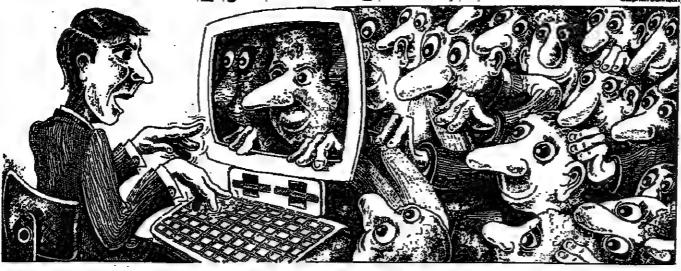

computer systems known within the field as hacking.
"Dear Friend", it ran, "a lot of people are not at all happy with the so-called data protection Bill going through com-mittee stage in the House of Commons after having had its second reading. Some people would like to show how insecure many computer databases are - and how easy it is to find out about people."

The letter challenged recipients to find out any infor-mation, financial, medical, criminal or otherwise - which might be regarded as confiden-- about two computer

journalists.

If any information does turn up, it will mean that someone using equipment readily available from many high-street shops will have gained access to allegedly secure government and police database

The existence of such hackers in the US has been acknowledged for years, yet many

people are worried that systems ulnerable than those in the US. the UK, for example, have not had such a long experience of illegal or unethical exploitation of records and other confidential personal information.

As the use of computer widespread, so do the oppor- terminal to the phone line via

use of systems. The most vulnerable part of any system is its links with the outside world. The operators of databases in For convenience and low cost many companies connect their computers directly to the public telephone system. In this way their employees and clients may use the system simply by dialing the correct telephone number communications becomes more and linking a microcomputer or

The only defence most such systems have against unauthorized usage are passwords. If the user cannot type in a previously defined password on demand, the computer often automatically drops the connection and warns the system operator of an attempted unauthorized access. But hackers are helped by networks themselves often using hidden areas on computers to swap knowledge among each

other on how systems can be broken into. Fortunately hack-ing is most often practised as a sideline — a brain-teaser mainly by people who are involved in the computer industry. It is seen by them as the ultimate video game done for devilment enternainment and the thrill of beating the system. Rarely is any form of financial gain intended

hackers to break into are public or private information databases, such as Prestel. These have been designed for maximum case of use so that any authorized person may access them without specialist knowledge. As a result the passwords used on these systems are short, only four numbers in the case of Prestel - though a ten number customer identification is also

The most popular system which hackers gain access to is neither a public nor a private information system. It is PSS the Packet Switch Stream - data network - analogous to the telephone system, except it is

only used by computers.

Through PSS it is possible to link up illegally and hence free to many of the large company or university owned computers in Britain and the rest of the world - an attractive proposition for a hacker. Of most interest are the huge infor-mation systems in America: Using the electronic mailing facilities on these, a British hacker can swop passwords, telephone numbers and other information with hackers from

system, from powerful desktop computers to mainframes: both AT & T and IBM run Unix internally on the largest of

But AT & T intends control the development of Unix very closely. Unix Europe will be the only organisation in Europe to license the use of Unix, thus opening up the possibility that users will be almost as closely tied to AT & T as they are to IBM.

IBM will not give up any of its market without a fight. Nor will users of IBM systems throw away the millions of pounds invested in computer applications and people for something which is still relatively untried IBM is likely to support Unix on its main frames soon; It already has a version of Unix on its PC.

The prospects of a major battle between the two largest IT companies in the world look unlikely in the short term. In particular AT & T is treading carefully outside the United States. It has a 20 per cent stake in Olivetti, with an option for a further 20 per cent. It is using Olivetti, Europe's largest IT and office products company, to test the water and provide market knowledge. It is not yet ready to tackle IBM in a big way. Some say it may never be ready for such a step.

recruiting more generalists. This is shown by the trend away from hiring computer science graduates. Instead more of the trainee development staff are coming from the liberal arts or business-administration

graduates recruited in the US have specialized in computer science: 37 per cent of trainces are computer science graduates, 47 per cent have-other degrees and 16 per cent are non-graduates. In the UK only 4 per cent of development trainees have degrees in computer science. So in respect of the use of generalists in DP at least, Britain comes out ahead. The study also found that many US companies are reorg-

anizing the DP function, decentralizing it to mirror more closely the user functions. This tendency to split the DP department into small groups corresponding with the user departments though not universal in the US is much more in evidence there than here or in

The Scandinavians, instead of reorganizing their departments, are introducing new design methodologies as their way of meeting the challenge of greater end user involvement. These normally involve some form of prototyping in which the user is directly involved in using a high level language to sketch out a system before the more detailed and rigorous final development process is started. More than a third of the Swedish DP managers surveyed

said that they were using, or

away from taking on specialist recruits British data processing man-agers are doing less in response systems. On the other hand the system-design methods reported on by the British sample were the more traditional ones in the US and Scandinavia. such as top down design which specifies a linear series of steps or milestones which have to be worked through rather than the all-at-one-go approach of proto-

Both the US and the Scandinavian DP departments are reported as using smaller project teams. Scandinavian teams can be as small as two or three people while three to five person teams are more common

in the US. This approach also gives flexibility because the learns usually carry out both development and maintenance work, They often work together on more than one project at a time, The individuals may also belong to more than one team at a time. This flexible team structure makes for quick responses to user demands.

by Graham Bunting

Programmes to increase the computer literacy of end users appear to be more common in andinavia than in either the UK or the US. To a large extent this is probably a by-product of the practice - widespread in Scandinavia - of negotiating new technology agreements.

Some of these agreements go so far as to introduce a new type of union representative, the data shop steward. These new officials are responsible for appraising the impact of new systems on the work procedures of their colleagues and part of the arrangement is that they are given time off for study so that they can aquire the skills they need to understand the systems

The Bristol University study also covered a number of sites in Japan. However, because of the significant culural differences from the other countries surveyed, the Japanese results are best examined separately.

In Japan to be a specialist is to be a second-class employee.

Though the survey indicated that British DP managers are reacting slowly to the pressure from ead users, there is still some movement in all the directions discussed. The rate of change is likely to accelerate and those who want to be well placed in the job market in four of five years' time should study these carefully.

Opening shots in battle for European market

The United States telecom-munications giant, American Telephone & Telegraph, and its European partner Olivetti have fired the first shots in what many feel could be a battle royal for the European computer market.

Two weeks ago they launched Unix Europe, a jointly-owned venture to promote and market the Unix operating system in Europe. The aim, says Jack Scanion, a vice president of AT & T and head of its computer systems division, is to get European users to accept Unix as an "alternative standard" and to end "hardware tyranny". He did not mention the name IBM, but the implication was clear: AT & T is gunning for to 3B systems. commercial computer unsers, where the standard, hitherto, has been IBM.

But the markets in which Unix Europe will be most active are small-business systems, office automation and factory automation; markets where IBM has been under-represented or which are only just beginning to be exploited

By Mr Scanion's own admission, IBM will not be under attack, either, in the desktop micro computer market, where its personal computer is a rd. Nor will it be aiming for the mainframe market,

Unix promises 'an end to hardware tyranny

By Kevan Pearson

where IBM has an estimated 70 on the fringes but few conflicts per cent share, and growing all in their main areas of business. There is certainly enough

In the United States micro market the company has just launched an IBM-compatible micro computer made by Olivetti. When it announced its 3B range of mini computers in the United States earlier this year it also announced a facility to use IBM PC and other IBM compatible micros as terminals

The 3B range itself, which Olivetti will launch in Europe soon, is targeted more at the mini computer market dominated by Digital Equipment, Data General and Hewlett-Packard. Unix was originally developed for Digital Equipment computers.

As one Olivetti manager put it: "AT & T's threat is more to the rest of the industry than to IBM." Industry watchers are split on whether the two United States giants will fight it out or whether they will settle for an uneasy truce with minor battles

Telecommunications is AT & T's strength; commercial computer systems are IBM's. The most widely-accepted computer networking system is IBM's System Network Architecture, used even on the 3B range, and AT & T has Unix, which has many adherents, mainly in non-commercial markets. AT & T hopes to change that with Unix Europe

Time to decide: is it science or is it engineering

Not far beneath the surface of academic computing is the fundamen-tal question of whether computing is a science or an engineering discripline. It is important because it arises in the computing course, and it also arises when researchers, (and their paymasters) decide what is a relevant

In compating the term science usually means the finding of the definitive mathematical rules and structures of computing just as physicists find the matematical laws of the physical world. Thus two of the great names of computing, you Neumann and Alan Turing, would be

Engineering, on the other hand is

seen by computer researchers as the finding of non-mathematical prin-ciples which can be used to ensure that computer systems are designed as elegantly and as effectively as possible. It is this generic type of software engineering which the Alvey Dictectorate is trying to encourage.

For example, Alvey is supporting the design of tools to aid the programmer in his or her program-ming task and in the design of simple methods of quantifying the success of a programmer's efforts. The latter can give a good indication of how efficient a programmer is at solving a programming problem rather that how many lines of code he writes.

Computing is a young activity, but if the past 20 years are indicative of just what computing is, then without doubt

it is an engineering discipline. All computing's successful technical and academic progressions have come through engineering activities. While much in the way of long-term goals has been offered by the mathematicaly-inclined computer scientists, very little of general value has actually been provided. We still cannot prove the mathematical soundness of any-

The engineering approach is often seen at its most explicit when it meets a theoritical impasse. This informal approach can clearly by seen in the area of machine translation

A perfect automatic machine translation system requires both a sound grammatical and semantic theory. But the lack of dissatisfactory

could be used.

By Roger Woolnough

With a lack of modesty fully in keeping with the superlatives that abound in the chip business, Motorola describes its new 32-bit microprocessor as "one of the most significant

product introductions in the

semiconductor industry".

As samples of the chip, called

the 68020, are only now being delivered to hardware companies, justification for this claim still lies in the future. But

there can be little question that it does open up far-reaching vistas in computing perform-

The first practical microprocessors were 8-bit devices, and as well as revolutionizing

mainframe and mini design they made the personal com-puter possible. Then came the

16-bit micros, used in the next

generation of personal com-puters such as the IBM PC. Now, with the apparent irres-tible rise of chip complexity,

the 32-bit devices are arriving.

Motorola claims impressive

thing but the most basic of programs. which is the most elegant solution and which offers the most hope of

semantic theory brought out many

Typically one solution is to enhance each word in a dictionary with sementic information about where it

Other engineering solutions are to do away with this kind of indexing, but to use the services of a translator to work upon the basic rough and raw translation. This is the approach of, for example, the EECS translation system, Systran. The current engineering proces in the machine trans-lation field is the attempt to discover

producing useful future systems.

Both types have problems: the semantically indexed systems are intolerably slow to set up. One Canadian system estimates that one

The new breed of chip makes

an immodest market debut

nearest competitor.
"We believe it outperforms

anything on the market," says Dedy Saban, Motorola's semi-

conductor marketing chief for

Europe. "It will be the standard

against which anything in the future will be measured." In spite of the claims, the new

device will not be loosening the

hold of rival chipmaker Intel in the 16-bit personal computer arena. The Intel 8086 is the heart of the IBM PC and all its clones, though Motorola's 16-bit micro, the 68000, was chosen for the Apple Macintosh

The PC makers, however, are

not the prime target for the new 68020. "Do we truly need a 32-

bit personal computer?", asks

fied that we do not, or at least

Motorola seems to be satis-

BRING ME SUNSHINE

The summer sunshine has brought tresh requirements to us from major companies throughout the country. Put the sunshine in your career by contacting Conquest.

Sales Executives OTE £28K

The continued growth of the micro market has provided numerous reached for sales staff throughout the country, ideally you would have at least two years' experience selling micros or alternatively could specialise in one of the vertical markets i.e. local government, legal or with an engineering background the technical/scientific market place.

Analysts/Programmers C. £13K

With the continued sales of micros, opportunities exist with a number of our clients in the UK, eithough mainly in London and the Thames Valley area, to manage and control this growth.

A strong analyst/programming background with knowledge of applications on micros and preferably experience of IBM PC, Apple etc. Knowledge of M Basic, MCDOS, CPM or other equivalent is necessary.

User Support-Technical

Many support positions are available with our clients from PC specialist solving technical problems on micros and add on's with the IBM PC; to installation/support-engineers, preferably with IBM PC training.

All the above positions require good personal presentation and appearance with initiative and a desire to be at the front of the micro market.

Conquest also has varied DP positions available on IBM 38, 4300 and 3000 series

COMPUTING WITHIN LLOYD'S SYNDICATE

Expanding Computer opportunity for graduate in early twenties. The work involves micro and large computer operations using UNIX, packages, C and BASIC programming, and statistics. Our business is varied and international. The successful applicant will be working with the Underwriting team in the Room at Lloyd's and must, therefore, not only be adaptable but prepared for a long term commitment to the Non-Marine Insurance Market.

DAI REES, R. J. KILK & OTHERS **LLOYD'S** LIME STREET, LONDON, EC3

Industrial Software Specialists

(DEC and IBM)

The Organisation for Industrial Research (OIR) is seeking high level software professionals to introduce new technology to manufacturing companies. The successful applicants will be trained in the United States and will work out of the Midlanderdenling with companies in the UK and throughout Europe. They will work with customer management and MIS personnel to develop specifications, haplement and support computer software systems which help improve manufacturing productivity.

Our Client

OIR is a rapidly growing American company which is a world leader in the developest and implementation of Computer Assisted Design and Manufacturing (CAD/CAM) systems for applications such as computer assisted process planning, design and manufacturing standardisation. It is now expanding its activities in Europe.

Requirements Minimum of three years' industrial experience in software systems, FORTRAN based, or support in one or more of the following environments: DEC; VAX VMS; PDP11; RSX I1 M; IBM C, TSO or CMS.

Degree level education.

Must be skilled in communications with manufacturing management, MIS personnel, designers and industrial engineers.

Working language will be English. French and/or German an advantage.

Must be a willing to travel extensively outside the UK.

Must be a villed starter capable of working well without close supervision.

An attractive behalfts package is provided with salary in the £12-£15K range, co

with experience, and a company car.

Please counct Metanis Lindeman on Hemel Hempstead (0442) 40761 Please commercial research Lindonnal on Figure Tremposess (1972) 94/11. (24 hour enswering service) or write to ber at Computer Search and Selection, FREEPOST, Hamilton House, Marlowes, Hemel Hempstead, Herts HP1 1BR.

Man who put the byte into books

By Roger Woolnough

Only a few years ago, the idea of walking past the displays of greetings cards and top-ten paperbacks to buy your com-puter would have seemed improbable, to say the least. But the trend started by Sinclair's ZX81 has caused a revolution in retailing, as well as in the home. Today W.H Smith has 40 computer shops within shops, and there are a lot more

The man who put the bits and bytes into Britain's bestknown books and stationery chain is John Rowland, Behind his somewhat unexciting title of merchandise controller lies an aspect of the home-computing boom which is just as dramatic as the success stories of hardware and software.

The take-off began in 1981, when Rowland signed a deal with Clive Sinclair which made W.H. Smith the first retail outlet for Britain's first true home computer. It was an act which needed a lot of faith. "I went around the country

with my sample, but the shop managers were not all that keen," John Rowland recalls. When I asked some of them how many they would sell in a year, they thought maybe 12." By the end of last year, Sinclair had sold more than one million ZX81s through all outlets.

How to be a slave-driver

(without really trying):

It's quite easy. Make your microcomputers pay for themselves. How? By solving all the business problems that can be solved, in Framework.™ Most of your users may have mastered one, or even two microcomputer packages - word processing, spreadsheet, or database management

They haven't had the time to learn any more. So be free to get on with their jobs. they are unable to use their micros effectively.

With one set of keystrokes, one set of commands, Framework can compile a complete Marketing Plan - including text, graphics and data. In fact, any document can be created and composed using

Framework. What's more, your DP Manager will love it. So will his programmers, because they'll now Your executives will be encouraged to use

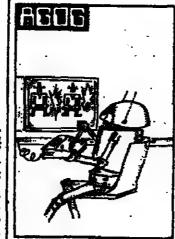

their micros for more of their work. Framework operates on a monochrome or colour screen and takes full advantage of 16/32 bit technology. It runs on the IBM PC and 100% compatibles and is available on MS-DOS soon.

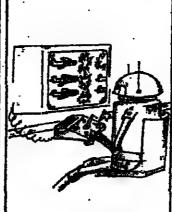

How to be a slave-driver? First, capture the imagination of your users.

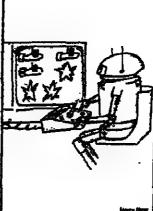

All things considered.

True to type, and in whatever design of face you'd fancy

You can spot the first-time Wordstar user a mile off. He's the chap with the hunched shoulders and glazed eyes gained from peering at a threatening green screen from behind the safety of an armchair. Short of putting a live adder in with the two hefty instruction manuals, there is little that the makers of Wordstar could do to make the

whole peckage more off-putting to the newcomer At least, that is how it looked to this greenhorn when he first plugged into what is claimed to be the world's best selling

wordprocessing program. Wordstar is a sort of computer equivalent of Macdonalds – it you like the stuff, you must learn to come to terms with it.

And that is just the sort of comment you would expect from a home computer user who has just switched to the bigger league. Making the leap from a humble Commodore 64 to the full-blooded business world of the Apricot is about more than bigger memories and fancier capabilities. There is a universe of difference between the software you buy at the local in a spare hour or two at home and the professional stuff.

I started on Wordstar with a sense of jaded disdain, con-vinced that it wouldn't hold a candle to any of the more accessible home WP programs of recent years. But after taking the time to master the system, I have turned into a fan,

Things were not that clear at first. My immediate point of comparison was with Vizawrite, the WP program on my 64. Written specifically for the machine, Vizawrite, with an integral spelling checker and integral spelling checker and word counter for under £100, remains my idea of the best kind of WP set-up you can expect on a home machine confined to a 40-column screen. Its commands are mnemonic so when, for instance, you do it using the "u" key, and it provides helpful on-screen

inappropriate letter for every pages all at the same

David Hewson plugs into the world's the Wordstar commands bestselling word-processing program to learn a lot about teaching himself

possesses. Help is summoned with the "j" key, tabs are accessed with an "i", and you turn to the "v" for insertions, This discovery left me fairly

miffed, but trying to print with the thing proved the last straw. On the Commodore, hard copy pours out of my printer uninterrupted at up to 160 characters accorded. characters a second

With Wordstar, the stuff coughs out at irregular intervals at half the rate, Before phoning the manufacturers in a last act of desperation, I decided to try a prolonged sortie at the two manuals which came with the Wordstar disk.

For the error was surely mine. The Commodore stores and prints copy in single chunks, as long as the available memory of the machine. When it is printing, you might as well head off into the kitchen for a coffee because you cannot do anything with the machine until the job is over. With Wordstar. one witnesses a totally different process. No longer is the length of the document confined to the size of the machine's available memory, the program stores chunks of what is written of its own accord while you thrash away at the keyboard.

Since the program automati-cally makes a back-up copy of your writing this means that the maximum length of anything you produce is, not the size of your computer's mem-ory, but half the storage capacity of your disk.

Having overcome the shock of that discovery, I found that the reason the printing process seemed so slow was that the Apricot was expecting me to perform some other task while got on with producing the

It shows the piece to be printed into some part of its printer, and deals with your Wordstar, on the other hand, writing something else or seems to choose the most flicking through your back

about 130.

A home word processor is a fancy electronic typewriter: the Apricot with Wordstar is a typographical machine. Take your completed Wordstar discs along to the right print shop and they'll turn them into typeset pages instantly, complete with those fancy "dropped" letters at the beginning of paragraphs.

My great breakthrough with to tackle the thing the hard way. The simpleton's version of the system shows a third of a screen of helpful information every time you touch a key. The effect is utterly inimidating. With a few easy modifications, you can remove these distracting tips, then replace them with a handy wall poster which carries all of

The Apricot makes the joh slightly easier in the way it computers boast these things -they're usually marked F1 to F8 at the side of the keyboard, and are assigned common tasks So, with WP program, you might find that pressing F1 starts bold-face printing for

Once you have mastered the ropes, moving around within Wordstar, and shifting and deleting phrases, is an absolute joy. But you need to learn it. he computer magazines are system, and, since I learnt WP basics on the 64 before I turned to Wordstar, I find it difficult to judge whether a total newcomer could master the intricacies of

award winner and recognised by accounting professionals as quality financial and management accounting software for small and medium businesses – is supplied free of charge, if you buy an Osborne Executive before 31st August 1984. † The Cash Book and Management account programs are worth £600 (RRP WH Smith

Business Software Catalogue) To: David Uwins, Future Management (Portable Computers) Ltd., 38, Tumers Drive, Blakelands North, Milma Keyma MK14 SLL, Bucks.

Vintage Riley powers past four fields on route 66

competitions for the Open cham-pionship belonged yesterday to the lesser known and lightly regarded. Wayne Riley, an Australian, who led the parade with two rounds of 66, five under par, at Ladybank. And David Glenz, an American of more mature vintage, drew along-side Paul Hoad on 133 at Leven

Amateurs also claimed attention. Three of them, Andrew Sherborne (Little Ashton), John Hawksworth (Royal Lytham St Annes) and Simon Wood (Herne Bay), shared third place on 135 with two onals at Leven.

"" Wayne Henry, the 14 year-old Hertfordshire schoolboy who had won the regional qualifying competition at Porters Park to general astonishment, is not among the qualifiers for St Andrews after rounds of 74 and 75 at Lundin Links, But his mature bearing on the rounds of 74 and 75 at Lundin Links, But his mature bearing on the course under heavy scrutiny was reflected in his reaction to events. He would, he said, "stay on at St. Andrews to see what it would have been like for me. I should think I will make it next year."

But for every uplift of the spirit there is a matching heartbreak. Bobby Clampett is one who might have hoped for better things. A name of distinction in the United States, he gripped out attention in the Troon Open of two years ago. At Ladybank, rounds of 72 and 74 left

him well adrift him well admit.

Like some others, including his playing partner. Gordon Brand junior, he paid the penalty for attempting two bites at the cherry.

The second day of the qualifying He failed to take one of the temptations on offer at last week's tournament at The Belfry, but playing four rounds there let him too little time to travel farther north and get to grips with a new course in alien conditions. Brand scored 74 and 71. Their experience bore out Hoad's belief that missing the cut at The Belfry had turned out to be a

> round of his life, 64, at Leven, where he blazed away with six successive birdies from the eighth. The seventh narrowly escaped from 15 feet at the 14th, Sherborne, who added a 70 to his 65 of Sunday, gallantly attributed his improvement to tuition on the green from Kitrina Douglas, a fellow member of Long Ashion, who is now our leading female professional in her first year

> Unlike Hawksworth and Sher borne, both internationals, Wood has confined his activities mostly to his county, Kent, yet had it not been for a penalty drop he would stand by himself in third place. Qualifiers for St Andrews

SCOTSCRAIGE 135, P Berry 69, 66: 136, B Marchbenk 67, 69; P Mitchell 69, 67; M Bashbridge 68, 68: 137, M Colendro (US) 67, 70; G Smith 69, 68; J Hegarty 70, 67; J Garner 70, 67, 138, W Filliams 72, 67; B Longmuk 67, 72; A Chandier 69, 70; L Mize (US) 69, 70; G Burrughs 70, 69, 140, alght playing for lest place.

And he enlisted the help of Jaime Gonzalez, the Brazilian who won the Tournament Players' champion-

ship last month, in an effort to analyse the fault in his swing. Gonzalez explained: "I though

Seve was joking. What can I do for one of the best players in the world? But we have always been friends because when he first came on the tour in 1975 I was someone to talk

"I stayed with him for two hours on the practice range. I felt that he

was swinging extremely flat - not taking the club away as steeply as he

does when he is playing well. He thanked me afterwards and he said

that if he should win then I can have

enything I want."
Elsewhere, Lee Tr. vino insisted

that he has not felt as good going towards an Open for several years. "I have no problem with my back."

Great Britain went down 18-14 to

Japan in the two-day Dunhill Sports Cup match at Gleneagies. Tony

Jacklin's team needed five wins and a half from the eight singles yesterday for victory but could manage only a draw. Japan' could not lose after Bernard Gallacher went down to a last-hole birdie by

Tommy Nakajima. Then came a crushing 5 and 4 win by Saburo

with in Spanish.

Norman to be his own conqueror

By Mitchell Platts

Greg Norman, oozing with ence after an amazing run of success in America, is convinced that he should be the favourite for the 113th Open championship, which starts at St Andrews on

Thursday. Australian has won the Kemper and Canadian Opens and he has been beaten in play-offs for the US Open (Fuzzy Zoeller) and Western Open

Norman, who is 29, seeking his first big championsip success, and says: "There is not a player this week whom I feel that I have to heat. Tom Watson is playing well ans so. I am sure, are several others.
But if I start to look on the scoreboard for individuals performing well, that could ruin my own

"The only person I must beat is myself. And the way I'm playing at the moment, I cannot see that being a problem. My confidence is sky-high, my attitude very positive.

"It has taken me two years to understand that I must treat the Open like any other event. It is difficult to accept the major championships in that manner. But I'm certain it is the correct way to go

solf, so Severiano Ballesteros struggled to harness his game in which he first made his name.

Ballesteros, who won the Open in 1979 at Royal Lytham, has momentarily lost faith in himself.

Ireland veer off course

Ireland's hopes of their first gold medal in the history of the world championships were sunk in Aberdeen yesterday by an architect and a postman from Guernsey.

A 16-15 defeat by the Channel Islanders Bill Crawford and Mike Nicolle left the Irish chasing bronze instead of gold in the pairs event, which now looks at the mercy of

England's team, David Bryant and As Bryant and Allcock beat Fiji by 23-14, the Irish pair of David Corkill and Tom Kengedy suffered their second defeat of the tourna-ment in Section B to allow England the luxury of being able to lose their final game and stil 'qualify for today's final.

In Section A of the pairs event. the United States moved into a

challenging position. The host nation, Scotland, provided the first finalists of the championships when Jim Boyle's triples rink beat Malawi 21-11 to

protect an unbeaten record stretch-

Aston Villa have appointed Shrewsbury's Graham Turnes (above) as their new manager to replace Tony Barton. Turner, again signed a five-year contract with Villa yesterday after returning from a two-week holiday abroad.

a two-week holiday abroad.

The VHla chairman, Dong Ellis, said: I look around with pride at the tool's we already have — a magnificent studium, a superb squad of professional players, a fine administration team and now the vital remaining piece of the Jigsaw, one new memore. Graham Tenner.

ATHLETICS

Ovett goes for a last Olympic warm-up

Steve Over has decided that he must have one last pre-Olympic in a far more critical situation, who race in Europe before leaving for Los Angeles on Friday and will run the mile at the Edinburgh Games, sponsored by HFC Trust, this evening. Over developed a skin AAA championships a month ago, rash, accompanied by a stomach He finished last in a 1,000 metres.

Nigel Cooper, the British Ama-teur Athletic Board secretary, admitted last night that "a number of extra selections" had been forwarded to the British Olympic Association for addition to the teams for loss Annales (Pet Butcher) for Los Angeles (Pat Butcher writes). The names will be confirmed today and two of the athletes under consideration, Mark Holtom, in the 110 metres burdles, and Geoff Parsons, who broke the British high jump record last Friday, are competing in Edinburgh tonight.

He missed the Peugeot Talbot Games on Friday, and the England match against Poland and Hungary in Birmingham on Sunday, when he was due to run the 800 mmetres, his shorter Olympic distance, over which he lacks race experience this

The opposition in the mile is not of the highest order, so even if there is any physical debility from the allergy. Ovets should not be

sponsons. Overt developed a skin rash, accompanied by a stomach upset, after winning a 1,500 metres race on Friday and although he managed to win the 1,500 metres in Birmingham on Simday, it was not fast enough to satisfy him.

Allan Wells has also had his share of injury this year, but his late start to the season did not hold him back last. Friday, when he ran an explosive 100 metres, reminiscent of his beyday four years ago. Wells returns to his bome town tonight for a stringent test of his 200 metres form. He runs against Brady Crans of the United States, who won in Birmingham, and Crane's colleague Duane Evans, whom Wells de-scribes as "one of the top eight in the States", which means top ten in

the world.
Fatima Whitbread is looking a Fatima Whitbread is looking a good prospect for a medal, if not gold in the javelin at Los Angeles. She is consistently throwing well over 65 metres, a distance which Anna Verouli of Greece has yet to achieve this season. But Miss Verouli, winner of the European Championships in Athens two years ago, also finished third in Helsinki, one place behind Miss Whitbread. Their meeting tonlight should be a good pointer to the Olympics.

injury casts a shadow

over events

Lord's Yorkshire, with all second innings wickets in hand, are 172 runs behind Middlesex. Yorkshire's championship visit to torksine's championship visit to lard's has been dogged by ill-fortune in recent years, with Saturday's wash-out being the fifth consecutive day lost to min. A full-

consecutive day lost to rain: A full-day's play was as last possible vesterday, but Yorkshire could take little pleasure from it.

They collepsed to 121 allout shortly after lunch, in the process losing their captain, David Bairstow, with a head injury, and they then saw Gatting and Butcher give Middlesor, an almost unassailable Middlesex an almost unassa grip on the match with a fourth-wicker stand of 146. Gatting, who hit. 13 fours in reaching an attractive century, again reminded one what a good player he is at this level.

The loss of Bairstow, who ducked into the first ball he received and was led from the field with a head wound, inevitably cast its shadow wound, inevitably cast its shadow over the day's events. Possibly undene by the growing evidence of variable, uncertain bounce, Bairstow went to hospital for a precusionary X-ray. The happily revealed nothing, but he took no forther part in the play, Robinson deputizing behind the stumps.

Inevitably, in the circumstances, the wicket was consequently viewed.

with suspicion. Middleser, however, batted on it against the lesser pane of Yorkshire's much weakened attack with little discomfort to suggest that, apart from a disgracefully slow rate of around 12 overs an hour, William, Gowans and Hughes deserved most of the credit for the way they exploited the movement and bounce on offer.

Apart from the unfortunate Bairstow, the Yorkshire batsmen had some reason for self-reproach rather than looking askance at the wicket. Lamb, beaten by a ball which nipped back quickly. Sharp, pushing forward, and Hartley, who was trapped on the back foot, might

was trapped on the back foot, might have felt the pace were against them

and could be excused. But Metcalf, who began William's opening spell of three wickets in consecutive overs, drove loosely to get an edge and there was a strong element of suicide about the dismissals of Boycott and Robinson that they had change the most after they had shared the most productive stand of the innings.

Boycott, most uncharacter-istically, hooked Cowans with meering accuracy straight down the fine leg's throat. Then, after Bairstow's accident and the rapid departure of Carrick, Robinson was run out when he was sent back by

The ball from Cowans that

Somerset build hope out of despair

Martin Crowe and Brian Rose rescued Somerset on the second day rescued Somerset on the second day of their championship game against Glumorgan in Cardiff. After a first innings deficit of 24 runs Somerset were 31 for three in the second with

were 31 for three in the second with their openers, Roebuck and Felton back in the Pavilion.

Crowe and Rose featured in an exciting century stand which came in 26 overs. Crowe reached his 50 in 122 minutes, including five fours. and Rose in &8 minutes, including The 145 partnership ended when

Crowe was out for 74. At the close Somerset were 185 for four with Rose not out 73. Glamorgan had scored 211 in their first innings thanks to Ontong's unbeaten 97. Amiss scored his tenth championship half century of the season in a mundane day at Edghaston. The Warwickshire veteran made 94 in 223 minutes before a declaration at

227 for eight.

Sussex, led by 45 from Green, replied with 122 for four off 38.3 overs in their first innings. Amiss, who has scored 710 runs in his last 11 championship innings, again fell victim to his habit of getting out

close to a century.

When he was caught at alip off Waller it was his fifth dismissal this season between 80 and 94, raising doubts whether he will achieve 100

Bairstow's Neale shows courage on pitch that makes batting hazardous

TRENT BRIDGE Nottinghamshire (2) by five wickets

TRENT BRIDGE Nottinghamshire on Friday, but clearly the prepfive wickets for the present match.

Jim Ward, the Nottinghamshire chairman, said the recent drought and 12 days' continuous cricket on the ground had not helped in the pitch's preparation.

Notinghamshire, once again haunted by pitch discord as they mounted a championship challenge, were finally left 164 to win yesterday as an eventful day entered its final phase. Neale, the Worcestershire captain, showing exemplary courage and skill, made 83 but, like nearly every other battsmen on a day when pinch's preparation.

By tea, 18 wickets had fallen with Birch the only Nottinghamshire basman to stay long and Neale playing his lone hand for Worcestershire. Rice was quickly caught at mid-wicket, hooking, when Nottinghamshire resumed at 89 for two before Kapil Dev dismissed Randall. Hadlee and French in four balls. Birch was last out. Neale, havely smoorted by several of his bravely supported by several of his coleagues, was fortunate with some unintended snicks but drove and pulled when possible and battled on for two hours and threequarters

Boldness

Hill reaches new peak in good Derby start

every other batsmen on a day when more than 20 wickets fell, be was

struck several blows by the bail's erratic behaviour.

Neale's feelings about the pitch were clear when, at 29, he was struck on his helmets visor by a ball from Cooper and angrily threw his bat away. Randall led Nottinghamshire's riveting struggle towards

of play as they sought to extend a narrow first-innings advantage last evening. Hill, with 71 in 190 minutes, and Fowler, 76 in 100 minutes, had been the mainstays of

the Derbyshire batting. Derbyshire were given a sound start by Hill and Maher, the deputy wicket keeper for the injured Taylor and now showing himself a handy opening batsman in Barnett's absence. They started slowly, at a pace far below the inter-over sprinting contests between Surrey's close fielders, but blossomed after iunch until Feltham's recall and a diving catch by Lynch at second slip accounted for Maher. Hill's ungainly stance - knock-

kneed, pigeon-toed and leaning back, and even the peak of his being askew seems to militate against stroke-play, but he drove handsomely on the off side and in course of his innings passed 10,000 runs in first-class cricket. His second-wicket stand with Hampshire was worth 54 when the latter missed a sweep in Pocock's second over of a long and accurate spell.

Derbyshire then lost their way, as Monkhouse took three wickets in five overs and 128 for one became 141 for five. Surrey, however, were denied further success by Miller and Fowler, who put on 109 in 26 overs before the declaration 10 runs behind. In an unusual interlude, one of several firm strokes by Fowler, partner, struck a pigeon fielding at

point. A concerned former farmer, Monkhouse, carried the injured bird

THE Ol'AL: Surrey, with nine second-innings wickets in hand, are 60 runs ahead of Derbyshire.

Surrey lost Howarth, their captain, shortly before the 7.40 close of play as they sought to extend a narrow first-innings advantage last where two sixes of Films included to the first land of 260 represented a good recovery from 103 for seven. Newman removed Feltham to improve further the best of play as they sought to extend a narrow first-innings advantage last where two sixes of Films reduded. whose two sixes off Finney included a mighty blow on to the upper deck of one of the refurbished stands at the pavilion end. pays for Fletcher By Alan Gibson BRISTOL. Gloucestershire, with five

second-unings wickets in hand, are 85 runs ahead of Essex. I was glad to be back at Bristol, on a sunny day, after a spell in which sickness has kept me away from cricket. Not that cricket itself was very exciting, for most of the day. On Saturday Gloucestershire had scored 326 for seven after being put in, and declared in the morning. Essex then batted unworriedly and unhurriedly: at least, that was the impression they gave, though when you glanced at the board you noticed that the scoring rate stayed steadily over three runs to the over There was not much for Gloucestershire supporters to ensupporters to enthuse, though three well-filled and jovial sponsors' tents gave an illusory impression of a substantial paying attendance. The pitch was easy, the outfield fast the bowling tidy, but no more. Gloucestershire were without their

usual opening pair, Shepherd and The VBP (you remember him. The VBF (you remember him, the Venerable Bristol Psychiatrist), was philosophising on war at one point. "War", he said, "is countless hours of boredom punctuated by moments of terror." He paused, and added: "All this game lacks is the moments of terror." However, they were to come – but he had left by the

evening session: By lunch, Essex had lost the wicket of Gooch, leg before to Trembath, a Cliftonian, who seems fluently, and Fletcher was settling in, the score 1 19 for one in 38 overs. in the fifty-first over Gladwin was well caught, low down at deep square leg, by Wright, from the first ball of a new spell by Gravency.

These were the only Essex wickets
to fall. I had thought, as soon as he came in, how pleasant it would be to watch a long innings by Fletcher, such a neat, compact, and yet graceful cricketer. We duly had it in the afternoon, though in first he the afternoon, though, in fact, he was overshadowed by McEwan, who batted most powerfully. The codeclaration came as soon as the fourth batting point was secured.

The alternative would have been to but on for 500 or so, and bowl Gloucestershire out on the last day But Pletcher's boldness, befitting county champions, was rewarded for the Gloucestershire batting faltered badly against accurate bowling by Lever and Foster These were the moments of terror, all right. The fifth wicket fell at 21. It was that of Zaheer, who is in no sort of form at present, though no doubt he will recapture it majestically one day soon. He has simply had too much cricket. Although no further disasters occurred, Essex (barring rain, which is not impossible) should have little to do

Marshall speeds England towards a hasty and inglorious surrender

By John Woodcock, Cricket Correspondent

HEADINGLEY: West Indies beat England by eight wickets. With scarcely a flicker of defiance, England lost the third Test match against West Indies, sponsored by Cornhill, and the series with it. Needing 128 to win, West Indies got them for two wickets, their opening pair being out after making 106 together. It was, amazingly enough, the first time in 10 Test matches that West Indies have

on pil

pays

Fletch

Jan Har

conceded as many as two: second innings wickets. Only once before, against Australia in 1921, have England lost the first three Tests of a five-match series at home. That was in the aftermath of the Great War. They are suffering now from the ravages of the Test and County Cricket Board's ban. If, inevitably, this takes something from the West Indians' achievement, theirs is still a temendous record. Twice now, here and at Lord's, they have finished by winning much as they pleased, after being temporarily under pressure in

from them. They lost their last seven second innings wickets for 55 runs and looked like a job

Willis alone bowled 10 no-balls and in the last half hour the match, three catches were dropped. There was no suggestion from this, even so, that had

Lloyd should be playing next month

A Birmingham specialist has given Andy Lloyd, the Warwick-shire and England opener clearance to begin net and fielding practice. Lloyd, who injured his right eye when struck by a bouncer from Malcolm Marshall in the first test on June 14, expects to be playing again within a month.

again within a month.

"It could be two weeks," He said.
"I still have a few blurred patches but my eye is continuing to impreve." Lloyd, who will miss the Benson and Hedgen cap final on Saturday, will have a further check up in ten deve time.

West Indies needed, say, 250 to win, they would have been embarrassed

Congratulations to them on their victory. They have done with high skill and the dash which comes so instinctively to their what they came here for. The Man of the Match this time England's second innings.

England's performance from the moment that Gower was out. On Saturday evening until terday he bowled mostly below his full pace anything I came here for the Man of the Match this time was Gomes. morning had started with Lloyd

holding an absolute beauty there. For the fifth time in his

six innings in the series,

Downton sold his wicket dearly,

not least because he was oldfashioned enough to play with a

straight bat.
When West Indies went in 80

minutes before lunch, Willis, as

costly. No fewer than 163 runs

came off his 26 overs in the match. With two crashing

drives Greenidge promptly put

an end to any hope that Willis might reproduce his heroics of 1981. Now that the series is lost, the selectors may well decide to end a splendid. Test career, which has brought him 325 wickets for England.

Bothsm has sone from one

Botham has gone from one extreme to the other. Since his

eight for 103 in West Indies'

first innings at Lord's, he has taken none for 162 in 28 overs.

Steve Canthen collects on The Villain at Leicester, Photograph; Chris Cole,

Cauthen riding high for title

The hot streak that has made Sieve Cavithen an odds-on favourite for the Jockeys' Championship with for the Jockeys' Championship with some bookmakers shows no sign of cooling down. During the last 48 hours, in fact, the opposite has been the case and Lester Figgott, who said recently that he would not "kill himself" to regain the title, must be wondering whether it is worth the effort of slogging up and down the country in the wake of his young rival.

Four winners at York on Saturday and another at Frankfurt on Sunday were followed yesterday by two successes from just two mounts at Leicester. Perhaps others could have won on both The Villian and Borushka, but in both cases Cauthen showed that if it is true fear travalle down the rains then to be a travels down the reins then so, too, does confidence.

Despite the presence of Cauthen on his back, The Villian was allowed to start at 10-1 for the Belvoir Castle Handicap. Two furlengs out, baving

made the running. "the Kid", as Cauthen was known during his early rise to fame in the States, had to contend with a storming challenge from a certain determined Irish kid.

Young O'Gorman had gained the young O'corman and gained the first win of his career from his very first ride on the same horse at Haydock Park nine days previously, and as he drove Mailman into a narrow lead over The Villain it looked as though victory number two was in the bag.

Cauthen, however, had merely

been watching the cards and, quite content to let O'Gorman play his king he then produced his ace and pushed The Villain back into the lead again to win without recourse to his whip.
It was almost the same story on

Stakes, although if anything shighly easier. Cauthen again made the running and had plenty up his

sleeve to repel the thrusts of Snow Tree and Borodino. Mark Wilkinson, who is assistant

RACING: BAYNOUN TAKES ON ALPHABATIM IN GEOFFREY FREER STAKES AT NEWBURY

to Fulke Johnson Houghton, Borushka's trainer, after recalling that he had ridden Rugy to victory here in a hunter chase in February, said that there were no specific plans for the well bred Borushka, but did have news of some of Johnson Houghton's better known

names.

Kirman disappointed the stable
badly at Newmarket behind Head
For Heights but that form should be
ignored because Kirmann collided hard with the rail during the race
and returned with a nasty mark on
his side, He is fine now and may run

Piggott poised for long-range treble

By Mandarin (Michael Phillips)

Piggott appears to have an the start that day after her bridle had excellent chance of winning the day's two main races for two-year olds m Mr Jay-Zee (3.0 Ayr) and the first handicap for two-year-olds olds on Mr Jay-Zee (3.0 Ayr) and Hamo Saplen (8.5 Leicester.) Mr Jay-Zee faces the harder task in the Strathchyde Stakes on the Scottish course but following that enormously promising run at Newmarlost last week he should prove capable of bearing his opposition at these maintains.

Apart from actually winning his first race Mr Jay-Zoe could hardly have shaped better on his debut then he did when running Pacific Mail to three-quarters of a length in the Research was Consent States. the Bernard van Cutsem Stakes. Clearily the significance of that performance has not escaped Piggott, who was aboard Pacific Mail that day.

Mail that day.

Another Piggon mount. Nase, trained like Mr Jay-Zee at Newmarket by Neville Callaghan, is not without a good chance of winning the Souter Johnnie Handicap Stakes either after running so well at Newmarket last Thursday in the race won by that much-improving three-year-old Courting Season.

Trapical Way, another horse who can well in defeat on the July course last week, also looks capable of picking up swift compensation in the Kirkoswald Stakes, Judgod on the way that he was running on at

the Kirkoswald Stakes. Judged on the way that he was running on at the end of the King George V Handicap at Royal Ascot before that Tropical Way will appreciate the slightly longer distance of today's

After riding at Ayr, Piegott will fly to Leicester to partner Homo Saplen for Henry Cecil in the Worksop Manor Stakes. Apperently, it would have been difficult to exaggerate the ease with which Homo Sapien won his first race at Nottingham earlier his first race at Nottingham earlier this month, so he is likely to remain unbeaten even though he is opposed by Raabihah, an easy winner at Chepstow first time out. Axe Valley (7.10) who did this column a good turn at Lingfield on Sanrday when landing the nap at 4-

1, looks capable of giving a repeat performance in the Radio Leicester

Nursery.

Paul Cole's filly has been rated on her winning form at Warwick in April. While that did not amount to much at the time Axe Valley is obviously held in higher esteem by her successful trainer as she was an intended runner for the Queen Mary Stakes at Proval Agron. Unfortunate-Stakes at Royal Ascor, Unfortunately, she had to be withdrawn down at

run this season, was some conso-lation and the way she won by three lengths on a tight rein at Lingfield pointed to her being able to win

Clearly Axe Valley has inherited much of the speed of her sire. Royben, who won the Portland Handicap at Doncaster in his prime and then defied his penalty in the and then defied his behalty in the Ayr Goldcup. Today the hard core of my nap's opposition comprises Landspeed and Ernic Bilko who have both run well against the redoubtable provideo, and King of Calfornia who has won three tacra in a row. At these weights Ernie Bilko could easily be the one to cause Richard Quinn, on Axe Valley, most majety.

Valley, most anxiety. After running well over a mile in all her races this season Last Card may well appreciate the slightly shorter distance of the Armada Fillies Handicap at Leicester while Recement, who was given the slip by Kid'em at Notungham recently. can pick up a well-deserved consolation prize in the Piper Champagne Handicap.

Finally the best bets at Folkestor Finally the best bets at Folkestone this afternoon would appear to be Scientific to win the Chris Tavare Stakes and Geovale to beat High Morale in the Derek Underwood Stakes. Geovale was not disgraced, although beaten, at Yarmouth a fortught ago because his conquerner that the constitution was Shermer's on that occasion was Shergar's steadily improving ball-brother, Shermaner,

Ancient and modern: two of the royals of the game, Vardon the pace-setter and Watson the challenger

Made to measure for Huckleberry

There is something intangible about the career of Tom Watson, who has been the best golfer in the world for a decade. He is searching for that something special which will merit the same modern-day reverence reserved for Arnold Palmer and Jack Nicklaus. He must create his own little piece of history to be for ever embroidered in the romantic love of the game.

His moment arrives this week at St Audrews. He is on the threshhold of equalling the imperturbable Harry Vardon's record of six Open Champio The money no longer matters: "winning is what counts", he says. The fame is not wholly important to him: "We contribute something to life, and to entertainment, but doctors contribute much more and go unnoticed."

Even so, Watson has the power within him to set a standard pobody will ignore. He has won his fair share of skirmishes. He has won private battles like his second Open success which followed an astonishing head-to-head encounter with Nickians and Turnberry. This time he can break down a barrier which has survived two world wars. Vardon's record has stood since 1914 when he won his last Open at

A victory at St Andrews, the home of golf, would mean that Watson has won on golf, would mean that Watson has won on all the Scottish courses which have been used in his time. He succeeded at Carnoustie (1975), Turnberry (1977), Mulrifield (1980) and Royal Troon (1982) before finally breaking through among the sassenachs at Royal Birkdale last year.

Tha magnitude of his achievements can be measured by the comments of one respected golf author some five years ago who suggested that "Vardon's record is expected to be exceeded shortly after St Andrews is ploughed under to make way for a ball park."

To be compared with the greats of today, with Nicklans and company means much to Watson; but to be linked with the past, with the names of Vardon and Taylor and Braid, is to be part of the game's history.

Vardon's background was, of course, unlike that of Watson. The son of a gardener, Vardon played his first shots with a club which consisted of a blackthorn

branch as a shaft, an oak branch as a head and a strip of tin as a face. He used a white

At the age of six Watson struck his first shot, in considerably more affluent surroundings, with ancient clubs shortened by his father. At weekends he would caddle for his father's friends; and he learnt much, it at times, in a peculiar manner.

His father's temperament on the course sometimes led to a club leaving his hands

Watson's record

Tom Watson has won five British Opens, two United States Masters and one US Open in 10 years. Only the US PGA Championship has eluded him. Since 1975, when he won his first Open in a play-off at Carnoustie, he has won eight major championships. Nicklaus (five) and Ballesteros (three) only marginally chal-

lenge him.
Watson became the first golfer in history to lead the American money list four years in succession (1977-80). He became the first player to earn more than \$500,000 in official money in one season - \$530,808 in 1980. From 1977 to 1979 he was simultaneously and uniquely the leading money-winner, Vardon Trophy winner (awarded for the lowest scoring average) and PGA Player of the Year.

When nine days ago, he achieved the

When, nine days ago, he achieved the thirty-first US tour win of his career in the Western Open at Butler National. Chicago, he took his earnings for the season to \$450,000 and his official career winnings to more than \$3.5 million. Only Nicklaus has earned more.

in sheer desperation. The story goes that one day his partners watched such an incident and then threw their clubs at Watson senior and chased him off the course. So Watson junior learnt the need to stay cool in a crisis and locked the knowledge away in his memory bank.

But he was no cherab himself. He was once suspended from school for smoking at a dance. And he earned the name of Huckleberry Dillinger. That, however, was fitting for the freckle-faced youngster who

had a mop of reddish hair and the nerve to try anything.

Initially, his studies at Stanford University, where he graduated in psychology, were to take him towards a career in insurance. "After four years I realized golf was my only talent," he says.

The careers officer would have been proud of Watson's decision. He is a marvellous technician on the course and an equally marvellous ambassador off it. The arms might resemble those of a stevedore but through the hands and wrists he generates a faultless rhythm. From the legs come the power to drive the ball like a ritle bullet. Yet through the soles of his fact he can write a women and leave to feet he can walk a green and learn its undulations. His touch on and around the greens is as silky as they come.

But it is his modesty which remains unaltered. He has not been spoilt by fame. He enjoys life, the occasional whisky, the informal chat, too much to be condemned to abnormality created by stardom. Before the start of a round in the United States Open four years ago he found time to visit a bedridden member of the Baltusrol club. Last month, again at a US Open, he left Winged Foot during his preparations to fly to the west coast for the funeral of a

He continues to live in fairly modest sarroundings in Kansas City, where he was born, with his wife, daughter and son. There he helps to organize an annual exhibition for a local hospital which raises thousands of dollars.

As Nicklaus says: "He is self-confident and tremendously determined. He is also a very pleasant and level-headed chap who will never allow success to change his personality or destroy his sense of values." Watson, however, is crystal clear about his mission this week: he is in the "anid grey toon" this week shopping for an important piece of history. "I came here to defend in 1978," he says, "and I could have won; but the Old Course got me. Since then I've learnt to appreciate it and to appreciate links golf. Now Pd like a little bit of revenge on St Andrews."

Mitchell Platts

Colombian stages first win

We witnessed yesterday one of before him in terms of popular the great stages in Tour de France support, but his ageing legs and history. To realize why, one had only to stand on the Avenue du Rif enough to overcome Fignon. Nel, in the thin sparkling air of this fashionable Alpine ski resort, and witness the multifarious sights and sounds following the finish of the seventeenth stage of the seventyfirst Tour de France.

Crude cow horns were being blown by deliriously happy Colom-bians who were celebrating the first Tour stage win by a cyclist from the American continent, Luis Herrera. Laurent Fignon was donning the yellow jersey after finishing a briliant second to the South American amateur. And Robert Millar was being awarded the red and white polka-dot jersey as king of the mountains after a ride that also put him into fourth place overall.

"I can now think of a place in the first three in Paris, Millar said.

Herrera, Fignon and Millar were the main beneficiaries, but the man who made it all possible was Bernard Hinault, who raced vesterday with more courage and pride than he did during his four previous

Like Napoleon returning from Corsica, Hinault has carried all

Yesterday, on each of two first-category climbs before the final assault on the Alp, Hinault attacked with raw power. Up the rustic Col du Coq, after 33 miles of the 94-mile stage, his acceleration split the pack

After a general regroupment, Hinault went into battle again on the Laffrey Hill, a wall of a climb that appropriately is at the start of the Route Napoleon. There was more drama in the following 20 minutes than in the previous 16

Phil Anderson, lying fourth overnight, suddenly stopped, calling for a doctor, the result of the blow on the chest he received in a crash three days ago. Kelly was dropped, along with the world champion, Greg LeMond. In front Herrera went clear with Fignon, chased by Raimund Dietzen, the West German champion, and Millar. Hinault was 30 seconds back.

Arroyo was next to the top, and he joined the three in front of him on a plunging drop back to the valley. Dietzen punctured and

Angeles on July 19.

disappeared from the picture, while Fignon pushed on with Herrera to a lead of one minute. Along the valley, the Hinault quartet gradually pulled back the two leaders and joined them as they entered the final 12 miles. The next group was two minutes behind, and the Alpe was only four miles ahead.

Hinault attacked on the flat, but the 26 seconds advantage he gained by the first of the Alpe's famed 22 by the first of the Alpe's named 22 halrpins was soon eliminated by the tiny Herrera. The 23-year-old Colombian romped away to 2 lone victory, followed home, one by one, by Fignon, Arroyo and Millar. Hinault was seventh, battered and shattered.

Hinault was sevenin, Dames to l'Aipe d'Huse. Be miles 1, L. Herrera (Columbia) Arr. Serventiem et l'Aipe d'Huse. Be miles 1, L. Herrera (Columbia) Arr. Samin 24secs. 2, L. Fignon (Fr) at 49sec; 3, A. EQUESTRIANISM: BRITISH TEAM HOPE TO FIND WINNING FORMULA AT WYLYE

British riders to get more practice

By a Special Correspondent Britain's Olympic showjumping riders are due to compete today at Peterborough, where the East of England Show begins its three-day run. John Whitaker, who will be

resting his Olympic partner, Ryan's Son, plans to take two other horses the show.
The entries also include Michael Whitaker, David Bowen and Steven Smith, all of whom will be flying to Los Angeles on July 26. With the possible exception of Bowen, who may be asked to give Boysic an outing they will not be riding their Olympic mounts.

Entries for the showjumping classes have almost doubled this

Taking it easy before being tested

By Jenny MacArthur

"I didn't think it would be as relaxed as this." Ian Stark, a member of the Olympic three-day event team, commented as he sat on Lady Hugh Russell said yesterday. event team, commented as he sat on a deck chair vesterday sipping a drink in front of the swimming pool at Bathampton House, Wylye, Wiltshire, where the team had gone She is herself a former top three-day eventer and represented Britain in the 1966 World championships. "But whatever the riders may be doing, there is no doubt that the for its final week's concentration before the horses leave for Los only thing on their minds is winning the gold medal," she added.

Angeles on July 19.

Relaxed it may be, but the formula worked out at Wytye, the home of Lord and Lady Hugh Russell, where the British team has based itself for the last eight years, has proved a winning one. The team which won the European and World championships in 1981 and '82 and the gold medal," she added.

Wylye, whose own international here-day event, sponsored by Plessey, runs from September 27-30, has ideal training facilities.

Lady Hugh overseas all the cross-country training. Pat Burgess the show jumping and the dressage is divided between Ferdi Eilburg, the Olympic village a few days prior to the competition and steam would probably move out of the Olympic village a few days prior to the competition and steam would probably move out of the Olympic village a few days prior to the competition. Because of the need for early moving starts, Wallace said that he out of the Olympic village a few days prior to the competition and the team would probably move out of the Olympic village a few days prior to the competition and the team would probably move out of the Olympic village a few days prior to the competition. Legal Appointments

THE LAW SOCIETY

PROFESSIONAL PURPOSES DEPARTMENT

SENIOR ASSISTANT SECRETARIES I AN

Restructuring of our Professional Purposes Department calls for additional appointments (which are also being advertised internally) to he made at the two most senior levels reporting to the Departmental

The Department is accountable to the Professional Purposes Committee of the Council for all matters relating to the professional conduct of solicitors, (including the provision of advice to the profession about compliance with the code of conduct), the enforcement of the relevant provisions of the Solicitors Act 1974 and the Rules made under the powers contained in it of the regulation of the profession and the administration of the Compensation Fund.

The Senior Assistant Secretary I positions (£19,065-£24,810) will each be responsible for one of two divisions, broadly corresponding with Regulatory and the Advisory functions of the department. Reporting to each will be two Section Heads each specialising in particular roles and each controlling

Applicants must have had at least 10 years post admission experience, preferably as a partner, in broadly based private practice.

Citor

The Senior Assistant Secretary II positions (£16,263-£23,437) are the Section Heads referred to above. Applicants must have at least 5 years post admission experience, preferably including private practice.

Both levels of position demand proven competence in management and the instruction and advising of subordinate staff. The nature of the work requires an analytical mind, mature judgement undeflected by pressure, and communication skills, both written and oral, of a high order. Commencing salary within the respective ranges quoted (including London Weighting Allowance £1,306 pa) will depend on experience.

Conditions of service are attractive and include a contributory Super-

annuation Scheme, free life assurance cover and 23 days annual leave. Applications, stating which level of position is applied for, and with detailed C.V. should be addressed to The Personnel and Training Manager, The Law Society, 113 Chancery Lane, London WC2A 1PL. Closing date 31 July 1984.

(including London Allowance)

Shell U.K. Limited have a vacancy for an Assistant Solicitor In the Litigation Department of their Legal Division at Shell-Mex House in London. The work will entail handling mainly property-based matters in the High Court and County Court and planning enquiries.

Applicants should have about 2 years' experience, since admission as a solicitor in a private practice litigation function, and be aged between 25-30 years.

Commencing salary will be based on experience and qualifications. Benefits include an excellent contributory pension fund, free lunches and five weeks' annual leave. Assistance will be given with relocation expenses where appropriate. Sports and social facilities are also available. Please telephone or write for an application form quoting reference 4/07 to: -

SHELL U.K. LIMITED, UKPCD/45, Shell-Mex House, Strand, London WC2R ODX. Telephone 01-257 3929.

Completed application forms should be returned by Shell 8th August 1984.

Commercial Lawyer for Attorney General's Chambers Hong Kong

PARTNERSHIP OPPORTUNITIES

Our clients are a long-established and substantial City firm of Solicitors of the highest standing. They wish to expand their practice in their own major field (commercial law) and also to develop other more specialised areas including shipping, insurance and intellectual property.

To any individual, or group of individuals, having the ability to achieve those objectives for our clients, and who for any reason are disenchanted with their present firm, our clients believe they can offer an attractive alternative as well as improved prospects.

Those interested in having further information are asked to contact Mr David Whately, who is himself a qualified solicitor. Total confidentiality can be relied on and no names will be passed on to the client firm without the express authority of the person or persons concerned. Mr Whately's private telephone number is 01-623 9227. Reference 603.

WHATELY PETRE LIMITED, Executive Selection, 6 Martin Lane, London, EC4R ODL

Solicitors

Southampton - c.£15,000 : Lymington - c.£11,000 : Chandler's Ford - c.£11,000

Our client is a well-established, forward thinking Hampshire firm with 8 well appointed offices, and a prestigious client base with close London links. To keep pace with expansion 3 young Solicitors are sought who are keen to advance their careers in an extremely attractive county which is still only 11/2 hours from London.

Southampton Civil Litigation Solicitor

A Solicitor of around 3 years' standing is required to share a Senior Partner's caseload with minimum supervision. Major City experience would be ideal, and advocacy shifty is necessary. The client base is nationwide. Ref. A.22008.

Lymington Conveyancing Solicitor

At the elegant principal office a Solicitor of up to 3 years' standing is required for domestic and commercial conveyancing. The ability to forge good relationships with clients is necessary. Ref. A.22009.

Chandler's Ford Conveyancing Solicitor

A Solicitor of around 2 years' standing is required to share with the Partner in charge the non contentious work for personal and business clients in this busy provincial office.

Candidates should have well-developed social skills as client contact is an important aspect of the work. Excellent career prospects are offered by a thriving practice where scope and reward are considerable. The firm is keen to edmit talented sionals to the partnership in due course.

To apply, please write – in confidence – with full curriculum vitae and safary details to Lesley Hay, quoting the relevant reference. These appointments are open to men and women.

HAY-MSL Selection and Advertising Limited, 52 Grosvenor Gardens, London SW1W 0AW.

AN ASSISTANT SOLICITOR

HOUSING DEVELOPMENT

c£12,000 + car

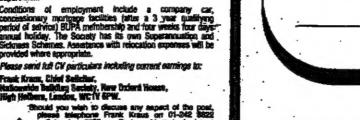

This is a new and challenging post in an expanding area of the Society's operations, surfable for a lawyer with practical experience of the drafting and negotiation of housing development and land-acquisition agreements. There will also be the opportunity for the successful candidate to personate in the wide variety of housing initiatives generated within the Society as well as in the department's work generatly.

It is expected that the successful candidate will be in the age range 27-33 with a minimum of two years relevant post qualification expenence. The person appointed will also be expeated of working under pressure and with a minimum of

Conditions of employment include a company car, concessionary mortgage facilities (after a 3 year qualifying period of advice) BUPA membership and four weeks four days annual holiday. The Society has its own Superannuation and Sciences Schemes. Assestance with relocation expenses will be

Frank Krams, Chief Selicitor,

ligh Helbers, Landos, WCTY SPW.

Legal Adviser

Contracts

to £22,500

Lawyers will be aware of the legislation currently before Parliament enabling the Royal Ordnance l'actories to obtain the status of a PLC in preparation for the introduction of private-sector capital.

Departure from the Civil Service has necessitated the establishment of a secretarian to handle matters formerly covered by other government departments. and the Company Secretary is seeking the assistance of an able young Contracts Lawver to join his

department to concentrate on this complex sector of their £500m business.
The successful applicant will be involved in a wide range of legal work but with the main emphasis being on drafting and advising the operating divisions on

which are with the MOD, but many of which are with

Candidates will therefore need to demonstrate an m-depth knowledge of contractual work gained over at least four years' post-qualification experience with a major manufacturing organisation. Experience in labour law and general company lugation would be a useful addition.

This London-based appointment will initially be made on Civil Service terms at a total remuneration of up to £22,500 without additional benefits. After incorporation the compensation

package will be renegotiated under the new PLC terms of employment. Please send brief cv, in confidence, to P A B Wemyss, Ref: AA25/8789/TT.

Divisional Solicitor

Ladbroke Racing Limited is the largest trading division of the Ladbroke group and is the leading retail betting organisation in the UK.

Our organisation is expanding both by acquisition and internal growth in the UK with further expansion planned within Belgium and other continental countries.

We require a Divisional Solicitor to be responsible for all Betting Office licensing matters, property transfer and acquisition together with general litigation and advice on corporate legal matters. He/she will be expected to become expert in the laws pertaining to betting and gaming legislation and to advise as to their impact upon the Company's commercial activity.

The ideal candidate will have held a

senior position in a practising firm and have relevant experience in a commercial environment specialising in corporate law and commercial property transactions. He/she should hold a degree and be in the age range 28-45.

Remuneration will be negotiable and will include the fringe benefits associated with this senior position to include: company car, WPA, contributory pension and share

Suitably qualified candidates should respond describing how they fulfil the requirements, enclosing a CV to:-Nick Jolly, Personnel Controller, Ladbroke Racing Limited, Hanover House, Lyon Road, Harrow, Middlesex HA12ES.

Ladbrokes

COMMERCIAL **LAWYERS**

We are looking for some good lawyers who want to work in the following areas in a stimulating and friendly environment.

Corporate Finance
We need an assistant in the group which deals
with corporate work. Our clients are large UK and overseas companies, entrepreneurial businesses and everything in between. Applicants should enjoy City work and already have some experience in the field. Financial Services

We need at least two more assistants in the group which deals with a range of domestic and international financing transactions for banks and other institutions. Ideally, applicants will have experience in this field but newly qualified solicitors will certainly be considered.

Competitive selaries will be available and there are excellent career prospects. Please apply to the Partnership Manager Berwin Leighton, Adelaide House, London Bridge, London ECAR 9HA.

BERWIN LEIGHTON

CORPORATE FINANCE

City £12-£20,000 + Benefits

As a result of an exceptionally high demand for their Corporate advisory services, our clients, some of the City's leading Merchant Banks and Stockbrokers, require additional executives and managers.

Applicants are likely to be numerate solicitors in their mid to late twenties who have trained with a large City firm and have spent a one year in a company/commercial department since

Ambinon, strength of character and diplomacy are as important as academic and professional

For further information, please contact Robert Digby, B.A., quoting Ref CF784. All applications will be treated in strictest

 Back we go to the small claims court piquently installed in Studio 3 at Yorkshire Television, Leeds: back to CASE ON CAMERA (Channel 4, 8.30pm) and a particularly revealing instance of wayward human nature versus fixed points of law. In tonight's real-life dispute, a building firm dains \$500 from a Stockport client who cancelled a cheque after changing his mind about replacing his windows. There's talk about lies, building acciety loans, threatening behaviour on Sunday mornings, and the client's ignorance about wood. THIS GRAND CONVERSATION

WAS UNDER THE ROSE (Radio 3, 7.10pm) is a densely-packed feature from BBC Sociland about the painter Jack B. Yeats (prother of the poet). Sneeze, and you'll miss a Abebu, an Ethiopian termer's wits: comcrete's love-call, circus seads of Despair (TV 10.30pm) sounds, tottering singing, a wild

Times Newspapers Limited,

Portable pensions system outlined

By Nicholas Timmins Social Services Correspondent

All employees will be able to create their own personal portable pension, with the right to opt out of existing occu-pational pension schemes, under proposals announced yesterday by the Government.

The proposals, in a consulta-tive document published by Mr Norman Fowler, Secretary of State for Social Services, would allow people in schemes that are either contracted in or out of the State Earnings-Related Pension Schemes to opt out and

buy their own personal pension. But the amount employers would be forced to contribute to the personal schemes of employees will be strictly limited. They need not be involved where employees opt out of a contracted-in scheme or a volutary contracted-out scheme.

Where schemes are contracted-out, but belonging to them is a condition of the job, employers, contributions would be limited to a sum related to the rebate they receive on national insurance contri-butions, but adjusted for age and sex.

Thus the employers' contri-bution would be lower for young people, but higher for those nearer retirement age, as the existing rebate is an average.

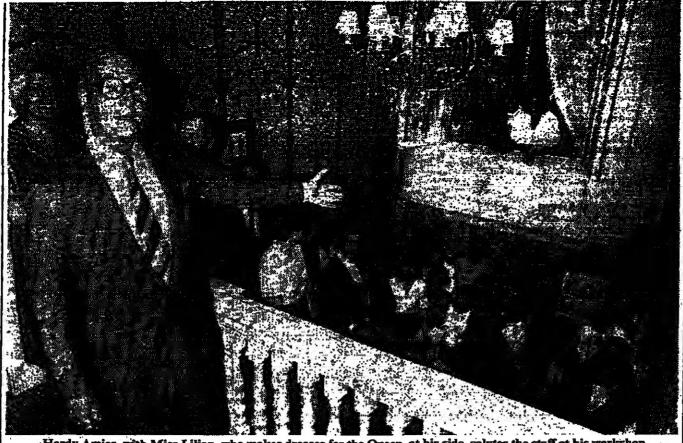

Mr Fowler said yesterday that the proposals should be attractive to the 11 million people who do not have an occupational pension scheme, and to those who want to control their own

Comments are being sought on who should be allowed to provide personal pensions, on safeguards to prevent misleading promotion, on measures to protect investors should institutions fail, and on how long a "cooling-off period" there should be should individuals wish to change their minds.

Mr Michael Meacher, Labour's social services spokesman, gave a warning that the proposals would be bitterly opposed. They would put people at risk of unwise-investments and would seriously undermine the partnership between the occuational and state schemes which would eventually take everyone above the state poverty line.

Mr Fowler denied that existing schemes would be put

Democrats struggle for unity at convention

From Nicholas Ashford San Francisco

The thirty-ninth Democratic national convention opened here yesterday with party leaders struggling to reestablish unity after Mr Walter Mon-dale's failed attempt to dump Mr Charles Manatt as national chairman.

Many of the 3.933 delegates were furious that Mr Mondale's misfired attempt to gain control of the party had obliterated the gains achieved by his nomi-nation of Mrs Geraldine Ferraro as running mate.

His attempt to sack Mr Manatt and promotion of the controversial Mr Bert Lance as general chairman of his presidential campaign raised ques-tions about his political judg-ment. The later decision to reinstate Mr Manatt has also laid him open to charges of indecision and giving into pressure,

However party leaders were optimistic that the rumpus would quickly fade once the convention got under way.

In particular, they were counting on yesterday's keynote speech by Governor Mario Guono of New York to return the assembly to its intended role as the kickoff to the general

Mr Mondale's gaffe was the result of the conflicting pressures he has to deal with as he prepares to assume the party's presidential mantle. While he saw the need to make a dramatic gesture by appointing woman as running mate, he felt it also necessary to shore up the party's traditional base in the conservative South by promoting a southerner to a top

Many of Mr Mondale's closest supporters were openly critical of the way he handled the affair. It was because of the chorus of protest from friend and foe alike that Mr Mondale decided to keep Mr Manatt as chairman until after the November election, although his authority will be limited mainly to find reviews. mainly to fund-raising.

Mr Mondale's two rivals for

the presidential nomination, Senator Gary Hart and the Rev Jesse Jackson, have sought to capitalize on Mr Mondale's vulnerability by pressing de-mands for concessions on issues they intend to raise in floor

However, both men said they would work for party unity and Mr Hart said he would campaign vigorously for Mr Mondale if he won the nomination. Carnival city: page 6

Frank Johnson in San Francisco

The lobbies take to the streets

It is being assumed by their author that, by the time these words are read, the first session of the Democratic Convention will have taken place here in the middle of the night British time.

The convention is being held in a new, brooding, concrete half-underground conference hall called the Moscone Centre. This has been designed to, among other things, mitigate the effect of earthquakes.

Preliminary reconnaissance by the New York Times claimed that, such is its shape, hardly anyone will be able to see the platform, so the place has also been designed to mitigate the effect of conventions. But earthquakes are more

famous in San Franciscan history than conventions. If, by the time you read it, this dispatch is superseded by news that an earthquake has again destroyed the city it will be because heaven has once more punished homosexuality in the usual manner.
But before setting out from

the Old World, I was advised by well wishers not to spend too much time on gays. We will rephrase that. I was advised not to spend too much time writing about gays. The well wishers suggested that writing about that subject, to the exclusion of almost all else, is the invariable temptation when discussing San tation when discussing San Francisco. That temptation When, as happened the day

before the convention, 100,000 homosexuals marched down the street, it is difficult to keep off the topic. For example, who is this Moscone - he after whom the earthquake-proof, convention-

proof centre is named? True, he is not an homosexual, or rather, was not for among his typically American characteristics is the fact that he was once murdered. He was the mayor of San Francisco, who, a few years ago, was shot dead with another local politician whose strangely haunting name rang round the world: Harvey Milk, He, it will be recalled, definitely was one.

The assassinations were, as the phrase has it, believed to be the work of an extremist. Milk was thus the first martyr of modern gaydom. For he and Moscone were struck down by a crazed anti-gay who subsequently served a rather disgracefully short prison sentence and now lives in

hiding from gay vengeance. Although the gays seem to dominate this city, calling the convention hall Harvey Milk Centre would presumably have involved too many misunderstandings on the part of the almost equally powerful anti-cholesterol lobby. So Moscone entered the grim history of modern architec-

for this is a nation of lobbies. In this city over the weekend, there were people walking about dressed as pine walking about dressed as pine trees. They were the forests lobby. There was a "family forum", at the downtown Holiday Inn, addressed by The Rev Gerry Falwell, the leader of the Moral Majority, whose members, citing the relevant texts, denounced homosexuality as sin and warned of the fate which befell the cities of the plain. They the cities of the plain. They were the Earthquake lobby. There was the national prostitutes convention. Later, they were to be found in an expensive hotel lobby.

Above all, there were the big demonstrations: the national gay/lesbian march, and that of trade unionists - mainly lorry drivers, dockers and building workers - against President Reagan,

What contrast! What proof of America's diversity! In one march there were those men with mighty chests and biceps made large by open-air toil on building sites. They were, of course, the homosexuals (for the rest of the week there will be no further reference here to homosexuals - barring carth quakes).

The trade unionists contained a mass of equally large men wearing baseball hats and with rippling tummies surging over their blue jeans. Those were the men of America who. during the anti-cholesterol terror, had stood by Mac-donalds, the Burger King and numerous brands of Milwau-

kee beer. With all this Americana, the weekend resembled walking around in a year's supply of Alastair Cook broadcasts laid

end to end.

High politics intruded. Mr
Mondale made everyone excited by choosing that woman Visiting Britons tended to be influenced by such Americana as the fact that that woman's constituency of the House of Representatives, though in New York, was called Western Queens, which, to us, is the definition of San Francisco. It is simply impossible to avoid the topic.

National Day

Iraq celebrates its National Day today, marking the assumption of power by the Arab Ba'ath Socialist Party following a bloodless coup in 1968. President Saddam Husain who took office as President, Chairman of the Revolutionary Command Council and Supreme Commander of the Armed Forces, on July 16, 1979, launched a full-scale invasion of Iran in September 1980 in an attempt to regain control of the whole Shatt al-Arab waterway. A stalemate now persists.
